**James Wise**

*Siam Mapped* Thongchai Winichakul,1997-06-30 This unusual and intriguing study of nationhood explores the 19th-century confrontation of ideas that transformed the kingdom of Siam into the modern conception of a nation. *Siam Mapped* challenges much that has been written on Thai history because it demonstrates convincingly that the physical and political definition of Thailand on which other works are based is anachronistic.

*Cambodge* Penny Edwards,2007-02-28 This strikingly original study of Cambodian nationalism brings to life eight turbulent decades of cultural change and sheds new light on the colonial ancestry of Pol Pot's murderous dystopia. Penny Edwards recreates the intellectual milieu and cultural traffic linking Europe and empire, interweaving analysis of key movements and ideas in the French Protectorate of Cambodia with contemporary developments in the Métropole. From the naturalist Henri Mouhot's expedition to Angkor in 1860 to the nationalist Son Ngoc Thanh's short-lived premiership in 1945, this history of ideas tracks the talented Cambodian and French men and women who shaped the contours of the modern Khmer nation. Their visions and ambitions played out within a shifting landscape of Angkorean temples, Parisian museums, Khmer printing presses, world's fairs, Buddhist monasteries, and Cambodian youth hostels. This is cross-cultural history at its best. With its fresh take on the dynamics of colonialism and nationalism, *Cambodge: The Cultivation of a Nation* will become essential reading for scholars of history, politics, and society in Southeast Asia. Edwards' nuanced analysis of Buddhism and her consideration of Angkor's emergence as a national monument will be of particular interest to students of Asian and European religion, museology, heritage studies, and art history. As a highly readable guide to Cambodia's recent past, it will also appeal to specialists in modern French history, cultural studies, and colonialism, as well as readers with a general interest in Cambodia.

*Imperial Hygiene* A. Bashford,2014-01-01 This is a cultural history of borders, hygiene and race. It is about foreign bodies, from Victorian Vaccines to the pathologized interwar immigrant, from smallpox quarantine to the leper colony, from sexual hygiene to national hygiene to imperial hygiene. Taking British colonialism and White Australia as case studies, the book examines public health as spatialized biopolitical governance between 1850 and 1950. Colonial management of race dovetailed with public health into new boundaries of rule, into racialised cordons sanitaires .

**Thailand: History, Politics and the Rule of Law (2nd Edition)** James Wise, 2024-02-01 Thailand's 2023 election results energised some Thais and traumatised others. Voters and analysts alike were astonished that a youthful party aiming to transform the country won the most seats, though not a majority. The Move Forward party wanted to de-militarise society and politics, de-centralise government administration, de-monopolise the economy, and curb the ideological, political, and financial power of the monarchy. For decades, Thai politics had revolved around two big questions: Do you support the charismatic Thaksin Shinawatra and his populist Pheu Thai party? Do you support military supervision of politics? Thaksin and the military—once enemies—now had a common foe. Relying on military-appointed senators, they formed a coalition government that pushed Move Forward into the parliamentary opposition. Move Forward's challenge is to broaden support for its progressive agenda before the next election. That's a scary prospect for Thaksin and the military because, according to the current constitution, next time they won't be able to rely on unelected senators to rescue them. The revised edition of this book describes the historical context of these momentous events and trends and shares insights into the social and cultural undercurrents that shape Thai politics. Informed by the latest research, it is an accessible introduction for the general reader, while also offering much to those who want to know more about Thailand's political dynamics.

**Human Rights in Asia** Thomas W. D. Davis, 2011 This book presents the work of a dozen scholars from Asia and Australasia and draws upon their knowledge of particular countries or aspects of the politics of rights that help in understanding rights in Asia. Most of the contributors participated in an international symposium held at the University of Melbourne in late 2009, with several who could not attend also contributing papers.-- P. xiii.

**Traces of Trauma** Boreth Ly, 2020 How do the people of a morally shattered culture and nation find ways to go on living? Cambodians confronted this challenge following the collective disasters of the American bombing, the civil war, and the Khmer Rouge genocide. The magnitude of violence and human loss, the execution of artists and intellectuals, the erasure of individual and institutional cultural memory all caused great damage to Cambodian arts, culture, and society. Author Boreth Ly explores the traces of this haunting past in order to understand how Cambodians at home and in the diasporas deal with trauma on such a vast scale. Ly maintains that the production of visual culture by contemporary Cambodian artists and writers--photographers, filmmakers, court dancers, and poets--embodies traces of trauma, scars leaving an indelible mark on the body and the psyche. Her book considers artists of different generations and family experiences: a Cambodian-American woman whose father sent her as a baby to the United States to be adopted; the Cambodian-French filmmaker, Rithy Panh, himself a survivor of the Khmer Rouge, whose film *The Missing Picture* was nominated for an Oscar in 2014; a young Cambodian artist born in 1988--part of the post-memory generation. The works discussed include a variety of materials and remnants from the historical past: the broken pieces of a shattered clay pot, the scarred landscape of bomb craters, the traditional symbolism of the checkered scarf called krama, as well as the absence of a visual archive. Boreth Ly's poignant

book explores obdurate traces that are fragmented and partial, like the acts of remembering and forgetting. Her interdisciplinary approach, combining art history, visual studies, psychoanalysis, cultural studies, religion, and philosophy, is particularly attuned to the diverse body of material discussed, including photographs, video installations, performance art, poetry, and mixed media. By analyzing these works through the lens of trauma, she shows how expressions of a national trauma can contribute to healing and the reclamation of national identity.

**On The Borders of State Power** Martin Gainsborough, 2008-10-31 Covering the main themes of globalization, state power and culture from the fifteenth to the twenty-first century, this book explores the changing nature, meaning and significance of the Greater Mekong Sub-region.

Bangkok Utopia Lawrence Chua, 2021-02-28 "Utopia" is a word not often associated with the city of Bangkok, which is better known for its disorderly sprawl, overburdened roads, and stifling levels of pollution. Yet as early as 1782, when the city was officially founded on the banks of the Chao Phraya river as the home of the Chakri dynasty, its orientation was based on material and rhetorical considerations that alluded to ideal times and spaces. The construction of palaces, monastic complexes, walls, forts, and canals created a defensive network while symbolically locating the terrestrial realm of the king within the Theravada Buddhist cosmos. Into the twentieth century, pictorial, narrative, and built representations of utopia were critical to Bangkok's transformation into a national capital and commercial entrepôt. But as older representations of the universe encountered modern architecture, building technologies, and urban planning, new images of an ideal society attempted to reconcile urban-based understandings of Buddhist liberation and felicitous states like nirvana with worldly models of political community like the nation-state. *Bangkok Utopia* outlines an alternative genealogy of both utopia and modernism in a part of the world that has often been overlooked by researchers of both. It examines representations of utopia that developed in the city—as expressed in built forms as well as architectural drawings, building manuals, novels, poetry, and ecclesiastical murals—from its first general strike of migrant laborers in 1910 to the overthrow of the military dictatorship in 1973. Using Thai- and Chinese-language archival sources, the book demonstrates how the new spaces of the city became arenas for modern subject formation, utopian desires, political hegemony, and social unrest, arguing that the

modern city was a space of antinomy—one able not only to sustain heterogeneous temporalities, but also to support conflicting world views within the urban landscape. By underscoring the paradoxical character of utopias and their formal narrative expressions of both hope and hegemony, Bangkok Utopia provides an innovative way to conceptualize the uneven economic development and fractured political conditions of contemporary global cities.

The Colonial Bastille Peter Zinoman,2001-03-04 Zinoman makes original contributions on multiple fronts, including colonial systems; prisons as social institutions; political life in prison; public campaigns concerning prisons; and released prisoners in action. He also takes us beyond the colonial/anticolonial, nationalist/communist, and war/peace dichotomies that have long dominated Vietnam studies.—David Marr, author of *Vietnamese Tradition on Trial, 1920-1945* This is a wonderful, lucidly argued, and meticulously documented book.—Ann Stoler, author of *Race and the Education of Desire: Foucault's History of Sexuality and the Colonial Order of Things*

**Hotel and Hospitality English** Mike Seymour,2012 24 compact units cover a wide range of practical scenarios, such as meeting and greeting guests, taking orders at breakfast and at the bar, handling guest complaints and dealing with guest requests. 4-page unit includes an easy-to-follow photo story that deals with the topic of the unit and introduces key functional language.

Empire, Global Coloniality and African Subjectivity Sabelo J. Ndlovu-Gatsheni,2013-06-01 Global imperial designs, which have been in place since conquest by western powers, did not suddenly evaporate after decolonization. Global coloniality as a leitmotif of the empire became the order of the day, with its invisible technologies of subjugation continuing to reproduce Africa's subaltern position, a position characterized by perceived deficits ranging from a lack of civilization, a lack of writing and a lack of history to a lack of development, a lack of human rights and a lack of democracy. The author's sharply critical perspective reveals how this epistemology of alterity has kept Africa ensnared within colonial matrices of power, serving to justify external interventions in African affairs, including the interference with liberation struggles and disregard for African positions. Evaluating the quality of African responses and available options, the author opens up a new horizon that includes cognitive justice and new humanism.

Siam Mapped Thongchai Winichakul,2021-05-25 This unusual and intriguing study of nationhood explores the 19th-century confrontation of ideas that transformed the kingdom of Siam into the modern conception of a nation. *Siam Mapped* challenges much that has been written on Thai history because it demonstrates convincingly that the physical and political definition of Thailand on which other works are based is anachronistic.

**A History of Thailand** Christopher John Baker,Pasuk Phongpaichit,2014-05-30 *A History of Thailand* offers a lively and accessible account of Thailand's political, economic, social and cultural history. This book explores how a world of mandarin nobles and unfree peasants was transformed and examines how the monarchy managed the foundation of a new nation-state

at the turn of the twentieth century. The authors capture the clashes between various groups in their attempts to take control of the nation-state in the twentieth century. They track Thailand's economic changes through an economic boom, globalisation and the evolution of mass society. This edition sheds light on Thailand's recent political, social and economic developments, covering the coup of 2006, the violent street politics of May 2010, and the landmark election of 2011 and its aftermath. It shows how in Thailand today, the monarchy, the military, business and new mass movements are players in a complex conflict over the nature and future of the country's democracy.

**The Sciences in Enlightened Europe** William Clark, Jan Golinski, Simon Schaffer, 1999-07 Radically reorienting our understanding of the Enlightenment, this book explores the complex relations between enlightened values and the making of scientific knowledge. Here monsters and automata, barometers and botanical gardens, polite academics and boisterous clubs, plans for violent wars and for universal peace, are all relocated in the landscape of enlightened Europe. The contributors show how changing forms of discipline, machinery, and instrumentation affected the emergence of new kinds of knowledge; consider how institutions of public taste and conversation helped provide a common frame for the study of human and nonhuman natures; and explore the regional operations of scientific culture at the geographical fringes of Europe. Covering a wide range of scientific disciplines, both in the principal European countries and in areas peripheral to Europe, the book also includes ample illustrations and an extensive bibliography. Implicated in the rise of both fascism and liberal secularism, the moral and political values that shaped the Enlightenment remain controversial today. Through careful scrutiny of how these values influenced and were influenced by the concrete practices of its sciences, this book gives us an entirely new sense of the Enlightenment. -- from back cover.

*Going Indochinese* Christopher E. Goscha, 2012 Why, Benedict Anderson once asked, did Javanese become Indonesian in 1945 whereas the Vietnamese balked at becoming Indochinese? In this classic study, Goscha shows that Vietnamese of all political colours came remarkably close to building a modern national identity based on the colonial model of Indochina while Lao and Cambodian nationalists rejected this precisely because it represented a Vietnamese entity. Specialists of French colonial, Vietnamese, Southeast Asia and nationalism studies will all find much of value in Goscha's provocative rethinking of the relationship between colonialism and nationalism in Indochina. First published in 1995, a revised edition of this remarkable study is now issued, augmented with new material by the author and a foreword by Eric Jennings.

**Engineers of Happy Land** Rudolf Mrázek, 2018-06-05 Based on close reading of historical documents--poetry as much as statistics--and focused on the conceptualization of technology, this book is an unconventional evocation of late colonial Netherlands East Indies (today Indonesia). In considering technology and the ways that people use and think about things, Rudolf Mrázek invents an original way to talk about freedom, colonialism, nationalism, literature, revolution, and human nature. The central chapters comprise vignettes and take up, in turn, transportation (from shoes to road-building to

motorcycle clubs), architecture (from prison construction to home air-conditioning), optical technologies (from photography to fingerprinting), clothing and fashion, and the introduction of radio and radio stations. The text clusters around a group of fascinating recurring characters representing colonialism, nationalism, and the awkward, inevitable presence of the European cultural, intellectual, and political avant-garde: Tillema, the pharmacist-author of *Kromoblanda*; the explorer/engineer IJzerman; the Javanese princess Kartina; the Indonesia nationalist journalist Mas Marco; the Dutch novelist Couperus; the Indonesian novelist Pramoedya Ananta Toer; and Dutch left-wing liberal Wim Wertheim and his wife. In colonial Indies, as elsewhere, people employed what Proust called remembering and what Heidegger called thinging to sense and make sense of the world. In using this observation to approach Indonesian society, Mrázek captures that society off balance, allowing us to see it in unfamiliar positions. The result is a singular work with surprises for readers throughout the social sciences, not least those interested in Southeast Asia or colonialism more broadly.

**Lords of Things** Maurizio Peleggi, 2002-07-31 *Lords of Things* offers a fascinating interpretation of modernity in late nineteenth and early twentieth century Siam by focusing on the novel material possessions and social practices adopted by the royal elite to refashion its self and public image in the early stages of globalization. It examines the westernized modes of consumption and self-presentation, the residential and representational architecture, and the public spectacles appropriated by the Bangkok court not as byproducts of institutional reformation initiated by modernizing sovereigns, but as practices and objects constitutive of the very identity of the royalty as a civilized and civilizing class. Bringing a wealth of new source material into a theoretically informed discussion, *Lords of Things* will be required reading for historians of Thailand and Southeast Asia scholars generally. It represents a welcome change from previous studies of Siamese modernization that are almost exclusively concerned with the institutional and economic dimensions of the process or with foreign relations, and will appeal greatly to those interested in transnational cultural flows, the culture of colonialism, the invention of tradition, and the relationship between consumption and identity formation in the modern era.

*The Borderlands of Southeast Asia* James Clad, Sean M. McDonald, Bruce Vaughn, 2011 As an academic field in its own right, the topic of border studies is experiencing a revival in university geography courses as well as in wider political commentary. Until recently, border studies in contemporary Southeast Asia appeared as an afterthought at best to the politics of interstate rivalry and national consolidation. The maps set out all agreed postcolonial lines. Meanwhile, the physical demarcation of these boundaries lagged. Large slices of territory, on land and at sea, eluded definition or delineation. That comforting ambiguity has disappeared. Both evolving technologies and price levels enable rapid resource extraction in places, and in volumes, once scarcely imaginable. The beginning of the 21st century's second decade is witnessing an intensifying diplomacy, both state-to-state and commercial, over offshore petroleum. In particular, the South China Sea has moved from being a rather arcane area of conflict studies to the status of a bellwether issue. Along with other

contested areas in the western Pacific and south Asia, the problem increasingly defines China's regional relationships in Asia, and with powers outside the region, especially the United States. Yet intraregional territorial differences also hobble multilateral diplomacy to counter Chinese claims, and daily management of borders remains burdened by a lot of retrospective baggage. The contributors to this book emphasize this mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics. Whether the region's 11 states want it or not, their bordered identity is falling into ever sharper definition, if only because of pressure from extraregional states. This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia.
