1421: The Year China Discovered The World Gavin Menzies, 2003-11-25 In 1421, the largest fleet the world had ever seen set sail from China under the command of Emperor Zhu Di's loyal eunuch admirals. But by the time they returned home, Zhu Di had lost control and China was turning inwards, leaving the records of their discoveries to be forgotten for centuries.

**The Lost Empire of Atlantis** Gavin Menzies, 2011-11-08 “MENZIES [IS] PROPOUNDING ONE OF THE MOST REVOLUTIONARY IDEAS IN THE HISTORY OF HISTORY.” —New York Times Magazine New York Times bestselling historian Gavin Menzies presents newly uncovered evidence revealing, conclusively, that “the lost city of Atlantis” was not only real but also at the heart of a highly advanced global empire that reached the shores of America before being violently wiped from the earth. For three millennia, the legend of Atlantis has gripped the imaginations of explorers, philosophers, occultists, treasure hunters, historians, and archaeologists. Until now, it has remained shrouded in myth. Yet, like ancient Troy, is it possible that this fabled city actually existed? If so, what happened to it and what are its secrets? The fascinating reality of Atlantis’s epic glory and destruction are uncovered, finally, in these pages in thrilling detail by the iconoclastic historian Gavin Menzies—father of some of “the most revolutionary ideas in the history of history” (New York Times). Meticulously analyzing exciting new geologic research, recently unearthed archaeological artifacts, and cutting-edge DNA evidence, Menzies has made a jaw-dropping discovery: Atlantis truly did exist, and was part of the incredibly advanced Minoan civilization that extended from its Mediterranean base to England, India, and even America. In *The Lost Empire of Atlantis*, he constructs a vivid portrait of this legendary civilization and shares his remarkable findings. As riveting as an Indiana Jones adventure, *The Lost Empire of Atlantis* is a revolutionary work of popular history that will forever change our understanding of the past.

**The 1421 Heresy** Anatole Andro, 2005-09 During the formative years of the Ming Dynasty the Chinese government dispatched hundreds of gigantic ships, some over 400 feet long, into the Indian Ocean. The enterprise was dubbed Zheng He's Seven Voyages to the Western Ocean because the Ming fleets, led by the legendary Admiral Zheng He, went to sea altogether seven times. After twenty-seven years these maritime expeditions mysteriously stopped. To date no scholar is entirely certain of the reason behind the undertaking. Although practically unknown in the West, these events made indelible

impressions on the Southeast Asians. Today Admiral Zheng He is regarded as a god and is worshipped in temples not just in China, but throughout Southeast Asia. This year we see the 600th anniversary of the Ming Chinese launching of their monumental excursions, and scholars have renewed their interest in the historical events. There are speculations and assertions that the Ming fleets actually went beyond the Indian Ocean and even sailed to America all before Christopher Columbus had made his momentous trips. However, researchers seem to be able to neither prove their hypotheses nor disprove them. In any case, it does seem odd that the Chinese, with their superior naval technology would choose to confine their activities to local waters only. Nevertheless, to prove that they did, one needs irrefutable evidence because the suggestion challenges centuries of established history. Historian/researcher Anatole Andro believes that if such evidence exists, it will need to be European evidence to prove the case. By leaving the Indian Ocean the Chinese would be entering European territory, so to speak. If confirmation to this effect is lacking it will not only fail to prove that the Chinese had sailed outside their local waters, but on the contrary, it would be as good as proof that the Ming Chinese never went beyond their traditional sphere of interest. For two and a half years the author searched for such evidence, examining each piece of suspected artifact and following up on every lead. Not only was he able to uncover such evidence he found the evidence to be widespread. Further, scholars had examined such evidence and either discarded, ignored, or obscured it. This book is the presentation of Mr. Andro's research data, his analyses of the data thereof, and the startling but inevitable conclusions that he arrived at. Written in easy to understand language, this book challenges you to accept his findings or dispute it. In either case it is a thrill ride.

Pacific Overtures Stephen Sondheim, John Weidman, 1991 Priceless and peerless...a thrilling work of theatricality. -- Wayman Wong, San Francisco Examiner For over three decades, Stephen Sondheim has been the foremost composer and lyricist writing regularly for Broadway. His substantial body of work now stands as one of the most sustained achievements of the American stage. Pacific Overtures, originally produced in 1976, combines an unsurpassed mastery of the American musical with such arts as Kabuki theatre, haiku, dance, and masks to recount Commander Matthew Perry's 1835 opening of Japan and its consequences right up to the present. This new edition of Pacific Overtures incorporates substantial revisions made by the authors for the successful 1984 revival.

Zheng He's Maritime Voyages (1405-1433) and China's Relations with the Indian Ocean World, 2014-08-07 Zheng He's Maritime Voyages (1405-1433) and China's Relations with the Indian Ocean World: A Multilingual Bibliography provides a multidisciplinary guide to publications on this great navigator's activities and their impact on Chinese and world history. Admiral Zheng He commanded the fifteenth-century world's largest fleet. In the course of seven voyages made between 1405 and 1433, his massive ships visited over thirty present-day countries in Asia and Africa. Those voyages reflected and reinforced the development of complex networks of trade, migration, cultural exchange, and political interactions between

China and the Indian Ocean world. This bibliography lists sources in thirteen languages, including both scholarly studies and popular works like Gavin Menzies's controversial bestsellers claiming the Chinese sailed around the world before Columbus. Relevant translations, transliterations and annotations are provided to aid the reader.

**The Frozen Echo** Kirsten A. Seaver, 1996 Using new archaeological, scientific, and documentary information this book confronts head-on many of the unanswered questions about early exploration and colonization along the shores of the Davis Strait.

*Before Columbus* Charles C. Mann, Rebecca Stefoff, 2009-09-08 A companion book for young readers based upon the explorations of the Americas in 1491, before those of Christopher Columbus.

*1421* Gavin Menzies, 2012-08-31 On 8 March 1421, the largest fleet the world had ever seen set sail from China. The ships, some nearly five hundred feet long, were under the command of Emperor Zhu Di's loyal eunuch admirals. Their mission was 'to proceed all the way to the end of the earth to collect tribute from the barbarians beyond the seas' and unite the world in Confucian harmony. Their journey would last for over two years and take them around the globe but by the time they returned home, China was beginning its long, self-imposed isolation from the world it had so recently embraced. And so the great ships were left to rot and the records of their journey were destroyed. And with them, the knowledge that the Chinese had circumnavigated the globe a century before Magellan, reached America seventy years before Columbus, and Australia three hundred and fifty years before Cook... The result of fifteen years research, *1421* is Gavin Menzies' enthralling account of the voyage of the Chinese fleet, the remarkable discoveries he made and the persuasive evidence to support them: ancient maps, precise navigational knowledge, astronomy and the surviving accounts of Chinese explorers and the later European navigators as well as the traces the fleet left behind - from sunken junks to the votive offerings left by the Chinese sailors wherever they landed, giving thanks to Shao Lin, goddess of the sea. Already hailed as a classic, this is the story of an extraordinary journey of discovery that not only radically alters our understanding of world exploration but also rewrites history itself.

The Making of the October Crisis D'Arcy Jenish, 2018 The first bombs exploded in Montreal in the spring of 1963, and over the next seven years there were hundreds more. There were dozens of bank robberies, six murders and, in October 1970, came the kidnappings of a British diplomat and a Quebec cabinet minister. The perpetrators were members of the Front de Liberation du Quebec, dedicated to establishing a sovereign and socialist Quebec. Half a century on, we should have reached some clear understanding of what led to the October Crisis. But no--too much attention has been paid to the Crisis and not enough to the years preceding it. And most of those who have written about the FLQ have been nationalists, sovereigntists or former terrorists. They tell us that the authorities should have negotiated with the kidnappers. They contend that Jean Drapeau's administration and the governments of Robert Bourassa and Pierre Trudeau created the October

Crisis, by invoking the War Measures Act and by putting soldiers on the streets and allowing the police to detain nearly 500 people without warrants. Using new research and interviews, D'Arcy Jenish tells for the first time the complete story--starting from the spring of 1963. This gripping narrative by a veteran journalist and master storyteller will change forever the way we view this dark chapter in Canadian history.--

**Chinese Naval Strategy in the 21st Century** James R. Holmes, Toshi Yoshihara, 2012-09-10 Alfred Thayer Mahan has been called America's nineteenth-century 'evangelist of sea power' and the intellectual father of the modern US Navy. His theories have a timeless appeal, and Chinese analysts now routinely invoke Mahan's writings, exhorting their nation to build a powerful navy. Economics is the prime motivation for maritime reorientation, and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China's list of military priorities. This book is the first systematic effort to test the interplay between Western military thought and Chinese strategic traditions vis-à-vis the nautical arena. It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China's encounters on the high seas. Empirical analysis adds a new dimension to the current debate over China's 'rise' and its importance for international relations. The findings also clarify the possible implications of China's maritime rise for the United States, and illuminate how the two powers can manage their bilateral interactions on the high seas. *Chinese Naval Strategy in the 21st Century* will be of much interest to students of naval history, Chinese politics and security studies.

**The Jefferson Lies** David Barton, 2012 Noted historian Barton sets the record straight on the lies and misunderstandings that have tarnished the legacy of Thomas Jefferson.

**Lost on Planet China** J. Maarten Troost, 2008 A sharply observed, hilarious account of Troost's adventures in China- a complex, fascinating country with enough dangers and delicacies to keep him, and readers, endlessly entertained.

**Homer Lea** Lawrence M. Kaplan, 2010-10-01 "The unlikely story of Lea's attempts to train a cadre of soldiers in American Chinatowns who would return to their homeland to make it a modern world power." —Pacific Historical Review As a five-foot-three-inch hunchback who weighed about 100 pounds, Homer Lea (1876-1912), was an unlikely candidate for life on the battlefield, yet he became a world-renowned military hero. *Homer Lea: American Soldier of Fortune* paints a revealing portrait of a diminutive yet determined man who never earned his valor on the field of battle, but left an indelible mark on his times. Lawrence M. Kaplan draws from extensive research to illuminate the life of a "man of mystery," while also yielding a clearer understanding of the early twentieth-century Chinese underground reform and revolutionary movements. Lea's career began in the inner circles of a powerful Chinese movement in San Francisco that led him to a generalship during the Boxer Rebellion. Fixated with commanding his own Chinese army, Lea's inflated aspirations were almost always dashed by reality. Although he never achieved the leadership role for which he strived, he became a trusted advisor to revolutionary

leader Dr. Sun Yat-sen during the 1911 revolution that overthrew the Manchu Dynasty. As an author, Lea garnered fame for two books on geopolitics: *The Valor of Ignorance*, which examined weaknesses in the American defenses and included dire warnings of an impending Japanese-American war, and *The Day of the Saxon*, which predicted the decline of the British Empire. More than a character study, this biography provides insight into the establishment and execution of underground reform and revolutionary movements within US immigrant communities and in southern China, as well as early twentieth-century geopolitical thought.

*1788* David Hill, 2010-10-01 An extraordinary narrative history of the First Fleet, by the bestselling author of *The Forgotten Children*. Never before or since has there been an experiment quite as bold as this. Set against the backdrop of Georgian England with its peculiar mix of elegance, prosperity, progress and squalor, the story of the First Fleet is one of courage, of short-sightedness, of tragedy but above all of extraordinary resilience. It is also, of course, the story of the very first European Australians, reluctant pioneers who travelled into the unknown - the vast majority against their will - in order to form a colony by order of the King's government. Separated from loved ones and travelling in cramped conditions for the months-long journey to Botany Bay, they suffered the most unbearable hardship on arrival on Australian land where a near-famine dictated that rations be cut to the bone. But why was the settlement of New South Wales proposed in the first place? Who were the main players in a story that changed the world and ultimately forged the Australian nation? How did the initial skirmishes with the indigenous population break out and how did the relationship turn sour so quickly? Using diaries, letters and official records, David Hill artfully reconstructs the experiences of these famous and infamous men and women of history, combining narrative skill with an eye for detail and an exceptional empathy with the people of the past.

Maps of the Ancient Sea Kings Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years before Columbus. Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.

*America B.C.* Barry Fell, 1989 Druids in Vermont? Phoenicians in Iowa? These are just a few of the interesting bits of information contained in this volume of American pre-history. This groundbreaking work shatters many of the myths of America centuries ago.

*Zheng He and the Treasure Fleet, 1405-1433* Paul Rozario, 2005-01-01 Admiral Zheng He is a historical figure in China and a great explorer in the history of navigation, undertook a total of seven epic voyages between 1405 and 1433, spanning

over 30 countries throughout the South Pacific and the Indian Ocean. These historic voyages are the largest maritime expeditions in world history. Some speculate that the fleet circumnavigated and mapped the world, including America, a century before Magellan. Uniquely organized as a travel guide, the book is invaluable to historians, scholars, as well as modern-day visitors to these sites.

The City of Light Jacob D'Ancona, 2003 In 1270, Jewish scholar-merchant Jacob d'Ancona embarked on a remarkable voyage from his native Italy to Zaitun, the city of light, a vast coastal metropolis in southern China. His manuscript, hidden from the world for centuries, provides a first-person insight into life in the 13th century. It describes a thriving mercantile economy, whose vigorous manufacture and lavish consumption in the shadow of the impending Mongol invasion represent the swansong of a wealthy, decadent and surprisingly modern society. Jacob d'Ancona's participation as a foreign trader in the grand civic debates shed light on the relationship of Jews and Christians and the role of the individual in society.-- Amazon.com.
