A Geography Of Time Robert N. Levine, 2008-08-01 In this engaging and spirited book, eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted—our perception of time. When we travel to a different country, or even a different city in the United States, we assume that a certain amount of cultural adjustment will be required, whether it's getting used to new food or negotiating a foreign language, adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil, where to be three hours late is perfectly acceptable, and to Japan, where he finds a sense of the long-term that is unheard of in the West. We visit communities in the United States and find that population size

affects the pace of life—and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of “clock time” during the Industrial Revolution. We learn that there are places in the world today where people still live according to “nature time,” the rhythm of the sun and the seasons, and “event time,” the structuring of time around happenings (when you want to make a late appointment in Burundi, you say, “I’ll see you when the cows come in”). Levine raises some fascinating questions. How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer? Perhaps, Levine argues, our goal should be to try to live in a “multitemporal” society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

Basquiat : The Unknown Notebooks Dieter Buchhart, 2015 Accompanying a major traveling exhibition, this first-ever survey of the rarely seen notebooks of Basquiat features the artist's handwritten notes, poems, and drawings, along with related works on paper and large-scale paintings. With no formal training, Jean-Michel Basquiat (1960-1988) succeeded in developing a new and expressive style to become one of the most influential artists in the postmodern revival of figurative during the 1980s. In a series of notebooks from the early to mid-1980s, never before exhibited, Basquiat combined text and images reflecting his engagement with the countercultures of graffiti and hip-hop in New York City, as well as pop culture and world events. Filled with handwritten texts, poems, pictograms, and drawings, many of them iconic images that recur throughout his artwork—teepees, crowns, skeleton-like silhouettes, and grimacing masks—and these notebooks reveal much about the artist's creative process and the importance of the written word in his aesthetic. With over 150 notebook pages and numerous drawings and paintings, this important book sheds new light on Basquiat's career and his critical place in contemporary art history.--

Glee and New Directions for Social Change Brian C. Johnson, Daniel K. Fail, 2015-02-27 In the fall of 2009, the Fox network took a bold step in their primetime television lineup. Borrowing from the success of reality music performance shows like its own *American Idol*, the network introduced us to the students at McKinley High School, a fictional high school in Lima, OH, and home to the glee club known as the New Directions. The group is made up of freaks and geeks who feel the wrath of being “different.” The cool kids are hell bent on making life difficult for the students in glee club. Yet, because of the determination of Mr. Will Schuester, the club’s advisor, along with a few great songs, *Glee* has brought a new tone of inclusion to modern television and direct parallels can be seen between the experiences of the show choir members and what is happening in contemporary society. *Glee* has shown the importance of examining the intersections of pop culture and social issues; this text will encourage thinking on how effective the show has been beyond the screen. Essays provide critical

analyses of the show, its characters, and its overall usefulness as a commentary on social issues. The show's content often deals with subject matter that would lend easily to critique around such social issues as sexuality, bullying, interpersonal communication, conflict resolution, and family relationships. This text invites readers to examine the intersections between media, society, and the individual.

A Georgian Pageant Frank Frankfort Moore,2022-09-15 A Georgian Pageant is a late 1700s romance about a young woman. The novel begins with Miss Burney on a walk through the Kew Gardens when she suddenly finds herself in a chase with His Majesty, the king. His unfortunate state puts her in a difficult position that she must find a way out of. Excerpt: She realized, all too painfully, the feelings of the poor hare at that moment. She longed for friendly earth to open up before her. They were behind her—those wild huntsmen, one hoarsely yelling to her she knew not what, the others, more shrill, shouting to her to stop.

Beyond Stuttering Dave McGuire,2015-04 The McGuire Programme was founded in 1994 by Dave McGuire and is now an international organisation run by people who stutter to help other people who stutter. Its combination of physical techniques and mental strategies that deal with the fear of stuttering, as well as developing an assertive approach to the problem, has helped thousands of people to control their stutter and to get good at the sport of speaking. The McGuire method helps a stutterer to gain control of their life and to begin to enjoy, rather than dread, speaking. At last, here is a method that can bring real help to those affected.

The Art Of Seduction Robert Greene,2010-09-03 Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of *The 48 Laws of Power*, *Mastery*, and *The 33 Strategies Of War*.

Studying Film with André Bazin Blandine Joret,2019 The impact of French film critic André Bazin (1918-1958) on the

development of film studies, though generally acknowledged, remains contested. A passionate initiator of film culture during his lifetime, his ideas have been challenged, defended and revived throughout his afterlife. Studying Film with André Bazin offers an entirely original interpretation of major concepts from Bazin's legacy, such as auteur theory, realism, film language and the influence of film on other arts (poetry and painting in particular). By examining mostly unknown and uncollected texts, Blandine Joret explains Bazin's methodology and adopts it in a contemporary reading, linking his ideas to major philosophical and scientific frameworks as well as more recent media practices such as advertising, CGI, 3D cinema and Virtual Reality. In tune with 21st-century concerns in media culture and film studies, this book addresses a wide readership of film scholars, students and cinephiles.

Culture of Class Matthew Benjamin Karush, 2012-05-15 Following the mass arrival of European immigrants to Argentina in the early years of the twentieth century new forms of entertainment emerged including tango, films, radio and theater. While these forms of culture promoted ethnic integration they also produced a new kind of polarization that helped Juan Peron to build the mass movement that propelled him to power.

Fictive Interaction Esther Pascual, 2014-09-15 Language is intimately related to interaction. The question arises: Is the structure of interaction somehow mirrored in language structure and use? This book suggests a positive answer to this question by examining the ubiquitous phenomenon of fictive interaction, in which non-genuine conversational turns appear in discourse, even within clauses, phrases, and lexical items (e.g. "Not happy? Money back! guarantee"). The book is based on a collection of hundreds of examples of fictive interaction at all grammatical levels from a wide variety of spoken, written, and signed languages, and from many different discourse genres. Special attention is devoted to the strategic use of fictive interaction in legal argumentation, with a focus on high-profile criminal trials. Both trial lawyers and lay jurors often present material evidence or murder victims as speaking, and express emotions and intentions in conversational terms. The book

thus establishes the role of the conversational turn—rather than the sentence—as the basic unit of language, and the role of conversation as a frame that structures cognition, discourse, and grammar.

A Thousand Splendid Suns Khaled Hosseini, 2008-09-18 A riveting and powerful story of an unforgiving time, an unlikely friendship and an indestructible love

Mobile Mapping Clancy Wilmott, 2020 This book argues for a theory of mobile mapping, a situated and spatial approach towards researching how everyday digital mobile media practices are bound up in global systems of knowledge and power. Drawing from literature in media studies and geography -- and the work of Michel Foucault and Doreen Massey -- it examines how geographical and historical material, social, and cultural conditions are embedded in the way in which contemporary (digital) cartographies are read, deployed, and engaged. This is explored through seventeen walking interviews in Hong Kong and Sydney, as potent discourses like cartographic reason continue to transform and weave through the world in ways that haunt mobile mapping and bring old conflicts into new media. In doing so, *Mobile Mapping* offers an interdisciplinary rethinking about how multiple translations of spatial knowledges between rational digital epistemologies and tacit ways of understanding space and experience might be conceptualized and researched.

Shell Shock P. Leese, 2002-07-12 To the British soldiers of the Great War who heard about it, 'shell shock' was uncanny, amusing and sad. To those who experienced it, the condition was shameful, unjustly stigmatized and life-changing. The first full-length study of the British 'shell shocked' soldiers of the Great War combines social and medical history to investigate the experience of psychological casualties on the Western Front, in hospitals, and through their postwar lives. It also investigates the condition's origin and consequences within British culture.

Mad in America Robert Whitaker, 2019-09-10 An updated edition of the classic history of schizophrenia in America, which gives voice to generations of patients who suffered through cures that only deepened their suffering and impaired their hope of recovery. Schizophrenics in the United States currently fare worse than patients in the world's poorest countries. In *Mad in America*, medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles, and that we as a society are deeply deluded about their efficacy. The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs. In what is perhaps Whitaker's most damning revelation, *Mad in America* examines how drug companies in the 1980s and 1990s skewed their studies to prove that new antipsychotic drugs were more effective than the old, while keeping patients in the dark about dangerous side effects. A haunting, deeply compassionate book -- updated with a new introduction and prologue bringing in the latest medical treatments and trends -- *Mad in America* raises important questions about our obligations to the mad, the meaning of insanity, and what we value most about the human mind.
