Masters Theses in the Pure and Applied Sciences Wade H. Shafer,2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) * at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 29 (thesis year 1984) a total of 12,637 theses titles from 23 Canadian and 202 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 29 reports theses submitted in 1984, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Proceedings of the 5th International Conference on Research in Management and Technovation Nga Thi Hong Nguyen, José António C. Santos, Vijender Kumar Solanki, Anh Ngoc Mai, 2025-01-31 This book, bringing together selected papers from the 5th International Conference on Research in Management and Technovation, explores the global impact of technology, corporate management, and innovation. In a time of fast growth and widespread tech use, the relationship between business and technology has transformed at a rapid pace. From computers and automation to dealing with the effects of COVID-19, it highlights the need for forward-thinking leaders. Both new and established companies now prioritize blending business and technology in their plans, stressing the importance of creative strategies. The conference promotes an interdisciplinary approach, looking at how these areas connect instead of keeping them separate. Beyond common tech practices like virtual meetings, the book shows how business and technology affect decision-making in uncertain situations. The research shared in this book focuses on making practical plans for progress using innovations and technology, seeing them as crucial tools for society and organizations. Technology is portrayed as a helpful tool, allowing managers, strategists, and researchers to make smart decisions that demonstrate the strength of business and technology in a constantly changing global landscape.
