Reading Explorers Year 4 John Murray,2014-08-27 A Guided Skills-Based Journey is a series of books aimed at developing key reading and study skills. This brilliant new series provides teachers with a wide variety of genres, both fiction and non-fiction, which will allow children to access, interpret and understand what they are reading. It increases the child's knowledge and understanding of why certain words are chosen by an author. It gives the reader the chance to speculate on the tone and purpose of the texts, as well as consider both the texts' themes and audience.

Prepare and Practice for Standardized Tests, Grade 4 Julia McMeans,2009-01-02 This series takes advantage of the latest research related to standardized testing. It prepares not only students, but also teachers and parents, for successful testing experiences. Each book in the series presents test-taking strategies and anxiety-reducing tips. The practice tests cover grade-specific, standards-based content. The test questions are similar in style to those found in current standardized tests. There is no magic in these books. They are not fancy. But they offer the very best preparation for making the most of testing and getting results that accurately measure what each student knows.

Echopraxia Peter Watts,2014-08-26 Prepare for a different kind of singularity in Peter Watts' Echopraxia, the follow-up to the Hugo-nominated novel Blindsight It's the eve of the twenty-second century: a world where the dearly departed send

postcards back from Heaven and evangelicals make scientific breakthroughs by speaking in tongues; where genetically engineered vampires solve problems intractable to baseline humans and soldiers come with zombie switches that shut off self-awareness during combat. And it's all under surveillance by an alien presence that refuses to show itself. Daniel Bruks is a living fossil: a field biologist in a world where biology has turned computational, a cat's-paw used by terrorists to kill thousands. Taking refuge in the Oregon desert, he's turned his back on a humanity that shatters into strange new subspecies with every heartbeat. But he awakens one night to find himself at the center of a storm that will turn all of history inside-out. Now he's trapped on a ship bound for the center of the solar system. To his left is a grief-stricken soldier, obsessed by whispered messages from a dead son. To his right is a pilot who hasn't yet found the man she's sworn to kill on sight. A vampire and its entourage of zombie bodyguards lurk in the shadows behind. And dead ahead, a handful of rapture-stricken monks takes them all to a meeting with something they will only call The Angels of the Asteroids. Their pilgrimage brings Dan Bruks, the fossil man, face-to-face with the biggest evolutionary breakpoint since the origin of thought itself. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Icarus Down James Bow,2016-09-01 Earth's survivors cling to life on an unforgiving, distant planet, next to the sun! Three generations after the crash of the colony ship Icarus, Iapyx is barely hanging on: one of thirteen cities suspended halfway down deep chasms. The sun on the diamond lands above will kill a man in less than five minutes. The ticktock monsters in the fog forest below are a little slower — but quite a bit smarter. An electromagnetic wash has disabled the computers, the radios, even the lightbulbs. It's the steam and clockwork age reborn: a careful society, rationed and stratified. Which suits Simon Daud just fine. Simon likes the rules, and knows his place — in the shadow of his older brother, Isaac. All he wants is to earn his wings as an ornithopter pilot and get to work in the flight bays. But on his final test flight, something goes wrong. Isaac is killed. Simon is burned; his body will never be the same. Neither will his world. Not everything in Iapyx is quite as it seems, and through his rehabilitation Simon falls into the middle of a conspiracy that will bring everything he's ever known to the ground. Down in the fog forest, monsters await — but so does the truth . . . if Simon can survive long enough to find it.

Ray Tracing and Beyond E. R. Tracy,A. J. Brizard,A. S. Richardson,A. N. Kaufman,2014-02-27 This complete introduction to the use of modern ray tracing techniques in plasma physics describes the powerful mathematical methods generally applicable to vector wave equations in non-uniform media, and clearly demonstrates the application of these methods to simplify and solve important problems in plasma wave theory. Key analytical concepts are carefully introduced as needed, encouraging the development of a visual intuition for the underlying methodology, with more advanced mathematical concepts succinctly explained in the appendices, and supporting Matlab and Raycon code available online. Covering variational principles, covariant formulations, caustics, tunnelling, mode conversion, weak dissipation, wave emission from coherent sources, incoherent wave fields, and collective wave absorption and emission, all within an accessible framework using standard plasma physics notation, this is an invaluable resource for graduate students and researchers in plasma physics.
