Jonathan E. Hillman

Mapping China's 'one Belt One Road' Initiative Li Xing, 2019-09-12 This book sets out to analyze how the OBOR initiative will influence the world's geo-political and geo-economic environment, with specific regard to the 'Belt and Road' countries and regions. It evaluates what opportunities the OBOR can offer them in light of the constraints they face, paying particular attention to how security issues may keep some nations from fully participating. Questions are also asked about the tension and conflict along the 'Belt' and 'Road', which, after all takes in the Middle East's most tumultuous regions, as well as the much disputed South China Sea. Finally, consideration is given as to how the world's other economic powers will react when the OBOR inevitably brings about capital and resource competitions.

The Digital Silk Road Jonathan E. Hillman, 2021-10-14 'One of the most interesting and original thinkers about the rise of China' - Peter Frankopan A Foreign Affairs Best Book of 2022 A Guardian Best Paperback of July 2022 Its vast infrastructure projects now extend from the ocean floor to outer space, and from Africa's megacities into rural America. China is wiring the world, and, in doing so, rewriting the global order. As things stand, the rest of the world still has a choice. But the battle for tomorrow will require America and its allies to take daring risks in uncertain political terrain. Unchecked, China will reshape global flows of data to reflect its own interests - and the lives of countless individuals enmeshed in its systems. Taking readers on a global tour of these emerging battlefields, Jonathan E. Hillman reveals what China's digital footprint looks like on the ground, and explores the dangers of a world in which all routers lead to Beijing.

China's Belt and Road Jennifer Hillman, David Sacks, 2021-03-23 China's massive, globe-spanning Belt and Road Initiative (BRI) seeks to build everything from railways, ports, and power plants to telecommunications infrastructure and fiber-optic cables. Chinese President Xi Jinping's signature foreign policy endeavor, BRI has the potential to meet developing countries' needs and spur economic growth, but its implementation creates risks that outweigh its benefits. Unless the United States offers an effective alternative, China could reorient global trade networks, set technical standards that would disadvantage non-Chinese companies, lock countries into carbon-intensive power generation, increase its political influence over countries, and acquire power projection capabilities for its military. The COVID-19 pandemic has made a U.S. response more urgent as the global economic contraction has accelerated the reckoning with BRI-related debt. China's Belt and Road: Implications for the United States proposes that the United States respond to BRI by putting forward an affirmative agenda

of its own, drawing on its strengths and coordinating with allies and partners to promote sustainable, secure, and green development.

China's Belt and Road Initiative Wenxian Zhang, Ilan Alon, Christoph Lattemann, 2018-05-24 Since the introduction of the One Belt, One Road initiative (OBOR), first proposed in late 2013, international scholars have begun to study this new policy and its implications in the global age. While OBOR provides new opportunities for China in terms of regional cooperation and global development, many also raise concerns about China's intentions of using economic means to achieve strategic and foreign policy objectives. Hailing from the West and the East, the authors reflect on the wide-ranging impacts of OBOR on specific countries, regions, economic policies, and geopolitical considerations. Including both theoretical research and empirical studies that explore opportunities and challenges related to OBOR, this edited volume will allow readers to gain a more comprehensive understanding of this ambitious undertaking and its long-term impact on the rest of the world.

The Belt & Road Initiative in the Global Arena Yu Cheng, Lilei Song, Lihe Huang, 2017-11-29 This book is among the first to systematically analyze and discuss the Chinese government's "One Belt, One Road" initiative to promote infrastructure investment and economic development, bringing together a diverse range of scholars from China, Russia, and Eastern Europe. The book assembles a package of next generation ideas for the patterns of regional trade, investment, infrastructure development, or next steps for the promotion of enhanced policy coordination across the Eurasian continent and strategic implications for EU, Russia and other major powers, introducing innovative ideas about what these countries across belt and road can do together in the eyes of the young generation. This book will be of interest to scholars, economists, and interested observers of the international impact of Chinese development.

Belt and Road Bruno Macaes, 2019-01-28 China's Belt and Road strategy is acknowledged to be the most ambitious geopolitical initiative of the age. Covering almost seventy countries by land and sea, it will affect every element of global society from shipping to agriculture, digital economy to tourism and politics to culture. Most importantly, it symbolizes a new phase in China's ambitions as a superpower: to remake the world economy and crown Beijing as the new centre of capitalism and globalization. Bruno Macaes traces this extraordinary initiative's history, highlighting its achievements to date and its

staggering complexity. He asks whether Belt and Road is about more than power projection and profit. Will it herald a new set of universal political values, to rival those of the West? Is it, in fact, the story of the century?

Geocultural Power Tim Winter,2019-09-30 Launched in 2013, China's Belt and Road Initiative is forging connections in infrastructure, trade, energy, finance, tourism, and culture across Eurasia and Africa. This extraordinarily ambitious strategy places China at the center of a geography of overland and maritime connectivity stretching across more than sixty countries and incorporating almost two-thirds of the world's population. But what does it mean to revive the Silk Roads for the twenty-first century? *Geocultural Power* explores this question by considering how China is couching its strategy for building trade, foreign relations, and energy and political security in an evocative topography of history. Until now Belt and Road has been discussed as a geopolitical and geoeconomic project. This book introduces geocultural power to the analysis of international affairs. Tim Winter highlights how many countries—including Iran, Sri Lanka, Kenya, Malaysia, Indonesia, Pakistan, and others—are revisiting their histories to find points of diplomatic and cultural connection. Through the revived Silk Roads, China becomes the new author of Eurasian history and the architect of the bridge between East and West. In a diplomatic dance of forgetting, episodes of violence, invasion, and bloodshed are left behind for a language of history and heritage that crosses borders in ways that further the trade ambitions of an increasingly networked China-driven economy.

Global Perspectives on China's Belt Rohb SCHNEIDER,2021-01-27 2013 saw the launch of the largest, most influential investment initiative in recent memory: China's Belt and Road Initiative (BRI). This globe-spanning strategy has reshaped local economies and regionals networks, and it has become a contested subject for scholars and practitioners alike. How should we make sense of the complex interactions that the BRI has enabled? Understanding these processes requires truly global perspectives alongside careful attention to the role that local actors play in giving shape to individual BRI projects. The contributions in this volume provide both 'big picture' assessments of China's role in regional and global interactions and detailed case studies that home in on the role agency plays in BRI dynamics. Written by leading area studies scholars with diverse disciplinary expertise, this book reveals how Chinese efforts to recalibrate the world are taken up, challenged, revamped, and reworked in diverse contexts around the world.

China's Eurasian Century? Nadège Rolland,2017 China's Belt and Road Initiative has become the organizing foreign policy concept of the Xi Jinping era. The 21st-century version of the Silk Road will take shape around a vast network of transportation, energy, and telecommunication infrastructure linking Europe and Africa to Asia. Drawing from the work of Chinese official and analytic communities, *China's Eurasian Century? Political and Strategic Implications of the Belt and Road Initiative* examines the concept's origins, drivers, and various component parts, as well as China's domestic and international objectives. Nadège Rolland shows how the Belt and Road Initiative reflects Beijing's desire to shape Eurasia according to its own worldview and unique characteristics. More than a list of revamped infrastructure projects, the initiative

is a grand strategy that serves China's vision for itself as the preponderant power in Eurasia and a global power second to none.

China's Belt and Road: A Game Changer? Alessia Amighini (a cura di), 2017-07-11 Officially announced by Xi Jinping in 2013, the Belt and Road Initiative (BRI) has since become the centrepiece of China's economic diplomacy. It is a commitment to ease bottlenecks to Eurasian trade by improving and building networks of connectivity across Central and Western Asia, where the BRI aims to act as a bond for the projects of regional cooperation and integration already in progress in Southern Asia. But it also reaches out to the Middle East as well as East and North Africa, a truly strategic area where the Belt joins the Road. Europe, the end-point of the New Silk Roads, both by land and by sea, is the ultimate geographic destination and political partner in the BRI. This report provides an in-depth analysis of the BRI, its logic, rationale and implications for international economic and political relations.

Transportation and the Belt and Road Initiative Nicolas de Loisy, 2019-06-15 We offer 2 editions of this book: a color edition and a black & white edition (B&W). The color edition is much better to appreciate the maps, graphs and photos included in this book, while the B&W edition is cheaper. We do not offer a Kindle edition because our maps, graphs and tables are not supported by Kindle. For digital versions of the book that support our maps and tables, please go to SCMO website. Abstract The Belt and Road Initiative (BRI) has received considerable critical attention from the infrastructure, political and media worlds. Most reports and articles on the subject are confused at best, when they are not completely misinformed or contradictory. To date there has been little agreement on the number of BRI projects, amounts spent, dates, and geographical distribution. A global information warfare campaign of mis-information, disinformation, and intoxication is currently at play about the BRI, which direct result is to confuse the situation even more... This book critically examines what China's BRI is about, clarifies the confusion, and answers many questions. It includes a first-time-ever-published list and statistical tables of all the BRI projects up to December 31st, 2018. A mixed-methods approach was used in the data analysis, and the theory of constraints underpins this research as a theoretical framework. BRI projects are classified by projects' name, date, status, value, country, region, industry, and transportation mode. Additional never-published-before tables describe seven transportation modes. These tables are instrumental to our understanding of the BRI and are unpacked and analyzed in great detail in one section of this book. This work also demonstrates how instrumental the BRI is to globalization, which in itself is conducive to humanity's evolution. It describes humanity's five key choke points, and apprehends how China and the BRI are addressing them. In conclusion, we share an interview with a special Chinese lady, who benefits from a long China history's oversight. She shows us the Chinese perception of China and of the world. She tells us what China's point of view and ambitions are, especially as far as the BRI is concerned. Praise for Transportation and the Belt and Road Initiative It is an excellent, comprehensive and detailed treatment of the Belt and Road Initiative. This book is far more useful than

almost anything written on the topic. - Parag Khanna, Author of Connectography, New York, USA This exhaustive study belongs within arm's reach on the desk and/ or nearby reference material shelf of any person or company involved in any manner, shape or form in the arena of moving stuff. - Joel Laykin, Secretary General of the IPPF, Hong Kong, China I trust this book would provide a good road map for policy makers and infrastructure developers in any developing countries amidst complex geo-political circumstances. - Dr. D. J. Pandian, Vice President and Chief Investment Officer, AIIB - Asian Infrastructure Investment Bank, Beijing, China Readership This book is aimed at practitioners, scholars, and experts in: policy making, government administration, infrastructure development, BRI, civil engineering, logistics, transportation, supply chain management, sustainability, warfare, defense, military, intelligence, security, risk mitigation, law, energy, electric grid, pipeline, sea-freight, air-freight, road transportation, rail transportation, digital world, internet, geostrategy, globalization, geopolitics, political science, business, economics, developing nations, social science, tipping points, ecosystem, water, collapse, society cycles, South China Sea, expansionism, and many more.

Critical Landscape Planning during the Belt and Road Initiative Ashley Scott Kelly, Xiaoxuan Lu, 2021-09-29 This open access book traces the development of landscapes along the 414-kilometer China–Laos Railway, one of the first infrastructure projects implemented under China’s Belt and Road Initiative (BRI) and which is due for completion at the end of 2021. Written from the perspective of landscape architecture and intended for planners and related professionals engaged in the development and conservation of these landscapes, this book provides history, planning pedagogy and interdisciplinary framing for working alongside the often-opaque planning, design and implementation processes of large-scale infrastructure. It complicates simplistic notions of development and urbanization frequently reproduced in the Laos–China frontier region. Many of the projects and sites investigated in this book are recent “firsts” in Laos: Laos’s first wildlife sanctuary for trafficked endangered species, its first botanical garden and its first planting plan for a community forest. Most often the agents and accomplices of neoliberal development, the planning and design professions, including landscape architecture, have little dialogue with either the mainstream natural sciences or critical social sciences that form the discourse of projects in Laos and comparable contexts. Covering diverse conceptions and issues of development, including cultural and scientific knowledge exchanges between Laos and China, nature tourism, connectivity and new town planning, this book also features nine planning proposals for Laos generated through this research initiative since the railway's groundbreaking in 2016. Each proposal promotes a wider landscape approach to development and deploys landscape architecture’s spatial and ecological acumen to synthesize critical development studies with the planner's capacity, if not naive predilection, to intervene on the ground. Ultimately, this book advocates the cautious engagement of the professionally oriented built-environment disciplines, such as regional planning, civil engineering and landscape architecture, with the landscapes of development institutions and environmental NGOs.

The Political Economy Of China's Belt And Road Initiative Lei Zou,2018-05-07 Silk Road was once the most important economic-cultural tie connecting the Eurasian countries before the rise of the West. In September 2013, Chinese President Xi Jinping put forward the initiative to jointly build the Silk Road Economic Belt and 21st-Century Maritime Silk Road, which is abbreviated as the Belt and Road Initiative (BRI). This book analyzes the BRI through the approach of political economy and establishes the analytic framework of BRI from historical and comparative perspectives. It clearly displays the strategic considerations, future vision, constructing framework, governmental actions, latest achievements, multiple opportunities and potential risks of BRI.As China's grand national development strategy and international cooperation initiative, the BRI will largely shape China's domestic and foreign policies in the Xi Jinping era. The book is the first academic monograph on the BRI and it enables readers to comprehensively understand this initiative and its implications to China, Eurasia and the world.

The Belt Road and Beyond Min Ye,2024-11-14 From 1998 to 2018, China had three political-economic crises, resulting in bureaucratic paralysis. It was at such junctures that China's leadership launched initiatives, like the Western Development Program, that mobilized state and market actors to expedite globalization and revive economic growth. In *The Belt Road and Beyond*, Min Ye reevaluates the common tendency to attribute China's Belt and Road to individual leaders' strategic ambitions, using state-mobilized globalization as a comparative framework and investigative tool to understand Chinese capitalism. State-mobilized globalization has helped sustain China's high-growth economy and social-political stability, while also sparking some political backlash. In order to succeed in globalization, the author argues, China's state mobilization must readapt to global circumstances. She sheds light on the tactics China used to spring from a crisis-stricken middle economy to a formidable global power, implicating not only China, but also the world.

The New Map Daniel Yergin,2020-09-15 A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for *The New Map* by the American Energy Society “A master class on how the world works.” —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The “shale revolution” in oil and gas has transformed the American economy, ending the “era of shortage” but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is

pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

The Impact of China's Belt and Road Initiative Jeremy Garlick,2021-06-30 This book merges macro- and micro-level analysis of the Belt and Road Initiative (BRI) to dissect China's aim in creating an integrated Eurasian continent through this single mega-project. BRI has been the source of much interest and confusion, as established frameworks of analysis seek to understand China's intentions behind the policy. China's international activity in the early 21st century has not yet been successfully theorised by IR scholars because of a failure to satisfactorily encompass its complexity. In addition, the mix-and-match syncretism of the Chinese approach to foreign policy has been under-emphasised or omitted in many analyses. Bringing together complexity thinking and analytic eclecticism to assess the degree to which this scheme can transform international relations, Garlick critically examines this large-scale interconnectivity project and its potential impacts. The book will be of interest to scholars and practitioners in the field of international relations and China studies including academics, policy-makers and diplomats around the world.

China's One Belt One Road Initiative Tai Wei Lim,Wen Xin Lim,Henry Hing Lee Chan,Katherine Hui-yi Tseng,2016-07-28 Chinese President Xi Jinping launched the Silk Road Economic Belt component of the One Belt One Road (OBOR) initiative at Kazakhstan in 2013. OBOR is a development strategy and framework that focuses on connectivity and cooperation among countries primarily in Eurasia. It consists of two main components, the land-based 'Silk Road Economic Belt' (SREB) and ocean-going 'Maritime Silk Road' (MSR). This book studies the equilibrium or balance between overland and maritime trade routes of OBOR.This book has two major sections. The interpretive section examines contemporary media narratives related to the OBOR initiative and how contemporary commentators appropriate narratives about historical events related to the maritime Silk Road to interpret current policy agendas and legitimize diplomatic or economic exchanges. In terms of institutional studies, the chapters related to Asian Infrastructure Investment Bank (AIIB) will look at the issues facing the Bank in its quest in forming a new world platform for multilateral development financing.The other section, the empirical case study of the publication highlights the fact that Euro-China High Speed Rail (HSR) and Central Asia-China HSR are not viable at the moment as passenger volume is not sufficient to justify the HSR line. This section examines the

overland route of the OBOR and looks at recent Chinese HSR history and conventional sub-high speed rail technology development, and identifies technical & economic criteria determining the appropriate technology for a certain line. The chapter in this section will use the developed criteria to analyze the various rail linkage projects currently under study in the OBOR framework, highlight the economic, bureaucratic and geo-political challenges that these projects likely face and lay down conditions that will determine the outcome of these projects.

The Belt and Road Initiative and Global Governance Maria Adele Carrai, Jean-Christophe Defraigne, Jan Wouters, 2020 This timely book examines the Belt and Road Initiative (BRI), assessing its effect on the international economic order and global governance more broadly. Through a variety of qualitative case studies the book investigates the implementation of the BRI and evaluates its development outcomes both for China and the countries it interacts with under the initiative, along with its international implications. Chapters discuss as-yet-unexplored cases from the ground in brand new studies based on fieldwork by leading academics, as well as providing alternative readings of the rationale behind the BRI. Questions about connectivity and the financial implications of Chinese investments are addressed, taking a balanced approach that demonstrates the complexity and nuance of these issues, and the far-from-linear impact that the BRI is having on global governance. This incisive book will be critical reading for scholars and policy makers working on China and global governance. It will also provide useful insights for officials and practitioners working in BRI countries and international institutions, think-tanks and NGOs. Contributors include: M.A. Carrai, J.-C. Defraigne, J.-F. Di Meglio, D. Freeman, F. Godement, A. Halegua, N. Kassenova, C.-C. Kuik, C. Ljungwall, S. Nanwani, T. Pairault, U. Wissenbach, J. Wouter

The Belt and Road Strategy in International Business and Administration Wei Liu, 2019 This book examines the business aspects of the belt and road strategy. This strategy aims to connect countries along the routes in Asia, Europe, Africa, to strengthen the partnerships, and to construct a comprehensive and multilevel interconnected network to achieve pluralistic, independent, balanced, and sustainable development--
