Computer Networks Andrew S. Tanenbaum, David J. Wetherall, 2013-07-23 Appropriate for Computer Networking or Introduction to Networking courses at both the undergraduate and graduate level in Computer Science, Electrical Engineering, CIS, MIS, and Business Departments. Tanenbaum takes a structured approach to explaining how networks work from the inside out. He starts with an explanation of the physical layer of networking, computer hardware and transmission systems; then works his way up to network applications. Tanenbaum's in-depth application coverage includes email; the domain name system; the World Wide Web (both client- and server-side); and multimedia (including voice over IP, Internet radio video on demand, video conferencing, and streaming media.

Computer Networks Andrew S. Tanenbaum, 2003 Details descriptions of the principles associated with each layer and presents many examples drawn from the Internet and wireless networks.

A History of the Internet and the Digital Future Johnny Ryan, 2010-09-15 A History of the Internet and the Digital Future tells the story of the development of the Internet from the 1950s to the present and examines how the balance of power has shifted between the individual and the state in the areas of censorship, copyright infringement, intellectual freedom, and terrorism and warfare. Johnny Ryan explains how the Internet has revolutionized political campaigns; how the development of the World Wide Web enfranchised a new online population of assertive, niche consumers; and how the dot-com bust taught smarter firms to capitalize on the power of digital artisans. From the government-controlled systems of the Cold War to today's move towards cloud computing, user-driven content, and the new global commons, this book reveals the trends that are shaping the businesses, politics, and media of the digital future.

The Internet Galaxy Manuel Castells, 2002-10-31 Castells helps us understand how the Internet came into being and how it is affecting every area of human life. This guide reveals the Internet's huge capacity to liberate, but also its possibility to exclude those who do not have access to it.

Corporate Finance Jonathan B. Berk, Peter M. DeMarzo, 2011 For MBA/graduate students taking a course in corporate finance. Using the unifying valuation framework based on the Law of One Price, top researchers Jonathan Berk and Peter DeMarzo set the new standard for corporate finance textbooks. Corporate Finance blends coverage of time-tested principles and the latest advancements with the practical perspective of the financial manager. With this ideal melding of the core with modern topics, innovation with proven pedagogy, Berk and DeMarzo establish the new canon in finance. The second edition reflects the constantly changing world of finance, including information on the recent financial crisis, new behavioral finance research, and updated practitioner interviews.

Inventing the Internet Janet Abbate, 2000-07-24 Janet Abbate recounts the key players and technologies that allowed

the Internet to develop; but her main focus is always on the social and cultural factors that influenced the Internet's design and use. Since the late 1960s the Internet has grown from a single experimental network serving a dozen sites in the United States to a network of networks linking millions of computers worldwide. In *Inventing the Internet*, Janet Abbate recounts the key players and technologies that allowed the Internet to develop; but her main focus is always on the social and cultural factors that influenced the Internet's design and use. The story she unfolds is an often twisting tale of collaboration and conflict among a remarkable variety of players, including government and military agencies, computer scientists in academia and industry, graduate students, telecommunications companies, standards organizations, and network users. The story starts with the early networking breakthroughs formulated in Cold War think tanks and realized in the Defense Department's creation of the ARPANET. It ends with the emergence of the Internet and its rapid and seemingly chaotic growth. Abbate looks at how academic and military influences and attitudes shaped both networks; how the usual lines between producer and user of a technology were crossed with interesting and unique results; and how later users invented their own very successful applications, such as electronic mail and the World Wide Web. She concludes that such applications continue the trend of decentralized, user-driven development that has characterized the Internet's entire history and that the key to the Internet's success has been a commitment to flexibility and diversity, both in technical design and in organizational culture.

Principles of Corporate Finance Richard A. Brealey, Stewart C. Myers, Franklin Allen, 2006 Describes the theory and practice of corporate finance. The authors show how managers use financial theory to solve practical problems and as a way of learning how to respond to change by showing not just how but why companies and management act as they do. They bring fresh expertise and ideas to this textbook and partnership.

Latin American Economic Outlook 2020 Digital Transformation for Building Back Better OECD, Economic Commission for Latin America and the Caribbean, CAF Development Bank of Latin America, European Commission, 2020-09-24 The Latin American Economic Outlook (LEO) 2020 focuses on the role of digital transformation in helping to navigate through challenging times. The Covid-19 pandemic is having a profound impact on socio-economic conditions, accentuating the already complex scenario faced by a region with significant structural weaknesses. This unprecedented crisis comes at a time of high aspirations and reinforces the need to transform the very foundations of the development model in the region.

Apple Inc. Jason D. O'Grady, 2008-12-30 Two guys named Steve, working in a garage, created a prototype computer designed to be different in a way no one thought possible: It would be easy to use. Those two Steves, one now a billionaire and still at the head of Apple, not only succeeded with that product, but they also broke ground in the business world in ways few thought possible: They proved you could not only have fun at work, but pursuing a capitalist dream could be hip. How did Apple do it? How did it go from making computers that made a difference but not much of a dent in the overall market to creating a device (the iPod) and a music service (iTunes) that has changed the way we buy and experience music? And how

did the Macintosh and its successors capture the hearts and minds of computer users so deeply that being a Mac person makes you a member of a special club? That's what this book is all about. As author Jason D. O'Grady shows, Apple is a rare company—one that is not afraid to think about a future that does not exist and turn it into reality. Critics have written Apple off time and again, yet it rises from the ashes to astound the critics and delight its customers. That's not luck or happenstance—it's vision, dedication, and persistence. Besides delighting Apple aficionados, this book will inspire students eager to launch a business career or work in the technology sector. Apple has never been afraid to chart its own path, and readers will learn what makes the company tick.

Forma y matemática 2 Vera W. de Spinadel, 2021-09-15 Considerando el éxito que tuvo la publicación del libro Forma y matemática. La familia de números metálicos en diseño, Serie Difusión 22, Ediciones FADU, que contenía las Monografías presentadas por los maestrandos para la aprobación de la asignatura que dicté en el bienio 2008-2009, hemos decidido editar un segundo tomo con las Monografías presentadas en el bienio 2010-2011, cuyo tema es: Fractales y forma. Las seis clases de Forma y matemática se dictaron con una frecuencia de una clase semanal de cuatro horas de duración (19-23 horas). La asignatura estuvo a mi cargo y durante las primeras dos horas, presentaba temas teóricos, y en las dos horas subsiguientes mis excelentes colaboradoras, las Arquitectas Marcela Carolina Franco y Mabel Pitto Trozzoli, que acaban de aprobar con la máxima excelencia la Maestría en Lógica y técnica de la forma, que dirige el Dr. Arq. Roberto Doberti, desarrollaban las aplicaciones de los conceptos presentados al diseño de formas.

The New Positioning: The Latest on the World's #1 Business Strategy Jack Trout, 1997-05-22 In the same right-to-the-point, no-nonsense style that was a hallmark of Positioning, this sequel squares off against critical marketing challenges such as how to make sure your message gets through in an era of information overload.
