**Goethe's Faust and the Divan of Ḥāfīz** Hiwa Michaeli, 2019-10-21 This book explores the poetic articulations of a shift from a transcendent to an immanent worldview, as reflected in the manner of evaluation of body and soul in Goethe's Faust and Ḥāfīz' Divan. Focusing on two lifeworks that illustrate their authors' respective intellectual histories, this cross-genre study goes beyond the textual confines of the two poets' Divans to compare important building blocks of their intellectual worlds.

*Autonomous Driving* Markus Maurer,J Christian Gerdes,Barbara Lenz,2020-10-08 This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies?Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatmentof the emerging field of autonomous driving. *Hito Steyerl: I Will Survive* Hito Steyerl,2021-05-04 A massive, long-overdue retrospective on the multimedia image

critique of Hito Steyerl, influential artist and author of *Duty-Free Art* and *The Wretched of the Screen*. Over the past 30 years, through video and installation, the immensely influential German artist and writer Hito Steyerl (born 1966) has been tracking the ways that images have mutated--from the analogue image and its manifold possibilities for montage to the fluidity of the split digital image--and the implications these mutations have had for the representation of wars, genocides and the flow of capital. We are no longer dealing with the virtual but with a confusing and possibly alien concreteness that we are only beginning to understand, writes Brian Kuan Wood of the digital visual worlds that the artist presents. At nearly 500 pages, this book--the first substantial overview on Steyerl--looks at multimedia installations and film projects of the past ten years, as well as earlier works, all of which are united by the artist's unflagging interrogation of the politics of the image.

**AutoCAD 2022 3D-Konstruktionen** Hans-J. Engelke, 2021-08-27 Hans-J. Engelke AutoDesk AutoCAD 2022 3D-Konstruktion 3D-CAD oder dreidimensionale computergestützte Konstruktion ist eine Technologie für Konstruktion und Entwicklung, bei der das manuelle Zeichnen durch einen automatisierten Prozess ersetzt wird. Dabei werden Objekte dreidimensional aufgebaut. Bei der 3D-Modellierung mit AutoCAD werden geometrische Objekte in dreidimensionaler Form aufgebaut und gespeichert. Dadurch erlauben diese einerseits eine realitätsnahe Darstellung und bessere räumliche Vorstellung des Körpers, andererseits lassen sich durch die dreidimensionalen Darstellungen wie Schnitt- und Ansichtsdarstellungen, technische Zeichnungen automatisieren. Anhand der 3D-Volumenmodelle kann sehr schnell die Draufsicht, Seitenansicht, Schnittdarstellung und Details generiert werden. Auch isometrische Ansichten sind einfach zu erstellen. Ein weiterer Vorteil hierdurch ist die automatische Aktualisierung der Ansichten im Falle einer Änderung am Volumenmodell. Die Zeichnungen müssen also nachträglich nicht von Hand geändert werden. Die AutoCAD-Volumenmodelle können in der Fertigung zur Programmierung verwendet werden. Mit den generierten CAD Daten können CNC-Programme, 3D-Druck oder Virtual Reality gesteuert werden. Im ersten Kapitel wird die geschichtliche Entwicklung der Technik von mir beleuchtet, denn es war schon immer mein Ansatz, dass ohne das Wissen um die Geschichte, keine Entwicklung in die Zukunft geben kann, außerdem nimmt dieser Einstieg die starre Struktur eines reinen Lernbuches. Für interessierte Käufer dieses Buches biete ich die Möglichkeit, eine DVD mit der farbigen PDF-Ausgabe dieses Buches, inklusive der Supportkapitel, allen erstellten Bauteildaten in 7 Kapiteln und den 5 Supportkapitel, gegen Vorlage der Kaufbestätigung, beim Autor zu bestellen, hierzu sehen Sie bitte das Kapitel 8 an. Leserkreis: Absolventen an Meister-, Techniker- und Fachhochschulen. Im CAD-Umfeld für Lehrer im beruflichen Einsatz, der Weiterbildung und Umschulung, Auszubildende wie Technische Produktdesigner und Industriemechaniker, Berufsschullehrer und CAD-Dozenten und für die Berufs- und Studienorientierung Jahrgangstufen 8 bis 10.

**TransArea** Ottmar Ette,2016-07-11 Ottmar Ette's *TransArea* proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the *Academia Europaea* (since 2010).

**Hafiz and the Religion of Love in Classical Persian Poetry** Leonard Lewisohn,2010-06-02 The romantic lyricism of the great Persian poet Hafiz (1315-1390) continues to be admired around the world. Recent exploration of that lyricism by Iranian scholars has revealed that, in addition to his masterful use of poetic devices, Hafiz's verse is deeply steeped in the philosophy and symbolism of Persian love mysticism. This innovative volume discusses the aesthetic theories and mystical philosophy of the classical Persian love-lyric (ghazal) as particularly exemplified by Hafiz (who, along with Rumi and Sa'di, is Persia's most celebrated poet). For the first time in western literature, Hafiz's rhetoric of romance is situated within the broader context of what scholars refer to as 'Love Theory' in Arabic and Persian poetry in particular and Islamic literature more generally. Contributors from both the West and Iran conduct a major investigation of the love lyrics of Hafiz and of what they signified to that high culture and civilization which was devoted to the School of Love in medieval Persia. The volume will have strong appeal to scholars of the Middle East, medieval Islamic literature, and the history and culture of Iran.
