Siegel, M.D., and early childhood expert Mary Hartzell, M.Ed., explore the extent to which our childhood experiences shape the way we parent. The Power of Showing Up Daniel J. Siegel, MD, Tina Payne Bryson, 2020-01-07 Parenting isn't easy. Showing up is. Your greatest impact begins right where you are. Now the bestselling authors of *The Whole-Brain Child* and *No-Drama Discipline* explain what this means over the course of childhood. "There is parenting magic in this book."—Michael Thompson, Ph.D., co-author of the New York Times bestselling classic *Raising Cain* One of the very best scientific predictors for how any child turns out—in terms of happiness, academic success, leadership skills, and meaningful relationships—is whether at least one adult in their life has consistently shown up for them. In an age of scheduling demands and digital distractions, showing up for your child might sound like a tall order. But as bestselling authors Daniel Siegel and Tina Payne Bryson reassuringly explain, it doesn't take a lot of time, energy, or money. Instead, showing up means offering a quality of presence. And it's simple to provide once you understand the four building blocks of a child's healthy development. Every child needs to feel what Siegel and Bryson call the Four S's: • Safe: We can't always insulate a child from injury or avoid doing something that leads to hurt feelings. But when we give a child a sense of safe harbor, she will be able to take the needed risks for growth and change. • Seen: Truly seeing a child means we pay attention to his emotions—both positive and negative—and strive to attune to what's happening in his mind beneath his behavior. • Soothed: Soothing isn't about providing a life of ease; it's about teaching your child how to cope when life gets hard, and showing him that you'll be there with him along the way. A soothed child knows that he'll never have to suffer alone. • Secure: When a child knows she can count on you, time and again, to show up—when you reliably provide safety, focus on seeing her, and soothe her in times of need, she will trust in a feeling of secure attachment. And thrive! Based on the latest brain and attachment research, *The Power of Showing Up* shares stories, scripts, simple strategies, illustrations, and tips for honoring the Four S's effectively in all kinds of situations—when our kids are struggling or when they are enjoying success; when we are consoling, disciplining, or arguing with them; and even when we are apologizing for the times we don't show up for them. Demonstrating that mistakes and missteps are repairable and that it's never too late to mend broken trust, this book is a powerful guide to cultivating your child's healthy emotional landscape.

Child Rearing in America Neal Halfon, Kathryn Taaffe McLearn, Mark A. Schuster, 2002-07-08 This rich and well-researched volume comes in the wake of intense national interest in young children. Leading scholars from diverse disciplines use relevant data from the Commonwealth Survey of Parents with Young Children to present new information about the lives of families with very young children - how parents spend their time with their children, the economic and social challenges they face, and the supports they receive to improve their children's health and development. Such a broad portrait based on nationally representative data has not been attempted before. Drawing on their extensive expertise and research in the issues being addressed, the authors examine and elaborate on the survey findings. They synthesize the major themes emerging from the data and consider the family, community, and policy implications to frame and interpret the results. What emerges is a picture of the complex forces that influence families and child-rearing in the early years.

Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their

knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Danish Way of Parenting Jessica Joelle Alexander, Iben Sandahl, 2016-06-29 International bestseller As seen in The

Wall Street Journal--from free play to cozy together time, discover the parenting secrets of the happiest people in the world What makes Denmark the happiest country in the world--and how do Danish parents raise happy, confident, successful kids, year after year? This upbeat and practical book presents six essential principles, which spell out P-A-R-E-N-T: Play is essential for development and well-being. Authenticity fosters trust and an inner compass. Reframing helps kids cope with setbacks and look on the bright side. Empathy allows us to act with kindness toward others. No ultimatums means no power struggles, lines in the sand, or resentment. Togetherness is a way to celebrate family time, on special occasions and every day. The Danes call this hygge--and it's a fun, cozy way to foster closeness. Preparing meals together, playing favorite games, and sharing other family traditions are all hygge. (Cell phones, bickering, and complaining are not!) With illuminating examples and simple yet powerful advice, *The Danish Way of Parenting* will help parents from all walks of life raise the happiest, most well-adjusted kids in the world.

Life Ki-Do Parenting Jonathan Hewitt, Lana Hewitt, 2012-07 Under the tremendous pressure and influence of peers and media today, children are being conditioned to follow the American Happiness Formula: look good + perform well + get approval = happiness. Yet rather than offering fulfillment and confidence, this outwardly based quest is causing alarming rates of childhood stress, anxiety, and depression. Life Ki-do Parenting provides the antidote, giving you the techniques to help your child find true and lasting happiness from within. Integrating twenty years of experience teaching life skills and martial arts to thousands of children, twenty-five years of mindfulness and meditation study, and data and research from modern psychology and neuroscience, Jonathan Hewitt developed the Tools for Life system, made up of four powerful components: River Check-in for improving focus River Effort for building confidence and a strong sense of self A-B Formula for developing resilience when facing life's challenges My Shoes, Your Shoes, Our Shoes for cultivating social intelligence These four original tools empower children with the critical skills they need to thrive today and into adulthood. Going beyond concept and theory, they give you kid-friendly vocabulary and a simple process for helping your children look inward to monitor themselves rather than looking outward to others for their validation and self-worth. What greater peace can you have as a parent than knowing you have given your child the roots and wings to successfully navigate their way through life?

Untigering Iris Chen, 2021-03-05 Peaceful parenting is hard enough for the average parent. Imagine trying to do it when you have the instincts of a tiger mother. In *Untigering*, Iris Chen shares her journey of leaving behind authoritarian tiger parenting to embrace a respectful, relational way of raising children. As a Chinese American mom, she draws from her experiences of living in both North America and Asia and offers insights and practices to: Heal from your childhood wounds? Change your beliefs about yourself and your children? Parent through connection instead of control? Redefine your understanding of success? Navigate and challenge cultural norms Iris calls for a radical shift from parenting that is rooted in power to one that is grounded in partnership, but she does so with humor, humility, and empathy. This book is her invitation to you to begin your own journey of transformation as a parent.

The Whole-Brain Child Daniel J. Siegel, Tina Payne Bryson, 2012-03-21 A NEW YORK TIMES BESTSELLER Your toddler throws a tantrum in the middle of a store. Your preschooler refuses to get dressed. Your fifth-grader sulks on the bench instead of playing on the field. Do children conspire to make their parents' lives endlessly challenging? No — it's just their developing brain calling the shots! In this pioneering, practical book, Daniel J. Siegel, neuropsychiatrist and author of the bestselling book *Mindsight*, and parenting expert Tina Payne Bryson demystify the meltdowns and aggravation, explaining the new science of how a child's brain is wired and how it matures. The "upstairs brain," which makes decisions and balances emotions, is under construction until the mid-twenties. And especially in young children, the right brain and its emotions tend to rule over the logic of the left brain. No wonder kids can seem — and feel — so out of control. By applying these discoveries to everyday parenting, you can turn any outburst, argument, or fear into a chance to integrate your child's brain and foster vital growth. Raise calmer, happier children using twelve key strategies, including: Name It to Tame It: Corral raging right-brain behaviour through left-brain storytelling, appealing to the left brain's affinity for words and reasoning to calm emotional storms and bodily tension. Engage, Don't Enrage: Keep your child thinking and listening, instead of purely reacting. Move It or Lose It: Use physical activities to shift your child's emotional state. Let the Clouds of Emotion Roll By: Guide your children when they are stuck on a negative emotion, and help them understand that feelings come and go. SIFT: Help children pay attention to the Sensations, Images, Feelings, and Thoughts within them so that they can make better decisions and be more flexible. Connect Through Conflict: Use discord to encourage empathy and greater social success. Complete with clear explanations, age-appropriate strategies for dealing with day-to-day struggles, and illustrations that will help you explain these concepts to your child, *The Whole-Brain Child* shows you how to cultivate healthy emotional and

intellectual development so that your children can lead balanced, meaningful, and connected lives.
