Porth Carol Mattson Porth, 2009

Progressive Foreign Policy David Held, David Mepham, 2007 In May 1997, the then UK Foreign Secretary, Robin Cook, famously said that foreign policy should have 'an ethical dimension', and that the Labour Government would 'put human rights at the heart of foreign policy'. Although not described in these terms, these assertions were an attempt to articulate a 'progressive' conception of foreign policy for the UK. But how does the foreign policy record of the Labour Government stand when set against these declared principles? What role have ethics really played in Labour's foreign policy? Why has Labour been so interventionist, from Kosovo to Iraq? What does this record tell us about the limits and the possibilities of progressive foreign policy? What does it tell us about the strengths and failures of Labour's foreign policy? This timely book, published in association with the Institute for Public Policy Research and the Centre for Global Governance at the LSE, addresses these questions and provides an appraisal of Labour's record in power. However, the book also looks forward. It provides a novel assessment of the international trends that will shape the global context of UK foreign policy. The contributors set out new perspectives and policy options in respect of international security, democracy, justice, human rights, and sustainability. In addition, the book offers fresh thinking on the UK's relationship with key countries and regions, from the US to Europe, from the Middle East to China. Moreover, it suggests a radical new approach to global governance and to the way in which the UK makes and implements foreign policy. At a time of real flux in UK domestic politics and of rapid change in international politics, this book is an indispensable guide to the UK's foreign policy options and to the prospects and possibilities of a more values-driven and effective UK foreign policy.

The Philosophy of Palliative Care Fiona Randall, R S Downie, 2006-02-23 The philosophy of palliative care has long remained undisputed by health care professionals and philosophers. This unique book reviews the ethical problems inherent within care of the terminally ill. It suggests a new philosophy statement that could improve clinical care and take the specialty forward.

Promoting Cardiovascular Health in the Developing World Institute of Medicine, Board on Global Health, Committee

on Preventing the Global Epidemic of Cardiovascular Disease: Meeting the Challenges in Developing Countries,2010-06-29 Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the risk of chronic diseases, and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined.

Patient Safety Sidney Dekker,2011-05-20 Increased concern for patient safety has put the issue at the top of the agenda of practitioners, hospitals, and even governments. The risks to patients are many and diverse, and the complexity of the healthcare system that delivers them is huge. Yet the discourse is often oversimplified and underdeveloped. Written from a scientific, human factors perspective, *Patient Safety: A Human Factors Approach* delineates a method that can enlighten and clarify this discourse as well as put us on a better path to correcting the issues. People often think, understandably, that safety lies mainly in the hands through which care ultimately flows to the patient—those who are closest to the patient, whose decisions can mean the difference between life and death, between health and morbidity. The human factors approach refuses to lay the responsibility for safety and risk solely at the feet of people at the sharp end. That is where we should intervene to make things safer, to tighten practice, to focus attention, to remind people to be careful, to impose rules and guidelines. The book defines an approach that looks relentlessly for sources of safety and risk everywhere in the system—the designs of devices; the teamwork and coordination between different practitioners; their communication across hierarchical and gender boundaries; the cognitive processes of individuals; the organization that surrounds, constrains, and empowers them; the economic and human resources offered; the technology available; the political landscape; and even the culture of the place. The breadth of the human factors approach is itself testimony to the realization that there are no easy answers or silver bullets for resolving the issues in patient safety. A user-friendly introduction to the approach, this book takes the complexity of health care seriously and doesn't over simplify the problem. It demonstrates what the approach does do, that is

offer the substance and guidance to consider the issues in all their nuance and complexity.

Psychodynamic Formulation Deborah L. Cabaniss, Sabrina Cherry, Carolyn J. Douglas, Ruth L. Graver, Anna R. Schwartz, 2013-03-22 How do our patients come to be the way they are? What forces shape their conscious and unconscious thoughts and feelings? How can we use this information to best help them? Constructing psychodynamic formulations is one of the best ways for mental health professionals to answer questions like these. It can help clinicians in all mental health settings understand their patients, set treatment goals, choose therapeutic strategies, construct meaningful interventions and conduct treatment. Despite the centrality of psychodynamic formulation to our work with patients, few students are taught how to construct them in a clear systematic way. This book offers students and practitioners from all fields of mental health a clear, practical, operationalized method for constructing psychodynamic formulations, with an emphasis on the following steps: DESCRIBING problems and patterns REVIEWING the developmental history LINKING problems and patterns to history using organizing ideas about development. The unique, up-to-date perspective of this book integrates psychodynamic theories with ideas about the role of genetics, trauma, and early cognitive and emotional difficulties on development to help clinicians develop effective formulations. *Psychodynamic Formulation* is written in the same clear, concise style of *Psychodynamic Psychotherapy: A Clinical Manual* (Wiley 2011). It is reader friendly, full of useful examples, eminently practical, suitable for either classroom or individual use, and applicable for all mental health professionals. It can stand alone or be used as a companion volume to the Clinical Manual.

Corporate Crime in the Pharmaceutical Industry (Routledge Revivals) John Braithwaite, 2013-10-08 First published in 1984, this book examines corporate crime in the pharmaceutical industry. Based on extensive research, including interviews with 131 senior executives of pharmaceutical companies in the United States, the United Kingdom, Australia, Mexico and Guatemala, the book is a major study of white-collar crime. Written in the 1980s, it covers topics such as international bribery and corruption, fraud in the testing of drugs and criminal negligence in the unsafe manufacturing of drugs. The author considers the implications of his findings for a range of strategies to control corporate crime, nationally and internationally.

Communication and Bioethics at the End of Life Lori A. Roscoe, David P. Schenck, 2017-12-07 This casebook provides a set of cases that reveal the current complexity of medical decision-making, ethical reasoning, and communication at the end of life for hospitalized patients and those who care for and about them. End-of-life issues are a controversial part of medical practice and of everyday life. Working through these cases illuminates both the practical and philosophical challenges presented by the moral problems that surface in contemporary end-of-life care. Each case involved real people, with varying goals and constraints, who tried to make the best decisions possible under demanding conditions. Though there were no easy

solutions, nor ones that satisfied all stakeholders, there are important lessons to be learned about the ways end-of-life care can continue to improve. This advanced casebook is a must-read for medical and nursing students, students in the allied health professions, health communication scholars, bioethicists, those studying hospital and public administration, as well as for practicing physicians and educators.

Hermeneutics Paul Ricoeur, 2013-02-04 Paul Ricoeur's contribution to the theory of interpretation, or hermeneutics, is considerable: he ranks among the masters of this discipline alongside Schleiermacher, Dilthey, Heidegger and Gadamer. In addition to major works like *The Conflict of Interpretations*, he wrote many articles and shorter texts which deserve to be discovered and rediscovered. These allow us to gain a deeper understanding of the development of his work over time and to appreciate the full range of his contribution. Some of the texts examine the nature of metaphor while others guide the reader through the many challenges of the hermeneutic problem - from the symbol to the text, then to the text as action, taking full account of the ethical implications. Here one encounters Ricoeur's reflections on the future of hermeneutics and his abiding concern to explore the relations between hermeneutics and analytical philosophy. Ricoeur's contribution to biblical hermeneutics has also been decisive. Two masterful studies in this volume attest to Ricoeur's attempt to explore the relations between revelation and truth, on the one hand, and between myths of salvation and reason, on the other. This book - the second volume of Ricoeur's writings and lectures - brings together texts which appeared between 1972 and 2006. It is published under the auspices of Le Fonds Ricoeur.

Media Work Mark Deuze, 2013-05-08 The media are home to an eclectic bunch of people. This book is about who they are, what they do, and what their work means to them. Based on interviews with media professionals in the United States, New Zealand, South Africa, and The Netherlands, and drawing from both scholarly and professional literatures in a wide variety of disciplines, it offers an account of what it is like to work in the media today. Media professionals face tough choices. Boundaries are drawn and erased: between commerce and creativity, between individualism and teamwork, between security and independence. Digital media supercharge these dilemmas, as industries merge and media converge, as audiences become co-creators of content online. The media industries are the pioneers of the digital age. This book is a critical primer on how media workers manage to survive, and is essential reading for anyone considering a career in the media, or who wishes to understand how the media are made.

Psychiatric Nursing Mary Ann Boyd, 2008 The AJN Book of the Year award-winning textbook, *Psychiatric Nursing: Contemporary Practice*, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the

biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

Governance for Health in the 21st Century Ilona Kickbusch, David Gleicher, 2012 A range of collaborative governance mechanisms has developed in many policy arenas in the past decade. The study on governance for health in the 21st century tracks governance innovations that have been introduced to address priority determinants of health and summarizes them as five strategic approaches to smart governance for health. The study relates the emergence of joint action of the health sector and non-health sectors, of public and private actors and of citizens to achieve seminal changes in 21st-century societies. They include a new understanding of health and well-being as key features of what constitutes a successful society and vibrant economy and the higher value placed on equity and participation. The study further describes the type of structures and mechanisms that enable collaboration and outlines the new role that health ministers and ministries and public health agencies need to adopt in such a challenging policy environment.

Introducing Social Work Lena Dominelli, 2009-03-16 In this lively introduction suitable for students at any level, Lena Dominelli explores the extraordinary scope and importance of social work. Using engaging examples from contemporary social work practice, she clearly answers questions about what social work is, how social workers work in a variety of settings and the clients they are likely to deal with. She tackles head on the dilemmas social workers face in their day-to-day work and the challenges of working with limited resources and marginalized social groups such as the elderly, the homeless and abused children. This work will affirm the valuable contribution social workers can make to human wellbeing and demonstrate how the promise and potential of social work can be, and is, realized.

Ecovillages Karen T. Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis, who is devising ways of living that will work for the long haul? And how can we, as individuals, make a difference? To answer these fundamental questions, Professor Karen Litfin embarked upon a journey to many of the world's ecovillages—intentional communities at the cutting-edge of sustainable living. From rural to urban, high tech to low tech, spiritual to secular, she discovered an under-the-radar global movement making positive and radical changes from the ground up. In this inspiring and insightful book, Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows - ecology, economics, community, and consciousness - or E2C2. Whether we live in an ecovillage or a city, she contends, we must incorporate these four key elements if we wish to harmonize our lives with our home planet. Not only is another world possible, it is already being born in small pockets the world over. These micro-societies, however, are small and time is short. Fortunately - as Litfin persuasively argues - their successes can be applied to existing social structures,

from the local to the global scale, providing sustainable ways of living for generations to come. You can learn more about Karen's experiences on the Ecovillages website: <http://ecovillagebook.org/>

Social Justice in a Global Age Olaf Cramme, Patrick Diamond, 2018-03-08 What is the relationship between the principles of social justice and global justice? How can we best reconcile the quest for greater social justice 'at home' with greater social justice in the world? Are the social justice pressures our societies currently face the result of globalisation or are they domestically generated? How can we advance social justice in the light of the new social realities? In this volume, leading international experts offer compelling answers to these questions. The aim of this volume is to articulate a modern conception of social justice that remains relevant for an era of rapid globalisation. The authors have developed a robust theoretical account of the relationship between globalisation and social justice complemented by an underpinning policy framework that aims to sustain new forms of equity and solidarity.

Alter-Globalization Geoffrey Pleyers, 2013-04-23 Contrary to the common view that globalization undermines social agency, 'alter-globalization activists', that is, those who contest globalization in its neo-liberal form, have developed new ways to become actors in the global age. They propose alternatives to Washington Consensus policies, implement horizontal and participatory organization models and promote a nascent global public space. Rather than being anti-globalization, these activists have built a truly global movement that has gathered citizens, committed intellectuals, indigenous, farmers, dalits and NGOs against neoliberal policies in street demonstrations and Social Forums all over the world, from Bangalore to Seattle and from Porto Alegre to Nairobi. This book analyses this worldwide movement on the bases of extensive field research conducted since 1999. *Alter-Globalization* provides a comprehensive account of these critical global forces and their attempts to answer one of the major challenges of our time: How can citizens and civil society contribute to the building of a fairer, sustainable and more democratic co-existence of human beings in a global world?
