Empirical Views on European Gambling Law and Addiction Simon Planzer,2014-02-19 This book analyses the voluminous and meandering case law on gambling of the Court of Justice from an empirical perspective. It offers a comprehensive overview of the legal situation of gambling services in the EU Single Market. Additionally, the book presents the current state of research on gambling addiction. It then seeks to answer the central research question as to what extent the views of the Court of Justice on gambling find support in empirical evidence. The Court of Justice granted exceptionally wide discretion to the Member States due to a so-called 'peculiar nature' of games of chance. With the margin of appreciation having played a key role, the book inquires whether the Court of Justice followed the principles and criteria that normally steer the use of this doctrine. Noting the Court's special approach, the book elaborates on its causes and consequences. Throughout the book, the approach of the Court of Justice is contrasted with that of its sister court, the EFTA Court. Finally, the potential role of the precautionary principle and of EU fundamental rights in the area of gambling law is examined. Situated at the intersection of law and science, this book seeks to bridge the legal and scientific perspectives and the unique vocabularies common to each. It illustrates the direct relevance of science and empirical research for court cases and policy making. And it contrasts science-informed policy making with the on-going morality discourse on gambling.

Principles of European Tort Law European Group on Tort Law,2009-09-02 The European Group on Tort Law presents the results of its extensive research project, the Principles of European Tort Law. They were drafted on the basis of several comparative studies on the most fundamental questions of tortious liability and the law of damages. The Principles are not a mere restatement of the common core of tort law in Europe, but rather a proposal for a comprehensive system of tortious liability for the future, though necessarily linked to existing regimes. They are meant to stimulate discussion both among academics and practitioners and could serve as guidelines for national legislatures, thereby fostering gradual harmonization. The text of the Principles, which is offered in English and several other languages, is accompanied by commentaries on the various parts elaborating their intended meaning and interplay.

Wallenstein's Tod / Death of Wallenstein Friedrich Schiller, Samuel Taylor Coleridge,1816 This is the third and final part of the Wallenstein trilogy by German playwright and mastermind Friedrich Schiller. The work as a whole produced a profound impression, and it is certainly Schiller's masterpiece in dramatic literature. He brings out with extraordinary vividness the ascendancy of Wallenstein over the wild troops whom he has gathered around him, and at the same time we are made to see how the mighty general's schemes must necessarily end in ruin, not merely because a plot against him is skilfully prepared by vigilant enemies, but because he himself is lulled into a sense of security by superstitious belief in his supposed destiny as revealed to him by the stars. Wallenstein is the most subtle and complex of Schiller's dramatic conceptions, and it taxes the powers of the greatest actors to present an adequate rendering of the motives which explain his strange and dark career. The love-story of Max Piccolomini and Thekla is in its own way not less impressive than the story of Wallenstein with which it is interwoven. This is the bilingual edition of this literary masterpiece including the English and German versions of the play.

A Heritage Of Holy Wood Barbara Baert,2004-01-01 This fascinating study reconstructs the tradition of the Legend of the True Cross in text and image, from its tentative beginnings in 4th-century Jerusalem to the culminating expression of its multi-layered cosmic content in 14th and 15th-century monumental cycles in Germany and Italy.

Greening Europe Anna-Katharina Wöbse,Patrick Kupper,2021-12-20 Today, the environment seems omnipresent in European policy within and beyond the European Union. The idea of a shared European environment, however, has come a long way and is still being contested. Greening Europe focuses on the many ways people have interacted with nature and made it an issue of European concern. The authors ask how notions of Europe mattered in these activities and they expose the many entanglements of activists across the subcontinent who set out to connect and network, and to exchange knowledge, worldviews, and strategies that exceeded their national horizons. Moving beyond human agency, the handbook also highlights the eminent role nature played in both greening Europe and making Europe a shared environment.

A Classified Bibliography of the History of Dutch Medicine 1900-1974 G.A. Lindeboom,2011-12-08 I. In some periods of the past Netherlands medicine has played a major role in the evolution of European medicine; today its history still enjoys much in interest even at the other side of the Ocean. In this bibliography it has been my endeavour to compile references for all that has been written on the history of Dutch medicine in our country and elsewhere in our age. The main concern of this work is with the medicine of the Northern Netherlands. However, before the end of the sixteenth century the Northern and Southern Netherlands were not yet divided into two separate countries; they were still politically one and for the greater part spoke the same Flemish language. So before their separation the present-day Belgium and Netherlands also had a common medical history. Therefore many entries have been included which bear on early (and sometimes later) Flemish

medicine, but it has not been the intention to strive for completeness in this respect.

A Byzantine Book on Dream Interpretation Maria V. Mavroudi,2021-10-25 This volume discusses the so-called Oneirocriticon of Achmet, the most important Byzantine work on dream interpretation which was written in Greek in the 10th century and has greatly influenced subsequent dreambooks in Byzantine Greek, Medieval Latin, and modern European languages. By comparing the Oneirocriticon with the 2nd-century A.D. dreambook of Artemidoros (translated into Arabic in the 9th century) and five medieval Arabic dreambooks, this study demonstrates that the Oneirocriticon is a Christian Greek adaptation of Islamic Arabic material and that the similarities between it and Artemidoros are due to the influence of Artemidoros on the Arabic sources of the Byzantine work. The Oneirocriticon's textual tradition, its language, the identities of its author and patron, and its position among other Byzantine translations from Arabic into Greek are also investigated.

International Law and Dispute Settlement Duncan French,Matthew Saul,Nigel D White,2010-03-04 International dispute settlement plays a fundamental role in maintaining the fabric of the international legal order, reflecting the desire of States, and increasingly non-State actors, to resolve their differences through international dispute procedures and other legal mechanisms. This edited collection focuses upon the growth and complexity of such legal methods, which includes judicial settlement (courts and tribunals), arbitration and other legal (or what might be termed 'extra-legal') means (international organisations, committees, inspection panels, and ombudsmen). In this important collection, such mechanisms are compared and evaluated side-by-side to provide, in one volume, a detailed and analytical account of the current framework. Ranging from key conceptual issues of proliferation of legal mechanisms and the associated risks of fragmentation through to innovations in dispute settlement mechanisms in many topical areas of international law, including international trade law, collective security law and regional law, this collection, written by leading international lawyers, provides a major study in the ongoing trends and emerging problems in this crucial area of international law. This edited collection is published to mark the retirement of Professor John Merrills, Emeritus Professor of International Law, University of Sheffield, who has written widely on international law and human rights law, but is probably best known for his work on the settlement of international disputes, evidenced by the enduring appeal of his leading text International Dispute Settlement, now in its fourth edition.
