Parker J. Palmer, Arthur Zajonc, Megan Scribner

The Heart of Higher Education Parker J. Palmer, Arthur Zajonc, Megan Scribner, 2010-07-26 A call to advance integrative teaching and learning in higher education. From Parker Palmer, best-selling author of *The Courage to Teach*, and Arthur Zajonc, professor of physics at Amherst College and director of the academic program of the Center for Contemplative Mind in Society, comes this call to revisit the roots and reclaim the vision of higher education. *The Heart of Higher Education* proposes an approach to teaching and learning that honors the whole human being—mind, heart, and spirit—an essential integration if we hope to address the complex issues of our time. The book offers a rich interplay of analysis, theory, and proposals for action from two educators and writers who have contributed to developing the field of integrative education over the past few decades. Presents Parker Palmer's powerful response to critics of holistic learning and Arthur Zajonc's elucidation of the relationship between science, the humanities, and the contemplative traditions Explores ways to take steps toward making colleges and universities places that awaken the deepest potential in students, faculty, and staff Offers a practical approach to fostering renewal in higher education through collegiality and conversation *The Heart of Higher Education* is for all who are new to the field of holistic education, all who want to deepen their understanding of its challenges, and all who want to practice and promote this vital approach to teaching and learning on their campuses.

Acts of Infidelity Lena Andersson, 2018-05-17 'A novel of heartbreak told with intellectual rigor. It gripped me from first page to last. Fantastic!' Alice Sebold, the author of *The Lovely Bones* When Ester Nilsson meets the actor Olof Sten, she falls madly in love. Olof makes no secret of being married, but he and Ester nevertheless start to meet regularly and begin to conduct a strange dance of courtship. Olof insists he doesn't plan to leave his wife, but he doesn't object to this new situation either . . . it's far too much fun. Ester, on the other hand, is convinced that things might change. But as their relationship continues over repeated summers of distance, and winters of heated meetings in bars, she is forced to realize the truth: Ester Nilsson has become a mistress. To read *Acts of Infidelity* is to dive inside the mind of a brilliant, infuriating friend - Ester's and Olof's entanglements and arguments are the stuff of relationship nightmares. Cutting, often cruel, and written with razor-sharp humour, Lena Andersson's novel is clever, painful, maddening, but most of all perfectly, precisely true.

Readings in Advertising, Society, and Consumer Culture Roxanne Hovland, Joyce M. Wolburg, Eric E.

Haley,2014-12-18 This collection of classic and contemporary articles provides context for the study of advertising by exploring the historical, economic, and ideological factors that spawned the development of a consumer culture. It begins with articles that take an institutional and historical perspective to provide background for approaching the social and ethical concerns that evolve around advertising. Subsequent sections then address the legal and economic consequences of life in a material culture; the regulation of advertising in a culture that weighs free speech against the needs of society; and the ethics of promoting materialism to consumers. The concluding section includes links to a variety of resources such as trade association codes of ethics, standards and guidelines for particular types of advertising, and information about self-regulatory organizations.

Culture in Language Learning Hanne Leth Andersen,2006-05-01 Classical and modern foreign language studies no longer have a well-defined subject area, and language and culture can no longer be defined according to nations and national identities. New approaches are being developed with theoretical and methodological points of departure in new areas of research: for example, culture studies, anthropology, sociology, pragmatics and conversation analyses. The aim of modern language studies must therefore be redefined, and be more open for variation and diversity, both in culture and communication. The book discusses the relation between language and culture and is a direct result of the conference Culture in Language Learning, organised under the auspices of the Danish Language and Culture Network, which assembles researchers from language disciplines in Denmark. The aim is to examine how culture comes into the actual language code; into the use of language; and not least, into the learning and teaching of language. One of the book's main problematic areas thus concerns the learning and teaching of foreign and second languages in a globalised world where languages play a new role, both for the individual person, by virtue of internationalisation of education and work-life, and for cooperation across national borders. The articles elucidate these problematic points in relation to the historic development of foreign language disciplines, the meeting of language and culture, teaching traditions and language appropriation theories.

Phraseology in English Academic Writing Peter Andrew Howarth,1996 This study examines the use of one category of prefabricated language (restricted lexical collocations) in native and non-native academic English in the social sciences, in an attempt to throw light on a neglected aspect of learner competence. It first surveys the existing theoretical viewpoints on word combinations and then reviews experimental research into the psycholinguistic processing of prefabricated language, which suggest that the role of conventional expressions is to facilitate fluent production and rapid comprehension. A computer-based corpus of native academic writing is analysed to discover to what extent and how such collocations are used in formal written English. Conventionality of style, it is suggested, aids precision of expression, clearly a quality highly valued in academic argument. A corpus of non-native writing is then subjected to a similar analysis. While the collocational errors

learners make do not on the whole seriously destroy intelligibility, they can lead to a lack of precision and obscure the clarity of expression required in academic communication. Pedagogical implications are then considered, and it is seen that for the most part published teaching materials have failed to recognize the nature of collocations in general and offer little help. The final part of the study examines the treatment of restricted collocations in both general and phraseological dictionaries for learners. These are evaluated on their selection and presentation of collocations shown by the preceding research to be problematic for advanced learners. The conclusion suggests that, for such learners, who are mostly studying the language independently, good reference works are needed in the form of specialist collocational dictionaries. The results of this research help to establish principles for the design of such dictionaries.

Testing for Language Teachers Arthur Hughes, 2003 This second edition remains the most practical guide to testing language. It has a new chapter on testing young learners.

Cultural Awareness Barry Tomalin, Susan Stempleski, 2013-07-15 This very popular series gives teachers practical advice and guidance, together with resource ideas and materials for the classroom.

Excellence in University Assessment David Carless, 2015-04-24 Assessment in higher education is an area of intense current interest, not least due to its central role in student learning processes. Excellence in University Assessment is a pioneering text which contributes to the theory and practice of assessment through detailed discussion and analysis of award-winning teaching across multiple disciplines. It provides inspiration and strategies for higher education practitioners to improve their understanding and practice of assessment. The book uses an innovative model of learning-oriented assessment to analyze the practice of university teachers who have been recipients of teaching awards for excellence. It critically scrutinizes their methods in context in order to develop key insights into effective teaching, learning and assessment processes. Pivotal topics include: Competing priorities in assessment and ways of tackling them; The nature of quality assessment task design; The student experience of assessment; Promoting student engagement with feedback. An indispensable contribution to assessment in higher education, Excellence in University Assessment is a valuable guide for university leaders, middle managers, staff developers, teachers and researchers interested in the crucial topic of assessment.

Writing in Gold Robin Cormack, 1985 Writing in Gold is a bold and challenging statement about the importance of the visual arts in a largely illiterate society. Exploring the height of Byzantine society from the 6th to the 12th centuries through a survey of the period's surviving paintings, mosaics, and metalware, the book shows how these art objects molded attitudes and beliefs in the medieval world. The examples chosen cover the full range of Byzantine society from the sophisticated urban environment of Constantinople, where emperors used art to maintain loyalty and support for the system, to the life of a small community on Cyprus, where a recluse used art to glorify himself to his disciples. Written in a lively style, and drawing on new and original material throughout, Writing in Gold illuminates an intriguing period in art history.

Feedback For Learning Susan Askew, 2004-11-23 Teachers may be surrounded by feedback and involved in it every day, but the notion is poorly analysed and poorly used. Feedback for Learning provides an important collection of contributions to the highly topical theme of feedback to support learning. The book spans three major areas which affect all teachers: *young people's learning *teachers' learning *organisational learning. The authors critically examine the assumption that feedback necessarily has positive learning outcomes and describe models and practices which are more likely to result in effective learning at the individual, group and organisational level.

The Secret Life of Secrets Michael Slepian, 2022-06-07 "If you've ever wondered why we keep secrets and what motivates us to spill them, look no further. Michael Slepian has spent the past decade studying the psychology of secrets, and is ready to reveal his findings to the world."—Adam Grant, #1 New York Times bestselling author of Think Again "The Secret Life of Secrets gracefully blends engaging stories with compelling science."—Sonja Lyubomirsky, University of California professor and author of The How of Happiness Think of a secret that you're keeping from others. It shouldn't take long; behavioral scientist Michael Slepian finds that, on average, we are keeping as many as thirteen secrets at any given time. His research involving more than 50,000 participants from around the world shows that the most common secrets include lies we've told, ambitions, addictions, mental health challenges, hidden relationships, and financial struggles. Our secrets can weigh heavily upon us. Yet the burden of secrecy, Slepian argues, rarely stems from the work it takes to keep a secret hidden. Rather, the weight of our secrets comes from carrying them alone, without the support of others. Whether we are motivated to protect our reputation, a relationship, a loved one's feelings, or some personal or professional goal, one thing is clear: Holding back some part of our inner world is often lonely and isolating. But The Secret Life of Secrets shows you that it doesn't have to be.

Filled with fresh insight into one of the most universal—yet least understood—aspects of human behavior, *The Secret Life of Secrets* sheds a fascinating new light on questions like: At what age do children develop the cognitive capacity for secrecy? Do all secrets come with the same mental load? How can we reconcile our secrets with our human desires to relate, connect, and be known? When should we confess our secrets? Who makes for the ideal confidant? And can keeping certain types of secrets actually enhance our well-being? Drawing on over a decade of original research, *The Secret Life of Secrets* reveals the surprising ways that secrets pervade our lives, and offers science-based strategies that make them easier to live with. The result is a rare window into the inner workings of our minds, our relationships, and our sense of who we are.

Artificial Vision Veit Peter Gabel, 2016-11-24 This book presents and analyses the most recent research dedicated to restoring vision in individuals who are severely impaired or blind from retinal disease or injury. It is written by the leading groups worldwide who are at the forefront of developing artificial vision. The book begins by discussing the difficulties in comparing and interpreting functional results in the area of very low vision and the principal prospects and limitations of spatial resolution with artificial tools. Further on, chapters are included by researchers who stimulate the surface or the pigment epithelial side of the retina and by experts who work on stimulating the optic nerve, the lateral geniculate body and the superficial layers of the visual cortex. *Artificial Vision: A Clinical Guide* collates the most recent work of key artificial vision research groups to explain in a comparable and stringent order their varying approaches, the clinical or preclinical outcomes and their achievements during the last years. Senior ophthalmic fellows and academic practitioners will find this guide to be an indispensable resource for understanding the current status of artificial vision.

The Elegiac Cityscape Tara S. Welch, 2005

The Modern British Novel Malcolm Bradbury, 1993 Bradbury argues that almost a century since the emergence of Modernism, it is now possible to see the entire period in perspective. It is clear that the first 50 years - from Henry James, Wilde and Stevenson, through James Joyce, Lawrence, Forster, to Huxley, Isherwood and Orwell - have been extensively discussed in print. The years since World War II, though, have not been examined in depth, yet have produced talents such as Graham Greene, Angus Wilson, Beckett, Doris Lessing, Margaret Drabble, Angela Carter, Ian McEwan, Kingsley and Martin Amis, Julian Barnes, Fay Weldon, Salman Rushdie and Timothy Mo.
