New Worlds, New Horizons in Astronomy and Astrophysics National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Board on Physics and Astronomy,Committee for a Decadal Survey of Astronomy and Astrophysics,2011-02-04 Driven by discoveries, and enabled by leaps in technology and imagination, our understanding of the universe has changed dramatically during the course of the last few decades. The fields of astronomy and astrophysics are making new connections to physics, chemistry, biology, and computer science. Based on a broad and comprehensive survey of scientific opportunities, infrastructure, and organization in a national and international context, *New Worlds, New Horizons in Astronomy and Astrophysics* outlines a plan for ground- and space- based astronomy and astrophysics for the decade of the 2010's. Realizing these scientific opportunities is contingent upon maintaining and strengthening the foundations of the research enterprise including technological development, theory, computation and data handling, laboratory experiments, and human resources. *New Worlds, New Horizons in Astronomy and Astrophysics* proposes enhancing innovative but moderate-cost programs in space and on the ground that will enable the community to respond rapidly and flexibly to new scientific discoveries. The book recommends beginning construction on survey telescopes in space and on the ground to investigate the nature of dark energy, as well as the next generation of large ground-based giant optical telescopes and a new class of space-based gravitational observatory to observe the merging of distant black holes and precisely test theories of gravity. *New Worlds, New Horizons in Astronomy and Astrophysics* recommends a balanced and executable program that will support research surrounding the most profound questions about the cosmos. The discoveries ahead will facilitate the search for habitable planets, shed light on dark energy and dark matter, and aid our understanding of the history of the universe and how the earliest stars and galaxies formed. The book is a useful resource for agencies supporting the field of astronomy and astrophysics, the Congressional committees with jurisdiction over those agencies, the scientific community, and the public.

Genealogy of the Exline and Axline Family Edythe Wilson Thoesen,Emma Miller Exline,1952 The immigrant with whom we are primarily interested was Georg Christoff Oechslen. Tradition has it that his family had lived in Alsace for a generation or two already after leaving Schaffhausen, and that his father had been impressed into the Army of Frederick William I ... [he] was born about 1705-1706 ... arrived in Philadelphia on October 2, 1727 on the ship Adventure ... apparently lived in the vicinity of Philadelphia for a few years, joining in that extensive excursion of the Pennsylvania Germans to Loudoun County, Virginia ... He was married about the same time, but whether in Pennsylvania or Virginia is not known, nor is the maiden name of his wife known, other than that she was called Catherine--Page 18. Descendants eventually adopted the surname Exline and Axline. Descendants lived in Pennsylvania, Virginia, Colorado, Kansas, Ohio, Iowa, Indiana, Illinois, Missouri, California and elsewhere
