A Little House Fondation Le Corbusier,2020-03-09 Villa le Lac, which was designated a World Heritage in 2016, was designed and built by Le Corbusier as Geneva lakeside home for his parents in 1925. Because of its spare arrangement of spaces, he referred to it as a “dwelling machine.” Even today it remains the modern prototype of the “small house” that fulfills all of the functions of a residence with a minimum of floor area and seamless transitions between spaces. For the first time, this book is appearing in three separate language editions, following the original edition in which Le Corbusier documented the history of the building: with photographs, sketches and a poetic text. Access to the original photographs allowed the quality of the illustrations in this edition to be improved significantly.

International Community Psychology Stephanie Reich,Manuel Riemer,Isaac Prilleltensky,Maritza

Montero,2007-07-03 This is the first in-depth guide to global community psychology research and practice, history and development, theories and innovations, presented in one field-defining volume. This book will serve to promote international collaboration, enhance theory utilization and development, identify biases and barriers in the field, accrue critical mass for a discipline that is often marginalized, and to minimize the pervasive US-centric view of the field.

Boulder Eva Baltasar,2023-05-05 Working as a cook on a merchant ship, a woman comes to know and love Samsa, a woman who gives her the nickname Boulder. When Samsa gets a job in Reykjavik and the couple decides to move there together, Samsa decides that she wants to have a child. She is already forty and can't bear to let the opportunity pass her by. Boulder is less enthused, but doesn't know how to say no—and so finds herself dragged along on a journey that feels as thankless as it is alien. With motherhood changing Samsa into a stranger, Boulder must decide where her priorities lie, and whether her yearning for freedom can truly trump her yearning for love. Once again, Eva Baltasar demonstrates her preeminence as a chronicler of queer voices navigating a hostile world—and in prose as brittle and beautiful as an ancient saga.

Aids Timothy Edgar,Mary Anne Fitzpatrick,Vicki S. Freimuth,2012-12-06 Prevention through appropriate behavior is the

best weapon available to fight further spread of HIV infection. However, individuals take necessary actions to prevent diseases such as AIDS only when they are properly informed and they feel motivated to respond to the information they possess. In order to achieve a clearer understanding of these two facets of the prevention process, this book examines the interplay of the messages individuals receive about AIDS at the public level and the messages exchanged between individuals at the interpersonal level. The specific purpose of the book is to provide a theoretical and conceptual foundation for understanding the pragmatic concerns related to the AIDS crisis in the United States and other parts of the world. The book represents the first systematic examination of how theory informs our understanding of AIDS and communication processes. Contributors explore the issues from a variety of theoretical and conceptual viewpoints. Their goal is to stimulate thought which will lead to the pragmatic application of the ideas presented. The chapters focus on four general communication concerns: * interpersonal interaction as it relates to choices individuals make about safer sex practices, * theory and practice of public campaigns about AIDS, * intercultural issues, and * critical and descriptive approaches for understanding news coverage of AIDS.

Lugubrious Nights José Cadalso, 2008 This is the first English translation of a lyrical poem in prose that Sebold considers to be the first fully Romantic work of continental European literature.

Constitutional Theory Carl Schmitt, 2008-01-23 Carl Schmitt's magnum opus, *Constitutional Theory*, was originally published in 1928 and has been in print in German ever since. This volume makes Schmitt's masterpiece of comparative constitutionalism available to English-language readers for the first time. Schmitt is considered by many to be one of the most original—and, because of his collaboration with the Nazi party, controversial—political thinkers of the twentieth century. In *Constitutional Theory*, Schmitt provides a highly distinctive and provocative interpretation of the Weimar Constitution. At the center of this interpretation lies his famous argument that the legitimacy of a constitution depends on a sovereign decision of the people. In addition to being subject to long-standing debate among legal and political theorists in Western Europe and the United States, this theory of constitution-making as decision has profoundly influenced constitutional theorists and designers in Asia, Latin America, and Eastern Europe. *Constitutional Theory* is a significant departure from Schmitt's more polemical Weimar-era works not just in terms of its moderate tone. Through a comparative history of constitutional government in Europe and the United States, Schmitt develops an understanding of liberal constitutionalism that makes room for a strong, independent state. This edition includes an introduction by Jeffrey Seitzer and Christopher Thornhill outlining the cultural, intellectual, and political contexts in which Schmitt wrote *Constitutional Theory*; they point out what is distinctive about the work, examine its reception in the postwar era, and consider its larger theoretical ramifications. This volume also contains extensive editorial notes and a translation of the Weimar Constitution.

Television Goes Digital Darcy Gerbarg, 2008-12-10 Television has become a ubiquitous part of our lives, and yet its impact continues to evolve at an extraordinary pace. The evolution of television from analog to digital technology has been underway for more than half a century. Today's digital technology is enabling a myriad of new entertainment possibilities. From jumbotrons in cyberspace to multi-dimensional viewing experiences, digital technology is changing television. Consequently, new advertising metrics that reflect the new viewer habits are emerging. The ability to capture a viewer's interactions changes the advertising proposition. Telephone and wireless companies are challenging the traditional mass media providers - broadcasters, cable and satellite companies - and they're all finding ways to deliver TV programming, video content and Internet offerings to large and small screens in the home and on the go. This volume showcases insights from industry insiders and researchers from a variety of disciplines. It explores the economic, cultural, technical, and policy implications of digital television, addressing such questions as: How will content be monetized in the future? What programming opportunities become possible with the advent of going digital? Will content still be king or will the conduits gain the upper hand? This book analyzes the digital television evolution: its impacts on the economics of the TV industry, its significance for content creation from Hollywood blockbusters to You Tube, the changing role of the consumer, and what's coming next to a theatre near you.

Left Sentence Peripheries in Spanish Andreas Dufter, Álvaro S. Octavio de Toledo y Huerta, 2014-07-31 Since the advent of syntactic cartography, left sentence peripheries have begun to take center stage in linguistic research. Following the lead of Rizzi (1997), much work on left peripheries has been focused on Italian, whereas other Romance languages have attracted somewhat less attention. This volume offers a well-balanced set of articles investigating left sentence peripheries in Spanish. Some articles explore the historical evolution of left dislocation and fronting operations, while others seek to assess the extent - and the limits - of variation found between different geographical varieties and registers of the contemporary language. Moreover, the volume comprises several case studies on the interfaces between syntax, semantics, and information structure, and the implications of these for pragmatic interpretation and the organization of discourse. Cross-linguistic and typological perspectives are also provided in due course in order to position the analyses developed for Spanish within a larger research context.

Programs and Manifestoes on 20th-Century Architecture Ulrich Conrads, 1975-11-15 The present volume offers eloquent testimony that many of the master builders of this century have held passionate convictions regarding the philosophic and social basis of their art. Nearly every important development in the modern architectural movement began with the proclamation of these convictions in the form of a program or manifesto. The most influential of these are collected here in chronological order from 1903 to 1963. Taken together, they constitute a subjective history of modern architecture; compared with one another, their great diversity of style reveals in many cases the basic differences of attitude and

temperament that produced a corresponding divergence in architectural style. In point of view, the book covers the aesthetic spectrum from right to left; from programs that rigidly generate designs down to the smallest detail to revolutionary manifestoes that call for anarchy in building form and town plan. The documents, placed in context by the editor, are also international in their range: among them are the seminal and prophetic statements of Henry van de Velde, Adolf Loos, and Bruno Taut from the early years of the century; Frank Lloyd Wright's 1910 annunciation of Organic Architecture; Gropius's original program for the Bauhaus, founded in Weimar in 1919; *Towards a New Architecture, Guiding Principles* by Le Corbusier; the formulation by Naum Gabo and Antoine Pevsner of the basic principles of Constructivism; and articles by R. Buckminster Fuller on universal architecture and the architect as world planner. Other pronouncements, some in flamboyant style, including those of Erich Mendelsohn, Hannes Meyer, Theo van Doesburg, Oskar Schlemmer, Ludwig Mies van der Rohe, El Lissitzky, and Louis I. Kahn. There are also a number of collective or group statements, issued in the name of movements such as CIAM, De Stijl, ABC, the Situationists, and GEAM. Since the dramatic effectiveness of the manifesto form is usually heightened by brevity and conciseness, it has been possible to reproduce most of the documents in their entirety; only a few have been excerpted.

A Companion to Spanish Cinema Jo Labanyi, Tatjana Pavlović, 2015-12-21 A Companion to Spanish Cinema is a bold collection of newly commissioned essays written by top international scholars that thoroughly interrogates Spanish cinema from a variety of thematic, theoretical and historic perspectives. Presents an insightful and provocative collection of newly commissioned essays and original research by top international scholars from a variety of theoretical, disciplinary and geographical perspectives Offers a systematic historical, thematic, and theoretical approach to Spanish cinema, unique in the field Combines a thorough and insightful study of a wide spectrum of topics and issues with in-depth textual analysis of specific films Explores Spanish cinema's cultural, artistic, industrial, theoretical and commercial contexts pre- and post-1975 and the notion of a "national" cinema Canonical directors and stars are examined alongside understudied directors, screenwriters, editors, and secondary actors Presents original research on image and sound; genre; non-fiction film; institutions, audiences and industry; and relations to other media, as well as a theoretically-driven section designed to stimulate innovative research

C-ORAL-ROM Emanuela Cresti, Massimo Moneglia, 2005 The C-ORAL-ROM book and DVD provide a unique set of comparable corpora of spontaneous speech for the main Romance languages, French, Italian, Portuguese and Spanish. The

corpora are accompanied by comparative linguistic studies, models and standard linguistic measures of spoken language variability. Each corpus is built to the same design using identical sampling techniques, and each corpus is presented in multimedia format, allowing simultaneous access to aligned acoustic and textual information. Texts are headed with information about provenance, participants, etc. and the transcriptions show changes of speaker. Speech acts are tagged according to the evidence of prosodic criteria. Each corpus totals 300,000 words and presents formal and informal speech in a variety of contexts of use, dialogue structure and text genres, semantic domains and speech act typologies. The corpora have great statistical relevance for spoken language structures and can address key issues in human language technology such as speech recognition in unrestricted discourse, the suitability of speech synthesis in natural prosody, and multilingual applications of the spoken language interface. The work provides new data and innovative theoretical perspectives that are relevant for corpus linguistics, romance linguistics, syntactic theory, speech and prosody research, and second language acquisition.

Education Nation Milton Chen, 2010-06-24 An educational innovator who worked at Sesame Workshop and The George Lucas Educational Foundation offers a new vision for learning As a result of constant innovation, learning is no longer limited by traditional confines and we're moving beyond students tied to their chairs, desks, and textbooks-and teachers locked away in classrooms. In Education Nation author Milton Chen draws from extensive experience in media-from his work on Sesame Street in its nascent years to his role as executive director of the George Lucas Educational Foundation-to support a vision for a new world of learning. This book, in six chapters, explores the edges in education—the places where K-12 learning has already seen revolutionary changes through innovative reform and the use of technology. Examines ways in which learning can be revolutionized through innovative reform and the use of technology Explores the ever-expanding world of technology for breakthroughs in teaching and learning Includes many wonderful resources to support innovation in schools across the nation This important book offers a clear vision for tomorrow's classrooms that will enhance learning opportunities for all children.

Tavistock Institute Daniel Estulin, 2015-09-14 The real story behind the Tavistock Institute and its network, from an intriguing best-selling author The Tavistock Institute, in Sussex, England, describes itself as a nonprofit charity that applies social science to contemporary issues and problems. But this book posits that it is the world's center for mass brainwashing and social engineering activities. It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet, and in the process, change the paradigm of modern society. In this eye-opening work, both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered. With connections to U.S. research institutes, think tanks, and the drug industry, the Tavistock has a large reach, and Tavistock Institute attempts to show that the conspiracy is real, who is behind it, what its final long term objectives are,

and how we the people can stop them.
