Occupational Health and Safety for the 21st Century Robert H. Friis, 2015 This book discusses occupational health and safety, including occupational policies, legislative acts, and laws for protection of workers. Epidemiology and toxicology are examples of two fields that make contributions to exposure assessments and illuminate the adverse health effects associated with work-related exposures. Among the adverse health outcomes that have been linked with the work environment are cancer, respiratory illness, and reproductive abnormalities. Unintentional injuries are one of the leading causes of work-related morbidity and mortality, but the psychological and social environment can also affect the health of workers by influencing levels of stress and morale. Methods have been developed to reduce exposures to hazards and increase occupational safety through redesign of the work environment, introduction of engineering controls, and limiting exposures to physical, microbial, and chemical agents. --

Vanished by the Danube Charles Farkas, 2013-06-20 Germany's invasion of Hungary in 1944 marked the end of a culture that had dominated Central Europe from the nineteenth century to the middle of the twentieth. In this poignant memoir, Charles Farkas offers a testament to this vanished way of life—its society, morality, personal integrity, wealth, traditions, and chivalry—as well as an eyewitness account of its destruction, begun at the hands of the Nazis and then completed under the heel of Soviet Communism. Farkas's recollections of growing up in Budapest, a city whose grandeur embraced—indeed spanned—the Danube River; his vivid descriptions of everyday life in Hungary before, during, and after World War II; and his ultimate flight to freedom in the United States remind us that behind the larger historical events of the past century are the stories of the individual men and women who endured and, ultimately, survived them.

The Book of (More) Delights Ross Gay, 2023-09-19 From bestselling author of *The Book of Delights* and award-winning poet, a book of lyrical mini-essays celebrating the everyday that will inspire readers to rediscover the joys in the world around us. In Ross Gay's new collection of small, daily wonders, again written over the course of a year, one of America's most original voices continues his ongoing investigation of delight. For Gay, what delights us is what connects us, what gives us meaning, from the joy of hearing a nostalgic song blasting from a passing car to the pleasure of refusing the "nefarious"

scannable QR code menus, from the tiny dog he fell hard for to his mother baking a dozen kinds of cookies for her grandchildren. As always, Gay revels in the natural world—sweet potatoes being harvested, a hummingbird carousing in the beebalm, a sunflower growing out of a wall around the cemetery, the shared bounty from a neighbor’s fig tree—and the trillion mysterious ways this glorious earth delights us. *The Book of (More) Delights* is a volume to savor and share.

Autotheory as Feminist Practice in Art, Writing, and Criticism Lauren Fournier, 2021-02-23 Autotheory--the commingling of theory and philosophy with autobiography--as a mode of critical artistic practice indebted to feminist writing and activism. In the 2010s, the term autotheory began to trend in literary spheres, where it was used to describe books in which memoir and autobiography fused with theory and philosophy. In this book, Lauren Fournier extends the meaning of the term, applying it to other disciplines and practices. Fournier provides a long-awaited account of autotheory, situating it as a mode of contemporary, post-1960s artistic practice that is indebted to feminist writing, art, and activism. Investigating a series of works by writers and artists including Chris Kraus and Adrian Piper, she considers the politics, aesthetics, and ethics of autotheory.

Logic as a Liberal Art R. E. Houser, 2019-12-10 In the twenty-first century there are two ways to study logic. The more recent approach is symbolic logic. The history of teaching logic since World War II, however, casts doubt on the idea that symbolic logic is best for a first logic course. *Logic as a Liberal Art* is designed as part of a minority approach, teaching logic in the verbal way, in the student's natural language, the approach invented by Aristotle. On utilitarian grounds alone, this verbal approach is superior for a first course in logic, for the whole range of students. For millennia, this verbal approach to

logic was taught in conjunction with grammar and rhetoric, christened the trivium. The decline in teaching grammar and rhetoric in American secondary schools has led Dr. Rollen Edward Houser to develop this book. The first part treats grammar, rhetoric, and the essential nature of logic. Those teachers who look down upon rhetoric are free, of course, to skip those lessons. The treatment of logic itself follows Aristotle's division of the three acts of the mind (Prior Analytics 1.1). Formal logic is then taken up in Aristotle's order, with Parts on the logic of Terms, Propositions, and Arguments. The emphasis in Logic as a Liberal Art is on learning logic through doing problems. Consequently, there are more problems in each lesson than would be found, for example, in many textbooks. In addition, a special effort has been made to have easy, medium, and difficult problems in each Problem Set. In this way the problem sets are designed to offer a challenge to all students, from those most in need of a logic course to the very best students.

Criminality in Context Craig Haney,2020 In this groundbreaking book, Craig Haney argues that meaningful and lasting criminal justice reform depends on changing the public narrative about who commits crime and why. Building on decades of research and work at the front lines of the criminal justice system, Haney debunks what he calls the crime master narrative—the widespread myth that crime is the simple product of free and autonomous bad choices—an increasingly anachronistic view that cannot bear the weight of contemporary psychological data and theory. He meticulously reviews evidence documenting the ways in which a person's social history, institutional experiences, and present circumstances powerfully shape their life course, with a special focus on the role of social, economic, and racial injustice in crime causation. Based on his comprehensive review and analysis of the research, Haney offers a carefully framed and psychologically based blueprint for making the criminal justice system fairer, with strategies to reduce crime through proactive prevention instead of reactive punishment--

Research for Designers Gjoko Muratovski,2021-12-01 Design is everywhere. It influences how we live, what we wear, how we communicate, what we buy, and how we behave. To design for the real world and define strategies rather than just implement them, you need to learn how to understand and solve complex, intricate and often unexpected problems. Research for Designers is the guide to this new, evidence-based creative process for anyone doing research in Design Studies or looking to develop their design research skills. The book: Takes an organized approach to walking you through the basics of research. Highlights the importance of data. Encourages you to think in a cross-disciplinary way. Including interviews with 10 design experts from across the globe, this guide helps you put theory into practice and conduct successful design research.

Creative Research Methods in the Social Sciences Kara, Helen,2015-04-10 With foreword by Kenneth J. Gergen and Mary M. Gergen. Creative research methods can help to answer complex contemporary questions, which are hard to answer using traditional methods alone. Creative methods can also be more ethical, helping researchers to address social injustice. This

accessible book is the first to identify and examine the four areas of creative research methods: arts-based research, research using technology, mixed-method research and transformative research frameworks. Written in a practical and jargon-free style, with over 100 boxed examples, it offers numerous examples of creative methods in practice, from the social sciences, arts, and humanities around the world. Spanning the gulf between academia and practice, this useful book will inform and inspire researchers by showing readers why, when, and how to use creative methods in their research.

Fungipedia Lawrence Millman,2019-10-29 An illustrated mini-encyclopedia of fungal lore, from John Cage and Terrence McKenna to mushroom sex and fairy rings. With more than 180 entries, this collection will transport both general readers and specialists into the remarkable universe of fungi.

Dattātreyā: The Immortal Guru, Yogin, and Avatāra Antonio Rigopoulos,1998-04-02 This book presents the multi-faceted Hindu deity Dattatreya from his Puranic emergence up to modern times. Dattatreya's Brahmanical portrayal, as well as his even more archaic characterization as a Tantric antinomian figure, combines both Vaisnava Saiva motifs. Over the course of time, Dattatreya has come to embody the roles of the immortal guru, yogin and avatara in a paradigmatic manner. From the sixteenth century Dattatreya's glorious characterization emerged as the incarnation of the trimurti of Brahma, Visnu, and Siva. Although Maharastra is the heartland of Dattatreya devotion, his presence is attested to throughout India and extends beyond the boundaries of Hinduism, being met with in Sufi circles and even in Buddhism and Jainism via Nathism. The scarce attention which most Western scholars of Indian religions have paid to this deity contrasts with its ubiquitousness and social permeability. Devotion to Dattatreya cuts through all social and religious strata of Indian society: among his adepts we find yogis, Brahmans, faqirs, Devi worshippers, untouchables, thieves, and prostitutes. This book explores all primary religious dimensions: myth, doctrine, ritual, philosophy, mysticism, and iconography. The comprehensive result offers a rich fresco of Hindu religion as well as an understanding of Marathi integrative spirituality: precisely this complexity of themes constitutes Dattatreya's uniqueness.

The Psychoanalysis of Artificial Intelligence Isabel Millar,2021-04-13 This book examines the crucial role of

psychoanalysis in understanding what AI means for us as speaking, sexed subjects. Drawing on Lacanian theory and recent clinical developments it explores what philosophy and critical theory of AI has hitherto neglected: enjoyment. Through the reconceptualization of Intelligence, the Artificial Object and the Sexual Abyss the book outlines the Sexbot as a figure who exists on the boundary of psychoanalysis and AI. Through this figure and the medium of film, the author subverts Kant's three Enlightenment questions and guides readers to transition from asking 'Does it think?' to 'Can it enjoy?' The book will appeal in particular to students and scholars of psychoanalysis, philosophy, film and media studies, critical theory, feminist theory and AI research.

Eating Puerto Rico Cruz Miguel Ortíz Cuadra,2013-10-14 Available for the first time in English, Cruz Miguel Ortiz Cuadra's magisterial history of the foods and eating habits of Puerto Rico unfolds into an examination of Puerto Rican society from the Spanish conquest to the present. Each chapter is centered on an iconic Puerto Rican foodstuff, from rice and cornmeal to beans, roots, herbs, fish, and meat. Ortiz shows how their production and consumption connects with race, ethnicity, gender, social class, and cultural appropriation in Puerto Rico. Using a multidisciplinary approach and a sweeping array of sources, Ortiz asks whether Puerto Ricans really still are what they ate. Whether judging by a host of social and economic factors--or by the foods once eaten that have now disappeared--Ortiz concludes that the nature of daily life in Puerto Rico has experienced a sea change.

Genetic Nature/Culture Prof. Alan H. Goodman,Prof. Deborah Heath,M. Susan Lindee,2003-11-06 The so-called science wars pit science against culture, and nowhere is the struggle more contentious—or more fraught with paradox—than in the burgeoning realm of genetics. A constructive response, and a welcome intervention, this volume brings together biological and cultural anthropologists to conduct an interdisciplinary dialogue that provokes and instructs even as it bridges the science/culture divide. Individual essays address issues raised by the science, politics, and history of race, evolution, and identity; genetically modified organisms and genetic diseases; gene work and ethics; and the boundary between humans and animals. The result is an entree to the complicated nexus of questions prompted by the power and importance of genetics and genetic thinking, and the dynamic connections linking culture, biology, nature, and technoscience. The volume offers critical perspectives on science and culture, with contributions that span disciplinary divisions and arguments grounded in both biological perspectives and cultural analysis. An invaluable resource and a provocative introduction to new research and thinking on the uses and study of genetics, *Genetic Nature/Culture* is a model of fruitful dialogue, presenting the quandaries faced by scholars on both sides of the two-cultures debate.

Waterproof and Water Repellent Textiles and Clothing John T Williams,2017-11-21 Waterproof and Water Repellent

Textiles and Clothing provides systematic coverage of the key types of finishes and high performance materials, from conventional wax and silicone, through controversial, but widely used fluoropolymers and advanced techniques, such as atmospheric plasma deposition and sol-gel technology. The book is an essential resource for all those engaged in garment development, production and finishing, and for academics engaged in research into apparel technology and textile science. Rapid innovation in this field is driving new performance demands in many areas, including the sporting and military sectors. However, another innovation driver is the regulatory framework in the USA, Europe and globally, addressing both health concerns (e.g. with PFOS / PFOA) and environmental impacts (e.g. C8 fluorocarbon finishes). Both of these aspects are fully covered, along with the replacement materials / technologies currently available and under development. In addition, oleophobic and multifunctional coatings are discussed, as are aspects of performance, testing and applications in sportswear, protective clothing, and footwear. - Introduces innovative materials and technologies, exploring their current and potential use across different sectors - Provides expert guidance on the health and environmental aspects of key waterproof materials and coatings and their associated regulations - Demystifies testing processes and design principles

Kafka's Zoopoetics Naama Harel, 2020-05-04 Nonhuman figures are ubiquitous in the work of Franz Kafka, from his early stories down to his very last one. Despite their prominence throughout his oeuvre, Kafka's animal representations have been considered first and foremost as mere allegories of intrahuman matters. In recent years, the allegorization of Kafka's animals has been poetically dismissed by Kafka's commentators and politically rejected by posthumanist scholars. Such critique, however, has yet to inspire either an overarching or an interdiscursive account. This book aims to fill this lacuna. Positing animal stories as a distinct and significant corpus within Kafka's entire poetics, and closely examining them in dialogue with both literary and posthumanist analysis, Kafka's Zoopoetics critically revisits animality, interspecies relations, and the very human-animal contradistinction in the writings of Franz Kafka. Kafka's animals typically stand at the threshold between humanity and animality, fusing together human and nonhuman features. Among his liminal creatures we find a human transformed into vermin (in "The Metamorphosis"), an ape turned into a human being (in "A Report to an Academy"), talking jackals (in "Jackals and Arabs"), a philosophical dog (in "Researches of a Dog"), a contemplative mole-like creature (in "The Burrow"), and indiscernible beings (in "Josefine, the Singer or the Mouse People"). Depicting species boundaries as mutable and obscure, Kafka creates a fluid human-animal space, which can be described as "humanimal." The constitution of a humanimal space radically undermines the stark barrier between human and other animals, dictated by the anthropocentric paradigm. Through denying animalistic elements in humans, and disavowing the agency of nonhuman animals, excluding them from social life, and neutralizing compassion for them, this barrier has been designed to regularize both humanity and animality. The contextualization of Kafka's animals within posthumanist theory engenders a post-anthropocentric arena, which is simultaneously both imagined and very real.

Machine Learning with Health Care Perspective Vishal Jain, Jyotir Moy Chatterjee, 2020-03-09 This unique book introduces a variety of techniques designed to represent, enhance and empower multi-disciplinary and multi-institutional machine learning research in healthcare informatics. Providing a unique compendium of current and emerging machine learning paradigms for healthcare informatics, it reflects the diversity, complexity, and the depth and breadth of this multi-disciplinary area. Further, it describes techniques for applying machine learning within organizations and explains how to evaluate the efficacy, suitability, and efficiency of such applications. Featuring illustrative case studies, including how chronic disease is being redefined through patient-led data learning, the book offers a guided tour of machine learning algorithms, architecture design, and applications of learning in healthcare challenges.

The Politics of Slavery Laura Brace, 2019-08-07 Critically interrogates the history and politics of slavery, from classical Greek philosophy to today. What makes a slave a slave? What does it mean to think about slavery as a political question? This book examines slavery and freedom as founding narratives of the liberal subject and of modernity. Laura Brace asks what happens when we try to bring slaves back into history, and into the history of political thought in particular. Looking at scholarship on both 'old' and 'new' slavery, the book assesses the work of Aristotle, Locke, Hegel, Kant, Wollstonecraft and Mill, and explores the contemporary concerns of human trafficking and the prison industrial complex to consider the limitations of 'new slavery' discourse. Key Features: Analyses the dominant liberal discourse on slavery, from Aristotle to Nietzsche; Examines the connections between 'old' and 'new' slavery; Explores the role of concepts of power, violence, domination and subordination, issues of economic exploitation and the organization of labour and the influence of race and gender.
