Discapacidad e inclusión Silvio Rivero, 2021-11-03 La propuesta de este libro es pensar la discapacidad desde una perspectiva integral, vale decir considerando sus múltiples aspectos. Propuesta sostenida desde el Modelo Social de la discapacidad, con aportes conceptuales del psicoanálisis y de otras disciplinas y bajo el paradigma de los Derechos Humanos. Aportamos así dos herramientas: a) El Enfoque Integral de la Discapacidad (EID) que es nuestra forma de abordar la temática en sus variables políticas, jurídicas, educativas, laborales, sociales, etc. Opera en la dimensión de lo público. b) El Esquema de Abordaje Interdisciplinario (EAI) que es nuestra manera de abordar la discapacidad en el caso por caso y en la singular complejidad de la persona y su familia. Opera en la dimensión de lo íntimo. La producción se orienta a profesionales de la salud, de la educación, a quienes se desempeñen en el ámbito de la política y la administración y a todas las personas interesadas en la temática. Silvio Rivero es Licenciado en Psicología, Psicoanalista y docente. Doctorando en Psicología por la Universidad del Salvador (Bs As) con su Tesis "Abordaje terapéutico de la Discapacidad". Es director del Centro Integral de Discapacidad y presidente del Equipo de Docencia e Investigación "Discapacidad y Psicoanálisis", Capítulo de la Asociación Argentina de Salud Mental (AASM). Se desempeña en la Agencia Nacional de Discapacidad (ANDIS) como integrante de Junta Evaluadora de Personas para certificación de discapacidad. Realiza atención clínica particular en consultorio y supervisiones clínicas a instituciones y profesionales. Desarrolla cursos de capacitación a profesionales sobre la temática de inclusión de personas con discapacidad, en todo el país. Es responsable de Distintos e iguales, Programa de concientización y sensibilización para la inclusión de personas con discapacidad, del Centro Integral de Discapacidad (CID), el cual se implementa en escuelas de nivel primario y secundario de la Ciudad de Buenos Aires. Entre sus publicaciones se encuentran "Los límites de la Clínica" Editorial AASM (en coautoría), "Vidas partidas", Editorial Grama (en coautoría) y "Distintos e iguales. ¿Qué es la discapacidad?", declarado de Interés Educativo por la Legislatura de la Ciudad de Buenos Aires en diciembre de 2019. Autor de numerosos artículos sobre la temática de discapacidad y activo participante en jornadas y congresos en el país, en carácter de disertante.

Manual de Psiquiatría Médica David P. Moore, James W. Jefferson, 2005-04-30 Manual práctico, exhaustivo y con una

clara orientación médica, que cubre prácticamente todos los trastornos psiquiátricos, neurológicos y médicos que pueden afectar al estado mental, para lo que revisa todos los procesos que pueden causar alteraciones en el pensamiento, los sentimientos o el comportamiento, así como todos los agentes psicofarmacológicos relevantes para el tratamiento de los distintos trastornos. Dividido en 30 secciones que siguen el modelo del DSM-IV y que presentan la misma estructura: visión general del tema, cronología de la enfermedad, características clínicas, curso, complicaciones, etiología, diagnóstico diferencial y tratamiento. Esta segunda edición se apoya en los puntos fuertes de la primera, ser una obra extremadamente práctica que incluye toda la información necesaria para valorar, diagnosticar y tratar cualquier tipo de proceso que se dé en la clínica, el hospital o en la consulta. Es el tipo de texto que un estudiante o residente necesita tener a mano en su planta y también el que un médico en ejercicio consultaría si necesita recordar algunas cosas o se enfrenta a un cuadro poco frecuente o extraño. Resulta ideal también para el médico de familia, que muchas veces es el que debe realizar un primer diagnóstico psiquiátrico. Cada capítulo incluye una corta lista de referencias bibliográficas y muchos capítulos incluyen radiografías que muestran las características del proceso patológico. International Classification of Functioning, Disability, and Health World Health Organization,2007 This publication is a derived version of the International Classification of Functioning, Disability and Health (ICF, WHO, 2001) designed to record characteristics of the developing child and the influence of environments surrounding the child . This derived version of the ICF can be used by providers, consumers and all those concerned with the health, education, and well being of children and youth. It provides a common and universal language for clinical, public health, and research applications to facilitate the documentation and measurement of health and disability in child and youth populations.--Publisher's description.

Parenting Stress Kirby Deater-Deckard,2008-10-01 All parents experience stress as they attempt to meet the challenges of caring for their children. This comprehensive book examines the causes and consequences of parenting distress, drawing on a wide array of findings in current empirical research. Kirby Deater-Deckard explores normal and pathological parenting stress, the influences of parents on their children as well as children on their parents, and the effects of biological and environmental factors. Beginning with an overview of theories of stress and coping, Deater-Deckard goes on to describe how parenting stress is linked with problems in adult and child health (emotional problems, developmental disorders, illness);

parental behaviors (warmth, harsh discipline); and factors outside the family (marital quality, work roles, cultural influences). The book concludes with a useful review of coping strategies and interventions that have been demonstrated to alleviate parenting stress.

ADHD and the Nature of Self-control Russell A. Barkley, 1997-08-01 Renowned authority Russell Barkley provides a radical shift of perspective on ADHD. He argues that the disorder is not at root attentional, but rather a developmental problem of self-control. Offering new directions for thinking about and working with those with ADHD, this model has far-reaching implications for clinical practice.

Gender equality, heritage and creativity UNESCO, 2014-10-13 Initiated by the Culture Sector of UNESCO, the report draws together existing research, policies, case studies and statistics on gender equality and women's empowerment in culture provided by the UN Special Rapporteur in the field of cultural rights, government representatives, international research groups and think-tanks, academia, artists and heritage professionals. It includes recommendations for governments, decision-makers and the international community, within the fields of creativity and heritage. Annex contains essay 'Gender and culture: the statistical perspective' by Lydia Deloumeaux.

Mindblindness Simon Baron-Cohen, 1997-01-22 In *Mindblindness*, Simon Baron-Cohen presents a model of the evolution and development of mindreading. He argues that we mindread all the time, effortlessly, automatically, and mostly unconsciously. It is the natural way in which we interpret, predict, and participate in social behavior and communication. We ascribe mental states to people: states such as thoughts, desires, knowledge, and intentions. Building on many years of research, Baron-Cohen concludes that children with autism, suffer from mindblindness as a result of a selective impairment in mindreading. For these children, the world is essentially devoid of mental things. Baron-Cohen develops a theory that draws on data from comparative psychology, from developmental, and from neuropsychology. He argues that specific neurocognitive mechanisms have evolved that allow us to mindread, to make sense of actions, to interpret gazes as meaningful, and to decode the language of the eyes. A Bradford Book

Infantile Autism Gerhard Bosch, 2012-12-06 Professor Bosch's study of infantile autism is a most valuable contribution to the slowly increasing body of knowledge about this baffling and most severe psychiatric disorder of childhood. Reading it in the original German when it first appeared in 1962, I was greatly impressed by his deep sympathy for these unfortunate children and by his keen insight into the overt manifestations of a behavior which presents the observer with tantalizing riddles. Having spent nearly a lifetime in unravelling the meaning of the behavior of autistic children, I was much taken by Professor Bosch's very different approach to the same problem. His research sheds further light into the darkness that reigns in the mind of the autistic child. I am delighted that his important contribution is now easily available also to American readers. Everybody who works with children suffering from infantile autism for any length of time and also studies this

disease, becomes impressed by how much their inability to relate and to respond appropriately can teach us about human psychology in general, and in particular how and why things go wrong in man's relations to his fellow man. All through his book, Professor Bosch correctly stresses that autistic behavior is neither a symptom nor a syndrome, but a unique form of breakdown in all interpersonal relations.

Mental Retardation American Association on Mental Retardation, 2002 The workbook summarises and highlights some of the key information from the text, mental retardation :definition, classification and systems of supports , and demonstrates how to implement the system. It will assist in the diagnosis of mental retardation and to identify strengths and limitations, and planning individual supports for clients .

American Normal Lawrence Osborne, 2007-05-08 Asperger's Syndrome, often characterized as a form of high-functioning autism, is a poorly defined and little-understood neurological disorder. The people who suffer from the condition are usually highly intelligent, and as often as not capable of extraordinary feats of memory, calculation, and musicianship. In this wide-ranging report on Asperger's, Lawrence Osborne introduces us to those who suffer from the syndrome and to those who care for them as patients and as family. And, more importantly, he speculates on how, with our need to medicate and categorize every conceivable mental state, we are perhaps adding to their isolation, their sense of alienation from the normal. -This is a book about the condition, and the culture surrounding Asperger's Syndrome as opposed to a guide about how to care for your child with Aspergers. -Examines American culture and the positive and negative perspectives on the condition. Some parents hope their child will be the next Glenn Gould or Bill Gates, others worry that their child is abnormal and overreact.

Understanding the Brain: The Birth of a Learning Science OECD, 2007-06-12 This book provides new insights about learning by synthesising existing and emerging findings from cognitive and brain science.

Autism and Asperger Syndrome Simon Baron-Cohen, 2008-05-29 In this book Simon Baron-Cohen summarizes the current understanding of autism and Asperger Syndrome. He explains the process of diagnosis, as well as the options for education and intervention for those with these conditions. Taking a lifespan approach, Professor Baron-Cohen considers how the conditions affect very young children through to adulthood. He also outlines his new Empathizing-Systemizing (ES) theory, which aims to explain all of the psychological features of autistic-spectrum conditions. This book is designed firstly for people with these conditions and their families. It will be useful to clinicians, teachers, and other professionals involved in the care and support of people on the autistic-spectrum. The book will also provide an introduction to the topic for students in the social and biological sciences.--BOOK JACKET.

Autism: A Very Short Introduction Uta Frith, 2008-10-23 What is autism and Asperger syndrome? What are the core symptoms, and what causes them? How early can autism be recognised and what can be done? Why does autism seem to be

more and more common? Are we all a little bit autistic? This Very Short Introduction offers a clear statement on what is currently known about autism and Asperger syndrome. Looking at symptoms from the full spectrum of autistic disorders, and evaluating current evidence from neuroscience and genetics, this authoritative and accessible book explores the source and nature of social impairment and exceptional talent. Autism: A Very Short Introduction gives a glimpse of life seen through the eyes of autism.--BOOK JACKET.

From Them to Us Mel Ainscow, Tony Booth, 2005-06-23 Inclusive education has become a phrase with international currency shaping the content of conferences and national educational policies around the world. But what does it mean? Is it about including a special group of disabled learners or students seen to have 'special needs' (them) or is it concerned with making educational institutions inclusive, responsive to the diversity of all their students (us)? In this unique comparative study, the editors have brought together an international team of researchers from eight countries to develop case-studies which explore the processes of inclusion and exclusion within a school or group of schools set in its local and national context. The study includes classroom observation, the experiences of the school day of students and interviews with staff, students, parents and school governors. Through an innovative juxtaposition of the case-studies and commentaries on them, differences of perspective within and between countries are revealed and analysed. The study arose from a dissatisfaction with previous research, which presents 'national perspectives' or seeks findings that have global significance. This book avoids such simplification and draws attention to the problems of translation of practice across cultures. The editors start from an assumption of diversity of perspective which like the diversity of students within schools can be viewed as problematic or as a resource to be recognized and celebrated.

P-Chips Elizabeth B. Weller, Mary A. Fristad, Ronald A. Weller, Marijo Teare Rooney, 1999-05-01 (Reusable interview administration booklet) Based on strict DSM-IV criteria and validated in 12 years of studies, ChIPS and P-ChIPS -- the parent version of the interview -- are brief and simple to administer. Questions are succinct, simply worded, and easily understood by children and adolescents. Practitioners in clinical and research settings alike have already found ChIPS indispensable in screening for conditions such as attention-deficit/hyperactivity disorder, conduct disorder, substance abuse, phobias, anxiety disorders, stress disorders, eating disorders, mood disorders, elimination disorders, and schizophrenia. The Parent Version of the ChIPS essentially consists of the same interview text altered from second to third person to address the parent rather than the child (e.g., Have you ever is changed to Has your child ever').

Treatment of Autistic Children Patricia Howlin, Sir Michael Rutter, 1991-01-08 Treatment of Autistic Children Patricia Howlin and Michael Rutter, Institute of Psychiatry, London with Michael Berger, Rosemary Hemsley, Lionel Hersov and William Yule The book describes ways of dealing with the problems shown by autistic children in their own homes. The

principal therapists were parents themselves who played a major role in designing and carrying out the treatment programmes. Treatment programmes were individually designed for each child and the techniques were derived from both developmental and behavioural psychology. The outcome is described in terms of the progress made by individual children. However, in addition to single case studies, the book is unique in comparing outcome, across a whole range of measures, between treated children and their matched controls. The results of the study are discussed both in terms of their practical relevance and also their theoretical implications for our understanding of the nature of autism. This book will assist professional and academic psychologists, psychiatrists, speech therapists and teachers of the handicapped in their consideration of the future developments in the treatment of autism. Wiley Series on Studies in Child Psychiatry Series Editor Michael Rutter, Institute of Psychiatry, London
