Illustration and Heritage Rachel Emily Taylor,2024-02-08 Illustration and Heritage explores the re-materialisation of absent, lost, and invisible stories through illustrative practice and examines the potential role of contemporary illustration in cultural heritage. Heritage is a 'process' that is active and takes place in the present. In the heritage industry, there are opposing discourses and positions, and illustrators are a critical voice within the field. Grounding discussions in concepts fundamental to the illustrator, the book examines how the historical voice might be 'found' or reconstructed. Rachel Emily Taylor uses her own work and other illustrators' projects as case studies to explore how the making of creative work - through the exploration of archival material and experimental fieldwork - is an important investigative process and engagement strategy when working with heritage. What are the similar functions of heritage and illustration? How can an illustrator 'give voice' to a historical person? How can an illustrator disrupt an archive or museum? How can an illustrator represent a historical landscape or site? This book is a contribution to the expanding field of illustration research that focusses on its position in heritage practice. Taylor examines the illustrator's role within the field, while positioning it alongside the disciplines of museology, anthropology, archaeology, performance, and fine art.

1001 Illustrations That Connect Craig Brian Larson,Phyllis Ten Elshof,2009-01-06 Every preacher, teacher, or writer knows the value of a good illustration in helping connect the truth of the passage with the congregation or class—and how hard it is to come up with good illustrations week after week. This book contains the cream of the crop: 1001 illustrations carefully selected from among thousands on Christianity Today International's popular website PreachingToday.com. These illustrations are proven, memorable, and illuminating. As the saying goes, they will preach! And they're fresh, all written within the past seven years. Of course the best illustrations are no good if you can't find the right one. These illustrations

have been arranged according to twelve master topics, each divided into several subtopics. Further, they've been indexed according both to Bible references and to 500 keywords. A searchable CD-ROM is included, allowing you to get the illustration into your lesson or sermon with ease.

Principles of Biology Lisa Bartee, Walter Shiner, Catherine Creech, 2017 The Principles of Biology sequence (BI 211, 212 and 213) introduces biology as a scientific discipline for students planning to major in biology and other science disciplines. Laboratories and classroom activities introduce techniques used to study biological processes and provide opportunities for students to develop their ability to conduct research.

Professional Publications of an Ol' Psychology Professor Mark W. Durm, Ph.D., 2024-05-20 This book is not like most books. Whereas, most books will quote research to prove or disprove a point, this book offers you the actual research. In the peer-reviewed section, you have the actual research study that asks, "Is the Belief in a Just World Rational?"; a study about the relationship between "Children of Divorce and its Effect on their Self Esteem"; one about "Relation of Self-acceptance and Acceptance of Others"; another about the moon "Lunar Phase and Acting Out Behavior," and many more. In another section named "Book Appendices," there are two actual studies that answer the question "Psychics! Do Police Departments Really Use Them?" In the "Book Review" section are published critiques on books entitled: "The Drunkard's Walk: How Randomness Rules our Lives" by Leonard Mlodinow; "Crimes Against Logic: Exposing the Bogus Arguments of Politicians, Priests, Journalists, and other Serial Offenders" by Jamie Whyte; C. John Sommerville's "How the News Makes us

Dumb: The Death of Wisdom in an Information Society". Ennis C. Almer's "Statistical Tricks and Traps: An Illustrated Guide to the Misuses of Statistics"; "The Myth of Repressed Memory" by Elizabeth Loftus and Katherine Ketcham; Marilyn Vos Savant's and Leonore Fleischer's "Brain Building; Exercising Yourself Smarter"; and many more. In the section entitled "Non- Peer Reviewed Journal Articles" there is one entitled, "The Four R's of a College Education: A Rubber Band, A Rubber Ball, A Razor, and The Pearson R;" One of the Durm family; one on the size of schools entitled "Is Bigger Better"; and others. Finally in the "Magazine Publications Section" there are four publications on the debunking of ghosts and one concerning the military, "Testing Tomorrow's Tacticians: A Survey of the States's Military Academies." About the Author Mark W. Durm, Ph.D. is a Professor Emeritus of Athens State University in Athens, Alabama where he taught 38 years of his 47 years in higher education. His primary areas of instruction were critical thinking, statistics and physiological psychology. Dr. Durm has over 50 professional publications and has authored approximately 100 newspaper columns. His research has been quoted in books, peer-reviewed journals, magazines and national newspapers such as the New York Times and the Washington Post. He has been interviewed by different television stations in the Alabama area and his research (co-authored by Jane Sweat) concerning the use of psychics by police departments was the centerpiece of a documentary on Japanese television. Furthermore, he has received requests for copies of his research from over 15 foreign countries and many universities in the United States. Dr. Durm served in the Tennessee Army National Guard primarily at the Tennessee Military Academy and the 300th Mobile Army Surgical Hospital. He is a veteran of Desert Storm. Mark now heads his own company that invests in real estate in Alabama and other states. He resides on his farm in Athens and continues to research and write. Mark is the father of three children who are the joys of his life: Spencer, Sydni, and Sophia.

Time Series Modelling of Water Resources and Environmental Systems K.W. Hipel,A.I McLeod,1994-04-07 This is a comprehensive presentation of the theory and practice of time series modelling of environmental systems. A variety of time series models are explained and illustrated, including ARMA (autoregressive-moving average), nonstationary, long memory, three families of seasonal, multiple input-single output, intervention and multivariate ARMA models. Other topics in environmetrics covered in this book include time series analysis in decision making, estimating missing observations, simulation, the Hurst phenomenon, forecasting experiments and causality. Professionals working in fields overlapping with environmetrics - such as water resources engineers, environmental scientists, hydrologists, geophysicists, geographers, earth scientists and planners - will find this book a valuable resource. Equally, environmetrics, systems scientists, economists, mechanical engineers, chemical engineers, and management scientists will find the time series methods presented in this book useful.
