Between Reform and Revolution David E. Barclay, Eric D. Weitz, 2002-09-01 The powerful impact of Socialism and Communism on modern German history is the theme which is explored by the contributors to this volume. Whereas previous investigations have tended to focus on political, intellectual and biographical aspects, this book captures, for the first time, the methodological and thematic diversity and richness of current work on the history of the German working class and the political movements that emerged from it. Based on original contributions from U.S., British, and German scholars, this collection address a wide range of themes and problems.

Contested Transparencies, Social Movements and the Public Sphere Stefan Berger, Dimitrij Owetschkin, 2019-10-18 This edited collection examines the multi-faceted phenomenon of transparency, especially in its relation to social movements, from a range of multi-disciplinary viewpoints. Over the past few decades, transparency has become an omnipresent catch phrase in public and scientific debates. The volume tracks developments of ideas and practices of transparency from the eighteenth century to the current day, as well as their semantic, cultural and social preconditions. It connects analyses of the ideological implications of transparency concepts and transparency claims with their impact on the public sphere in general and on social movements in particular. In doing so, the book contributes to a better understanding of social conflicts and power relations in modern societies. The chapters are organized into four parts, covering the concept and ideology of transparency, historical and recent developments of the public sphere and media, the role of the state as an agent of surveillance, and conflicts over transparency and participation connected to social movements.

Congruence in Contact-Induced Language Change Juliane Besters-Dilger, Cynthia Dermakar, Stefan Pfänder, Achim

Rabus,2014-08-22 Modern contact linguistics has primarily focused on contact between languages that are genetically unrelated and structurally distant. This compendium of articles looks instead at the effects of pre-existing structural congruency between the affected languages at the time of their initial contact, using the Romance and Slavic languages as examples. In contact of this kind, both genetic and typological similarities play a part.

The Implementation of the EU Services Directive Ulrich Stelkens,Wolfgang Weiß,Michael Mirschberger,2012-02-25 The Services Directive is one of the cornerstones for the realization of the EU internal market and is fundamental to economic and legal experts, as well as to the general public. This book analyses in detail the different steps taken by each of the 27 EU Member States in the implementation process of the Services Directive. It provides not only detailed information about the changes in national law adopted by the Member States, but also facilitates a comparison of the different implementation strategies. It gives an insight in the heterogeneity or homogeneity of implementation concepts and shows how European legislation affects legislation that were originally nationally dominated, such as the law of national administration. Valuable for academics interested in European and administrative law and the transposition of European lawmaking into domestic law, as well as for civil servants in ministries, chambers of commerce, local governments and other comparable institutions having to implement the Directive.

Bergbausammlungen in Deutschland Michael Farrenkopf,Stefan Siemer,2020-10-26 Eine methodisch reflektierte Auseinandersetzung mit dem materiellen Erbe des deutschen Steinkohlenbergbaus fehlte bislang. Die vorliegende Publikation beschäftigt sich in ihren Beiträgen daher sowohl mit den Prozessen einer bergbaubezogenen Musealisierung als auch exemplarisch mit der Erforschung und Erfassung einzelner Objekte und Sammlungen aus dem Montanhistorischen Dokumentationszentrum (montan.dok) des Deutschen Bergbau-Museums Bochum. Der Fokus liegt dabei insbesondere auf technischen Innovationen des 20. Jahrhunderts, die beispielsweise im Bereich der Grubenrettung, des Transports unter Tage oder der Kohलगewinnung einen wichtigen Abschnitt der Geschichte des industriellen Bergbaus illustrieren. Hinzu kommt erstmals eine Übersicht aller auf den Steinkohlenbergbau bezogenen musealen Einrichtungen in Deutschland, deren Spektrum von Vereinen über Stadtmuseen bis hin zu überregionalen Museumsverbänden reicht. Das Buch wendet sich einerseits an Historikerinnen und Historiker auf dem Gebiet der material culture studies, andererseits an all diejenigen, die aus historischer Perspektive eine Übersicht zur bergbaubezogenen Museumslandschaft in Deutschland suchen.

Writing Transnational History Fiona Paisley,Pamela Scully,2019-09-19 Over the past two decades, transnational history

has become an established term describing approaches to the writing of world or global history that emphasise movement, dynamism and diversity. This book investigates the emergence of the 'transnational' as an approach, its limits, and parameters. It focuses particular attention on the contributions of postcolonial and feminist studies in reformulating transnational historiography as a move beyond the national to one focusing on oceans, the movement of people, and the contributions of the margins. It ends with a consideration of developing approaches such as translocalism. The book considers the new kinds of history that need to be written now that the transnational perspective has become widespread. Providing an accessible and engaging chronology of the field, it will be key reading for students of historiography and world history.

Urban Integration Jan Polívka, 2019 In the context of Transforming City Regions, phenomena such as globalization and digitalization accelerate change and bring several aspects of life into motion. If used in a smart way, such developments might trigger a promising dynamic for local people, their living environment, and regional economy. *Urban Integration: From Walled City to Integrated City* reflects on the challenges such dynamics encompass and also on the significance of social integration in urban contexts. The book compiles contributions from researchers, practitioners, and students to an international symposium held at Essen Zollverein in May 2018.

Small Molecules in Oncology Uwe M. Martens, 2018-08-01 This book, written by respected experts, discusses in detail the latest developments in targeted oncology therapy using small molecules. It covers a wide range of small molecules, including tyrosine kinase inhibitors, mTOR, MEK, PARP, and multikinase inhibitors, as well as cell cycle and NTRK interacting agents. For each molecule, aspects such as the chemical structure, mechanism of action, drug targets, drug interactions, preclinical studies, clinical trials, treatment applications, and toxicity are discussed. Extensive research into the molecular mechanisms of cancer has heralded a new age of targeted therapy. The field of personalized cancer therapy is now growing rapidly, and the advances being made will mean significant changes in the treatment algorithms for cancer patients. Numerous novel targets that are crucial for the survival of cancer cells can be attacked by small molecules such as protein tyrosine kinase inhibitors. This book is the third edition of *Small Molecules in Oncology*, but has now been divided into two volumes, with the other volume focusing specifically on small molecules in hematology.
