R. Stephen Sennott

The Architecture of Paris Andrew Ayers, 2004 The author here presents an architectural history of Paris, stretching from the 3rd century BC up until the end of the 20th century.

Ricardo Bofill Gestalten, Ricardo Bofill, Pablo Bofill, Robert Klanten, Maria-Elisabeth Niebius, 2019-03-05 Poetic spaces, surreal structures and dramatic visions. The extraordinary career of Ricardo Bofill is collected in this monograph, which reveals his inspiring approach to architecture, and to life. Ricardo Bofill is one of the 20th century's most unique architects and radical visionaries. With his Taller de Arquitectura he built spaces for everyday life with otherworldly aesthetics, that have been elevated to iconic status in countless films and images. His visions for urban and communal life challenged preconceived notions of shared space and proposed alternative styles of living. This monograph explores his revolutionary approach by profiling his greatest projects. Spectacular new photography, texts from experts and from Bofill himself are complemented by working drawings and floor plans. At a time when prevailing styles in architecture are becoming ever more homogenous, Bofill's fantastic creations satisfy a longing for originality, personality and progressive ideals.

The Ten Most Influential Buildings in History Simon Unwin, 2016-07-07 Even the most inventive and revolutionary architects of today owe debts to the past, often to the distant past when architecture really was being invented for the first time. Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated (consciously or subliminally) by particularly powerful buildings from history. *The Ten Most Influential Buildings in History: Architecture's Archetypes* identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries. Each archetype is analysed through distinctive examples, following the methodology established by the author in his previous books. The variety of 'lines of enquiry' each archetype has provoked in latter-day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings. Archetypes have a timeless relevance. In adopting this approach, *The Ten Most Influential Buildings in History* is as pertinent to contemporary practice as it is to understanding buildings from antiquity, and offers insights into the bridges of influence that can operate between the two.

A Critical History of Contemporary Architecture Elie G. Haddad, David Rifkind, 2016-12-05 1960, following as it did the last CIAM meeting, signalled a turning point for the Modern Movement. From then on, architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi, and gave rise to the first revisionary movement following Modernism.

Bringing together leading experts in the field, this book provides a comprehensive, critical overview of the developments in architecture from 1960 to 2010. It consists of two parts: the first section providing a presentation of major movements in architecture after 1960, and the second, a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors, but also charts a middle course between the 'aesthetic' histories that examine architecture solely in terms of its formal aspects, and the more 'ideological' histories that subject it to a critique that often skirts the discussion of its formal aspects.

Fifty Modern Buildings That Changed the World DESIGN MUSEUM ENTERPRISE LTD, Deyan Sudjic, 2015-03-16 The history of modern architecture is as diverse as it is beautiful, varying wildly from region to region and era to era. The Grove Encyclopedia of American Art Joan M. Marter, 2011 Arranged in alphabetical order, these 5 volumes encompass the history of the cultural development of America with over 2300 entries.

Ricardo Bofill Bartomeu Cruells, 1992 Ricardo Bofill (Barcelona, 1939) has shaped the character of his work through his revaluation of the aesthetic function of each construction, of its relationship with its context and in particular of its relation to the society in which it is implanted. This book subdivides the complex work of the architect in several chapters, ranging from town planning to furniture design by way of schemes for parks, housing, offices and skyscrapers, in a profusely illustrated edition which includes a large number of original plans and sketches.

Architecture and Ugliness Wouter Van Acker, Thomas Mical, 2020-01-09 Whatever 'ugliness' is, it remains a problematic category in architectural aesthetics - alternately vilified and appropriated, used either to shock or to invert conventions of architecture. This book presents sixteen new scholarly essays which rethink ugliness in recent architecture - from Brutalism to eclectic postmodern architectural productions - and together offer a diverse reappraisal of the history and theory of postmodern architecture and design. The essays address both broad theoretical questions on ugliness and postmodern aesthetics, as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century. The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous, the ordinary, disgust, the excessive, the grotesque, the interesting, the impure and the sublime. This volume does not simply document the history of a postmodern anti-aesthetic through case studies. Instead, it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory. This book

answers in detail the questions: How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real? How have the ugly and the antiaesthetic been a productive force in postmodern architecture? How can ugliness be of value to architecture? And how can architecture make good use of ugliness?

Postmodernism Christopher Butler,2002-10-10 'a pre-eminently sane, lucid, and concise statement about the central issues, the key examples, and the notorious derilections of postmodernism. I feel a fresh wind blowing away the miasma coiling around the topic. ' -Ihab Hassan, University of Wisconsin, Milwaukee'the most intellectually incisive, coherent and comprehensive meditation upon the history and significance of postmodernism that I have yet encountered.' -Patricia Waugh, University of Durham'easily the best introduction to postmodernism currently available' -Hans Bertens, Utrecht University

Under Pressure Hina Jamelle,2021-09-29 Under Pressure is about instigation and design in urban housing. Urban housing is a bellwether for economic, social, and political change. It varies widely in quality, typology, and audience and lies between the formal systems of urban infrastructure and the informal systems of daily life. Housing's complexity offers unique and exciting opportunities to architects. Its entwinement with private equity and public agencies presents important challenges amplified by urbanization. This book gathers and contextualizes relevant conversations in urban housing unfolding today across architecture through four topics: Learning from History, Changing Domesticities, Housing Finance and Policy, and Design and Material Innovation. The result is a multi-disciplinary amalgam of research and design intelligence from thought leaders in the fields of architecture, real estate, economics, policy, material design, and finance.

Contemporary Architecture Marta Tobolczyk,2021-07-05 This book offers an exciting journey into the most recent architectural achievements, seen in their complexity and plurality, and described in the most objective and truthful way. The development of contemporary architecture is presented as it commenced more than a century ago, as it tried to reconcile democratic ideals with the forces of the Industrial Era. In contrast to many books on the modern-day art of building, the development of architecture is not described chronologically here, but, rather, independently for each selective architectural trend. This allows a better explanation of some evolutionary processes and the continuity of each trend. Thanks to such an approach, this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools.

Postmodernism Terry Farrell,Adam Nathaniel Furman,2024-10-01 First published in 2017 as *Revisiting Postmodernism*, this refreshed edition of a seminal text reflects on a design movement that changed our world. Postmodernism invites readers to explore the style in a new light, as the cultural phenomenon that it is, one which thrives on complexity and pluralism. Exploring its expression not only in architecture, but in design, urban planning and placemaking, *Postmodernism* reflects on the history of the movement and its continuing influence on design practice today. Sir Terry Farrell and Adam

Nathaniel Furman present two separate but complementary perspectives of this rich period of architectural history; one account as lived experience from a protagonist and pioneer in the field of postmodern architecture, and the other analysing the movement afresh, through the lens of the 21st century. Shedding new light onto the forces and influences of the time, and offering insight into how these were transforming approaches to architecture both in the UK and internationally, this important book presents a new appreciation of this period of architectural history. Sumptuously illustrated with examples from across the globe, Postmodernism offers a fresh perspective on buildings of this period, sharing their richness, diversity, and brilliance, with an emphasis on what was interesting, beautiful and unique about the architecture which emerged from this unusually fertile moment in history.

Revisiting Postmodernism Terry Farrell, Adam Nathaniel Furman, 2019-06-28 Revisiting Postmodernism offers an engaging, wide-ranging and highly illustrated account of postmodernism in architecture from its roots in the 1940s to its ongoing relevance today. This book invites readers to see Postmodernism in a new light: not just a style but a cultural phenomenon that embraces all areas of life and thrives on complexity and pluralism, in contrast to the strait-laced, single-style, top-down inclination of its predecessor, Modernism. While focusing on architecture, this book also explores aspects such as urban masterplanning, furniture design, art and literature. Looking at Postmodernism through the lens of examples from around the world, each chapter explores the movement in the UK on the one hand, and its international counterparts on the other, reflecting on the historical movement but also how postmodernism influences practices today. This book offers the insider's view on postmodernism by the author, a recognised pioneer in the field of postmodern architecture and a prestigious and authoritative participant in the postmodern movement.
