The Trainable Cat John Bradshaw, Sarah Ellis, 2016-08-04 'Amazing' Guardian From the on-screen experts for BBC2's Cat Watch, and based on their groundbreaking research - this is the ultimate guide to making your cat a happier, more sociable animal. The idea of a trained cat is a contradiction in terms, isn't it? Naturally solitary, wary, easily threatened by newcomers, they are attached to place rather than people, and much of their 'antisocial' behaviour arises in situations where that attachment is threatened. But, as cat experts Sarah Ellis and John Bradshaw argue, such stress-induced behaviour can be prevented, reduced, even eliminated, by training. A comprehensive and engaging step-by-step guide, *The Trainable Cat* will help you to help your cat negotiate the complexities of everyday life: to enjoy living with humans - including new babies and lively toddlers - and other pets; to answer to their name; settle into a new home; and to overcome the anxiety of a visit to the vet. You can train your cat to do what is in its own best interests - even when its instincts tell it otherwise. 'I doubt you'll find a more well-informed or scientific book on cats that better shows you how feline thinking works' *The Times*

Transient and Strange: Notes on the Science of Life Nell Greenfieldboyce, 2024-01-16 A New York Times Book Review Editors' Choice An astonishing debut from the beloved NPR science correspondent: intimate essays about the intersection of science and everyday life. In her career as a science reporter, Nell Greenfieldboyce has reported from inside a space shuttle, the bottom of a coal mine, and the control room of a particle collider; she's presented news on the color of dinosaur eggs, ice worms that live on mountaintop glaciers, and signs of life on Venus. In this, her debut book, she delivers a wholly original collection of powerful, emotionally raw, and unforgettable personal essays that probe the places where science touches our lives most intimately. Expertly weaving her own experiences of motherhood and marriage with an almost devotional attention to the natural world, Greenfieldboyce grapples with the weighty dualities of life: birth and death, constancy and

impermanence, memory and doubt, love and aging. She looks for a connection to the universe by embarking on a search for the otherworldly glint of a micrometeorite in the dust, consults meteorologists and storm chasers on the eerie power of tornadoes to soothe her children's anxieties, and processes her adolescent oblivion through the startling discovery of black holes. Inspired throughout by Walt Whitman's invocation to the "transient and strange," she remains attuned to the wildest workings of our world, reflecting on the incredible leap of the humble flea or the echoing truth of a fetal heartbeat. A beautiful blend of explanatory science, original reporting, and personal experience, *Transient and Strange* captures the ache of ordinary life, offering resonant insights into both the world around us and the worlds within us.

The Great Sicilian Cat Rescue - One Englishwoman's Mission to Save An Island's Cats Jennifer Pulling, 2015-06-04 Numerous visitors to Mediterranean countries have found their holiday punctuated by trips to feed hungry feral cats. Some try to save injured and sick felines. Not many have gone to the lengths of Jennifer Pulling with her one-woman campaign, *Catsnip*. Set against the beautiful and sinister backdrop of Sicily and its enigmatic people, the book charts Jennifer's journey

as passionate defender of the island's often abused and ill-treated cats. With no previous experience, she raises funds and organises teams of British, American and German vets to work in improvised and clandestine surgeries. On her voyage of discovery she encounters the gattare (cat ladies) who devote their time to saving colonies of feral cats; she challenges Sicilian bureaucracy and risks prosecution by the authorities; and she discovers an unknown Sicily, gaining an understanding of the island's history of domination by numerous cultures and the Mafia. Incredibly moving, while peppered with humour, this is the story of one woman's mission to rescue an animal she loves, as well as an insight into a unique culture and landscape.
