Peripheral Nerve Regeneration Giovanna Gambarotta, Kirsten Haastert-Talini, Esther Udina, Stefania Raimondo, James Phillips, 2019-12-24

A Companion to Nazi Germany Shelley Baranowski, Armin Nolzen, Claus-Christian W. Szejnmann, 2018-06-18 A Deep Exploration of the Rise, Reign, and Legacy of the Third Reich For its brief existence, National Socialist Germany was one of the most destructive regimes in the history of humankind. Since that time, scholarly debate about its causes has volleyed continuously between the effects of political and military decisions, pathological development, or modernity gone awry. Was terror the defining force of rule, or was popular consent critical to sustaining the movement? Were the German people sympathetic to Nazi ideology, or were they radicalized by social manipulation and powerful propaganda? Was the “Final Solution” the motivation for the Third Reich’s rise to power, or simply the outcome? A Companion to Nazi Germany addresses these crucial questions with historical insight from the Nazi Party’s emergence in the 1920s through its postwar repercussions. From the theory and context that gave rise to the movement, through its structural, cultural, economic, and social impacts, to the era’s lasting legacy, this book offers an in-depth examination of modern history’s most infamous reign. Assesses the historiography of Nazism and the prehistory of the regime Provides deep insight into labor, education, research, and home life amidst the Third Reich’s ideological imperatives Describes how the Third Reich affected business, the economy, and the culture, including sports, entertainment, and religion Delves into the social militarization in the lead-up to war, and examines the social and historical complexities that allowed genocide to take place Shows how modern-day Germany confronts and deals with its recent history Today’s political climate highlights the critical need to understand how radical nationalist movements gain an audience, then followers, then power. While historical analogy can be a faulty basis for analyzing current events, there is no doubt that examining the parallels can lead to some important questions about the present. Exploring key motivations, environments, and cause and effect, this book provides essential perspective as radical nationalist movements have once again reemerged in many parts of the world.

Modern Concepts of Peripheral Nerve Repair Kirsten Haastert-Talini, Hans Assmus, Gregor Antoniadis, 2017-06-19 This book focuses on posttraumatic repair and reconstruction of peripheral nerves. Written by internationally respected specialists, it provides an overview of the challenges and the latest advances in diagnosis and treatment of traumatic

peripheral nerve injuries. It presents an outline of state-of-the-art procedures from diagnostics, including newest imaging techniques, over conventional and alternative surgical approaches to clinical follow-up and rehabilitation, including the latest concepts to improve functional recovery. The purely clinical topics are preceded by neuroanatomical principles and neurobiological events related to peripheral nerve transection injuries and followed by an outlook on current experimental developments in the area of biomaterials for artificial nerve grafts and peripheral nerve tissue engineering. Peripheral nerve injuries not only affect the nerve tissue at the site of injury, but also target tissue and parts of the central nervous system. They often have dramatic consequences for patients, including loss of sensory and motor functions combined with paresthesia or pain, and a reduced quality of life and ability to work. An adequate understanding of the procedures for proper decision-making and reconstructing peripheral nerves is therefore essential to ensure optimized functional recovery.

Historical Companion to Postcolonial Literatures in English Prem Poddar, 2019-08-07 This is the first reference guide to the political, cultural and economic histories that form the subject-matter of postcolonial literatures written in English. The focus of the Companion is principally on the histories of postcolonial literatures in the Anglophone world - Africa, the Middle East, South Asia, South-east Asia, Australia and New Zealand, the Pacific, the Caribbean and Canada. There are also long entries discussing the literatures and histories of those further areas that have also claimed the title 'postcolonial', notably Britain, East Asia, Ireland, Latin America and the United States. The Companion contains: *220 entries written by 150 acknowledged scholars of postcolonial history and literature; *covers major events, ideas, movements, and figures in postcolonial histories *long regional survey essays on historiography and women's histories. Each entry provides a summary of the historical event or topic and bibliographies of postcolonial literary works and histories. Extensive cross-references and indexes enable readers to locate particular literary texts in their relevant historical contexts, as well as to discover related literary texts and histories in other regions with ease.

Emerging Functions of Septins Manoj B. Menon, Matthias Gaestel, 2017-10-10 Together with the microfilament, microtubule and intermediate-filament networks, septins constitute an integral part of the eukaryotic cytoskeleton. Historically identified as proteins critical for septum formation in the budding yeast *Saccharomyces cerevisiae*, septin family GTPases are expressed and participate in the process of cytokinesis in most eukaryotes except higher plants. More than a dozen septin genes in mammals, together with various splice variants displaying tissue-specific expression patterns and flexible hetero-polymeric higher-order assembly achieve an unfathomable complexity superior to the other cytoskeletal components. Even though the initial studies in the septin field was restricted to their evolutionarily conserved role in cell division, strong expression of septins in the non-dividing cells of the brain generated great interest in understanding their role in neuronal morphogenesis and other aspects of cellular function. On one hand, recent developments indicate complex non-canonical roles for septins in diverse processes ranging from neuronal development to immune response and calcium

signaling. On the other hand several lines of data including those from knockout models question the universal role for septins in animal cell cytokinesis. Mammalian hematopoietic cells seem to proliferate and efficiently undergo cytokinesis in the absence of pivotal septin proteins in a context-dependent manner. The lack of septin-dependence of hematopoiesis also opens the possibility of safely targeting septin-dependent cytokinesis for solid-tumor therapy. Thus the septin field is perfectly poised with novel roles for septins being discovered and the basic understanding on septin assembly and its canonical functions constantly revisited. The objective of this research topic was to provide an exclusive platform for discussing these rapid advances in the septin field. With a mixture of reviews and research articles encompassing diverse areas of septin research, ranging from the humble yeast model to human cancer, this ebook will be an interesting reading material for both experts as well as new comers to the septin field.

Arterial Variations in Humans: Key Reference for Radiologists and Surgeons Frank K. Wacker,Herbert Lippert,Reinhard Pabst,2017 A one-of-a-kind reference and atlas to variations in the human arterial system Based on the landmark work *Arterial Variations in Man: Classification and Frequency* by Lippert and Pabst, this atlas presents the full range of arterial variations that occur in the human body. Adding an interdisciplinary perspective to the original text,*Arterial Variations in Humans: Key Reference for Radiologists and Surgeons* shows variations of the arteries with schematic diagrams alongside their corresponding radiological images. Chapters begin with schematic and radiological depictions of normal arterial blood supply, followed by images of the arterial variation, to enable rapid identification of individual variations. This unique resource also includes statistics on the frequency of specific arterial variations and explanations of their embryologic origins. Special Features: Coverage of arterial variations in the head, neck, spine, thorax, abdomen and pelvis, and upper and lower extremities with separate chapters devoted to each major artery Clearly drawn schematic outlines and their correlating high-quality radiological scans-more than 900 illustrations in total-highlight arterial variations Images of the normal arterial anatomy as described in standard textbooks are provided for side-by-side comparison with the arterial variation Percentages for the frequency of occurrence of arterial variations with references to the source of the data Concise and lucid descriptions in each chapter facilitate complete comprehension of normal and abnormal vascular anatomy With *Arterial Variations in Humans: Key Reference for Radiologists and Surgeons*, radiologists will gain a full understanding of the diversity of arterial anatomy-essential knowledge for the accurate interpretation of pathological changes in diagnostic imaging. Interventional

radiologists and vascular and general surgeons will also find this book valuable for planning and performing procedures safely and effectively.

Campus Medius Simon Ganahl, 2022-05 Campus Medius explores and expands the possibilities of digital cartography in cultural and media studies. Simon Ganahl documents the development of the project from a historical case study to a mapping platform. Based on the question what a media experience is, the concepts of the apparatus (dispositif) and the actor-network are translated into a data model. A time-space of 24 hours in Vienna in May 1933, marked by a so-called Turks Deliverance Celebration (Türkenbefreiungsfeier), serves as an empirical laboratory. This Austrofascist rally is mapped from multiple perspectives and weaved into media-historical networks, spanning from the seventeenth century up to the present day.

Shape in Medical Imaging Martin Reuter, Christian Wachinger, Hervé Lombaert, Beatriz Paniagua, Marcel Lüthi, Bernhard Egger, 2018-11-23 This book constitutes the proceedings of the Workshop on Shape in Medical Imaging, ShapeMI 2018, held in conjunction with the 21st International Conference on Medical Image Computing, MICCAI 2018, in Granada, Spain, in September 2018. The 26 full papers and 2 short papers presented were carefully reviewed and selected for inclusion in this volume. The papers discuss novel approaches and applications in shape and geometry processing and their use in research and clinical studies and explore novel, cutting-edge theoretical methods and their usefulness for medical applications, e.g., from the fields of geometric learning or spectral shape analysis.

The Horrors of Trauma in Cinema Michael Elm, Kobi Kabalek, Julia B. Köhne, 2014-10-02 This volume explores the multifaceted depiction and staging of historical and social traumata as the result of extreme violence within national contexts. It focuses on Israeli-Palestinian, German and (US) American film, and reaches out to cinematic traditions from other countries like France, Great Britain and the former USSR. International and interdisciplinary scholars analyze both mainstream and avant-garde movies and documentaries premiering from the 1960s to the present. From transnational and cross-genre perspectives, they query the modes of representation – regarding narration, dramaturgy, aesthetics, mise-en-

scène, iconology, lighting, cinematography, editing and sound – held by film as a medium to visualize shattering experiences of violence and their traumatic encoding in individuals, collectives, bodies and psyches. This anthology uniquely traces horror aesthetics and trajectories as a way to reenact, echo and question the perpetual loops of trauma in film cultures. The contributors examine the discursive transfer between historical traumata necessarily transmitted in a medialized and conceptualized form, the changing landscape of (clinical) trauma theory, the filmic depiction and language of trauma, and the official memory politics and hegemonic national-identity constructions.

Hitler's Shadow Empire Pierpaolo Barbieri, 2015 Pitting fascists and communists in a showdown for supremacy, the Spanish Civil War has long been seen as a grim dress rehearsal for World War II. Francisco Franco's Nationalists prevailed with German and Italian military assistance—a clear instance, it seemed, of like-minded regimes joining forces in the fight against global Bolshevism. In *Hitler's Shadow Empire* Pierpaolo Barbieri revises this standard account of Axis intervention in the Spanish Civil War, arguing that economic ambitions—not ideology—drove Hitler's Iberian intervention. The Nazis hoped to establish an economic empire in Europe, and in Spain they tested the tactics intended for future subject territories. “The Spanish Civil War is among the 20th-century military conflicts about which the most continues to be published...Hitler's *Shadow Empire* is one of few recent studies offering fresh information, specifically describing German trade in the Franco-controlled zone. While it is typically assumed that Nazi Germany, like Stalinist Russia, became involved in the Spanish Civil War for ideological reasons, Pierpaolo Barbieri, an economic analyst, shows that the motives of the two main powers were quite different. —Stephen Schwartz, *Weekly Standard*

Global Prayers Jochen Becker, Katrin Klingan, Stephan Lanz, Kathrin Wildner, 2014 *Global Prayers* examines questions of redemption and liberation in the cities of the world. New religious practices permeate public spaces and the cultural scenes of these metropolises. Religious communities inscribe themselves into urban life acoustically, typographically, and architecturally. They generate their own aesthetics and forms of consumption. Urban studies as well as artistic productions have long viewed religion and urbanity as mutually exclusive. *Global Prayers*, in contrast, puts the case for just such reciprocal influences. The publication is based on the work of an international network of researchers as well as artists, focusing on diverse urban assemblages and religious communities. The contributions record their movements and critically engage with them. With contributions by: Özge Aktaş & Eda Ünlü-Yücesöy, Nezar AlSayyad, Yasmeen Arif, Adé Bantu, Jochen Becker, Sabine Bitter & Helmut Weber, Regina Bittner, Filip De Boeck, Hiba Bou Akar, Thomas Burkhalter, Ayşe ÇAvdar, Aryo Danusiri, Amanda Dias, Ronald Düker & Stefanie Peter, Alexa Färber, David Garbin, Hengameh Golestan, Gerda Heck, Anne Huffs Schmid, Johannes Ismaiel-Wendt, George Jose, Katrin Klingan, Stephan Lanz, Brian Larkin, Ferdinand Mbecha, Birgit Meyer, Aernout Mik, Martijn Oosterbaan, Joseph Rustom, Sandra Schäfer, Werner Schiffauer, Surabhi Sharma, Abdoumalig Simone, David Spero, Hidayet Tuksal, Asonzeh Ukah, Camilo José Vergara, Kathrin Wildner, Paola Yacoub
