Secret of Longevity Bi Dri Seraphin Kouassi, 2012 Stop the Clock of Disease or Illness and Increase Your Life Span We live in a toxic and stressful world. This book talks about the guidelines that we must follow to reverse the devastation of diseases or illnesses, maintain good health and overall well-being. These guidelines are related to the strict respect of nature's laws, which comprises of the following elements: pure water, fresh air, sunlight, exercise, supplements, and health-enhancing food, and regular body system detoxification. Certain foods are bad for our body system because the body is unable to use them for its functioning. These we call death foods or death water. The consumption of these lead to the accumulation of toxins within the body system, making it weak and unable to defend or heal itself. It is better to prevent than cure diseases or illnesses. Do not join the camp of the foolish who say life is short or man must die from something, but instead, you must carefully select all foods that you eat and cosmetic products that you use. Have a regular exercise and body system detoxification. Those things constitute the secret of longevity with full vitality, fitness, beauty, and energy. You must remember that our skin is the first body system defense, so it is very important that we treat our skin with respect and caution using natural cosmetic products. This book also talks about skin care, weight loss, and the use of natural remedies to cure over fifty diseases and illnesses. Mr. Bi Dri Seraphin Kouassi studied in College of Naturopathic Medicine and University of Greenwich. He holds BSc (Hons) in biomedical science and is the founder of the Nutri Health House, whose primary goal is to help people of all background to understand the importance of the use of natural and raw organic products in our daily life.

Cancer Can Be Cured! Father Romano Zago, 2008-11-24 Father Romano Zago, a Franciscan Friar and scholar, wrote the book *Cancer Can Be Cured* to reveal to the world an all natural Brazilian Recipe that contains the juice made from the whole leaf plant of Aloe Arborescens and honey that has been shown to rapidly restore the body's health so it heals itself of all types of cancer. The book tells how it was while administering to the poor in the shantytown of Rio Grande do Sul, Brazil that he and the provincial Father Arno Reckziegel, witnessed the healing of simple people of cancer who used this recipe. Later, when he had assignments in Israel and Italy where this aloe species grows naturally he continued to see great success in the chronically ill being cured when he recommended they use this recipe. This inspired for him to spend the next 20 years in researching the science behind this aloe species and the publication of that research in this book along with his numerous

first hand anecdotes of cancer healing by those using the Brazilian juice recipe. Chapters include information on how to prepare the recipe using the three ingredients of whole leaf Aloe arborescens juice, honey and a small amount of distillate (1%); how to take the preparation; questions and answers on everything from how to pick the aloe leaves, why each of the three ingredients is important in the recipe, the types of cancer that have been cured using the recipe, other diseases and health problems the recipe has shown to be beneficial in helping the human body solve; the internationalization of the recipe on five continents; anecdotal stories of some body healings; the composition of Aloe; and Aloe and Aids. There has been much publicized scientific research and literature on the synergistic benefits of the 300 phytotherapeutic biochemical and nutrient constituents of Aloe vera to aid the body's defenses to enhance the immune system and protect against diseases. However, this is the first book to reveal the little known potency

Aloe Isn't Medicine and Yet... It Cures! Ofm Father Romano Zago,2008-12 Zago presents the curative properties of Aloe and shows how to use this plant in curing over 100 types of illnesses, including obesity and depression.--Back cover.

Cancer - not my story Andrew Mathews,2012-05-10 Need help in curing cancer ? Chances are that almost every second westerner will develop some sort of cancer during its lifetime. Or are you just looking for prevention... Anyway look no further. This book addresses numerous possible reasons for cancer development from radiation, genetics and food consumption. It reveals some stunning little known facts like importance of pH balance and dangers of consumption of sugar, aspartame, chlorine, food additives etc. It describes healing protocols like flax seed treatment, bob beck protocol, cesium protocol, aloe vera etc. Human body also has plenty of protection mechanisms like autophagy process which recycles damaged organelles when starving of food and stuff like tumor suppressor genes but all that may not be enough. When diagnosed with cancer people usually fall into panic but in most cases it doesn't need to be so. Overall, book contains plenty of tips and advices on how to stay clear from this menace.

Aloe Vera and Aloe Aborescens Michael O'Halloron,2017-05-10 Aloe Vera and Aloe ArborescensLearn How to Beat The Pharmaceutical Companies and Enjoy a Healthier Life.!Most of us are familiar with the very popular household plant known as Aloe Vera. Thanks to today's world of advertising mediums, we are familiar with many of the products that contain or are based on Aloe vera. It seems that its many health benefits make it a must for everything from skin lotion to toothpaste and

even latex gloves. We know it is used for conditions such as burns, skin rashes, cuts and bruises and other health related aides, but unfortunately it is seldom used to its full potential. If you are one of the empowered few that is making full use of this little medicinal wonder, you are to be congratulated because that is rare! Aloe is replete with vitamins, minerals, and essential amino acids. Its impressive nutrient profile has been shown to lead to the following health benefits: * Improved digestion * Aids in detoxification * Boosts the immune system * Anti-Inflammatory * Anti-Cancerous * Helps with diabetes * Great for your skin (when consumed internally and applied externally) * Improved cholesterol * Heart friendly For these reasons alone Aloe vera is considered to be a bonafide superfood and many people consume it on a daily basis to maintain good health. It is simply a must in every modern household. But let me ask you. Are you aware of Aloe Vera's sister plant that is almost twice as powerful? The rest of the world knows of and uses this plant, but it is little known in the U.S. This plant is credited with curing or repressing cancer and even HIV, as well as a host of other health problems from digestive disorders to a diabetes cure. Its biological name is Aloe Arborescens-but it is frequently called The Miracle Plant! If you or someone close to you is combating a terrible health problem and is undergoing the traditional treatments, you should grab this information, digest it, verify it and either use it yourself or pass it on to them. What will you have to lose? When it comes to your health, time and money should mean little. With the cost of healthcare ever on the rise, is it any wonder people are searching for alternative solutions to medical problems? Many uses and solutions have been around for centuries, throughout the world, but have been forgotten and are only recently being re-discovered. For instance, in the Americas, the Mayan women used the plant to hydrate their skin and to wean babies. The Seminole Indians of the Florida region believed the Aloe was capable of rejuvenation and considered it the fountain of youth. Become aware of the basis behind these beliefs. In this book will discover things like: * Learn about Aloe Vera and her sister's potential as a medicinal aide. * Learn how Aloe is used as a potential cure for Diabetes and Cancer and long list of other health problems. * Learn the formula for this magical elixir. * Learn how Aloe Vera can help your pets. * Discover how to care for and grow these wonderful little plants. * Try some recipes for the many uses of the Aloe plant. * Learn to practice preventative care using both Aloes. Re-discover Aloe Vera and Aloe Arborescens for your own health and welfare. Healthy Living in a Leaf. Tango Lessons Marilyn G. Miller, 2014-02-07 From its earliest manifestations on the street corners of nineteenth-century Buenos Aires to its ascendancy as a global cultural form, tango has continually exceeded the confines of the dance floor or the music hall. In *Tango Lessons*, scholars from Latin America and the United States explore tango's enduring vitality. The interdisciplinary group of contributors—including specialists in dance, music, anthropology, linguistics, literature, film, and fine art—take up a broad range of topics. Among these are the productive tensions between tradition and

experimentation in tango nuevo, representations of tango in film and contemporary art, and the role of tango in the imagination of Jorge Luis Borges. Taken together, the essays show that tango provides a kaleidoscopic perspective on Argentina's social, cultural, and intellectual history from the late nineteenth to the early twenty-first centuries. Starter Cultures in Food Production Barbara Speranza, Antonio Bevilacqua, Maria Rosaria Corbo, Milena Sinigaglia, 2016-12-20 Starter cultures have great significance in the food industry due to their vital role in the manufacture, flavour, and texture development of fermented foods. Once mainly used in the dairy industry, nowadays starter cultures are applied across a variety of food products, including meat, sourdough, vegetables, wine and fish. New data on the potential health benefits of these organisms has led to additional interest in starter bacteria. Starter Cultures in Food Production details the most recent insights into starter cultures. Opening with a brief description of the current selection protocols and industrial production of starter cultures, the book then focuses on the innovative research aspects of starter cultures in food production. Case studies for the selection of new starter cultures for different food products (sourdough and cereal based foods, table olives and vegetables, dairy and meat products, fish and wine) are presented before chapters devoted to the role of lactic acid bacteria in alkaline fermentations and ethnic fermented foods. This book will provide food producers, researchers and students with a tentative answer to the emerging issues of how to use starter cultures and how microorganisms could play a significant role in the complex process of food innovation.

Divine Names on the Spot Fabio Porzia, Corinne Bonnet, 2023 'Ancient Greek and Semitic languages resorted to a large range of words to name the divine. Gods and goddesses were called by a variety of names and combinations of onomastic attributes. This broad lexicon of names is characterised by plurality and a tendency to build on different sequences of names; therefore, the Mapping Ancient Polytheisms project focuses on the process of naming the divine in order to better understand the ancient divine in terms of a plurality in the making. A fundamental rule for reading ancient divine names is to grasp them in their context - time and place, a ritual, the form of the discourse, a cultural milieu....: a deity is usually named according to a specific situation. From Artemis Eulochia to al-Lat, al-'Uzza and Manat, from Melqart to my rock in the biblical book of Psalms, this volume journeys between the sanctuary on Mount Gerizim and late antique magical practices, revisiting

rituals, hymnic poetry, oaths of orators and philosophical prayers. While targeting different names in different contexts, the contributors draft theoretical propositions towards a dynamic approach of naming the divine in antiquity.'
