Anti-Eviction Mapping Project

How to Kill a City PE Moskowitz,2017-03-07 “An exacting look at gentrification.... How to Kill a City elucidates the complex interplay between the forces we control and those that control us.”—New York Times Book Review The term gentrification has become a buzzword to describe the changes in urban neighborhoods across the country, but we don’t realize just how threatening it is. It means more than the arrival of trendy shops, much-maligned hipsters, and expensive lattes. The very future of American cities as vibrant, equitable spaces hangs in the balance. P. E. Moskowitz’s How to Kill a City takes readers from the kitchen tables of hurting families who can no longer afford their homes to the corporate boardrooms and political backrooms where destructive housing policies are devised. Along the way, Moskowitz uncovers the massive, systemic forces behind gentrification in New Orleans, Detroit, San Francisco, and New York. In the new preface, Moskowitz stresses just how little has changed in those same cities and how the problems of gentrification are proliferating throughout America. The deceptively simple question of who can and cannot afford to pay the rent goes to the heart of America’s crises of race and inequality. A vigorous, hard-hitting exposé, How to Kill a City reveals who holds power in our cities and how we can get it back.

Hollow City Rebecca Solnit,2018-11-06 Reporting from the front lines of gentrification in San Francisco, Rebecca Solnit and Susan Schwartzenberg sound a warning bell to all urban residents. Wealth is just as capable of ravaging cities as poverty.

Counterpoints Anti-Eviction Mapping Project,2021-08-03 Counterpoints: A San Francisco Bay Area Atlas of Displacement and Resistance brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area’s ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, Counterpoints expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco’s borders to consider the region as a socially, economically, and

politically interconnected whole and reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

Golden Gates Conor Dougherty, 2020-02-18 A Time 100 Must-Read Book of 2020 • A New York Times Book Review Editors' Choice • California Book Award Silver Medal in Nonfiction • Finalist for The New York Public Library Helen Bernstein Book Award for Excellence in Journalism • Named a top 30 must-read Book of 2020 by the New York Post • Named one of the 10 Best Business Books of 2020 by Fortune • Named A Must-Read Book of 2020 by Apartment Therapy • Runner-Up General Nonfiction: San Francisco Book Festival • A Planetizen Top Urban Planning Book of 2020 • Shortlisted for the Goddard Riverside Stephan Russo Book Prize for Social Justice "Tells the story of housing in all its complexity." —NPR Spacious and affordable homes used to be the hallmark of American prosperity. Today, however, punishing rents and the increasingly prohibitive cost of ownership have turned housing into the foremost symbol of inequality and an economy gone wrong. Nowhere is this more visible than in the San Francisco Bay Area, where fleets of private buses ferry software engineers past the tarp-and-plywood shanties of the homeless. The adage that California is a glimpse of the nation's future has become a cautionary tale. With propulsive storytelling and ground-level reporting, New York Times journalist Conor Dougherty chronicles America's housing crisis from its West Coast epicenter, peeling back the decades of history and economic forces that brought us here and taking readers inside the activist movements that have risen in tandem with housing costs.

The Planetary Gentrification Reader Loretta Lees, Tom Slater, Elvin Wyly, 2022-12-30 Gentrification is a global process that the United Nations now sees as a human rights issue. This new Planetary Gentrification Reader follows on from the editors' 2010 volume, *The Gentrification Reader*, and provides a more longitudinal (backward and forward in time) and broader (turning away from Anglo-/Euro-American hegemony) sense of developments in gentrification studies over time and space, drawing on key readings that reflect the development of cutting-edge debates. Revisiting new debates over the histories of gentrification, thinking through comparative urbanism on gentrification, considering new waves and types of gentrification, and giving much more focus to resistance to gentrification, this is a stellar collection of writings on this critical issue. Like in their 2010 Reader, the editors, who are internationally renowned experts in the field, include insightful commentary and suggested further reading. The book is essential reading for students and researchers in urban studies, urban planning, human geography, sociology, and housing studies and for those seeking to fight this socially unjust process.

Gentrification and Displacement: The Forced Relocation of Public Housing Tenants in Inner-Sydney Alan

Morris,2018-09-03 This book examines the forced displacement of public housing residents in Sydney's Millers Point and The Rocks communities. It considers the strategies deployed by the government to pressure tenants to move, and the social and personal impacts of the displacement on the residents themselves. Drawing on in-depth interviews with tenants alongside government and media communications, the Millers Point case study offers a penetrating and moving analysis of gentrification and displacement in one of Australia's oldest and more unique working class and public housing neighbourhoods. Gentrification and Displacement advances work in urban studies by charting trends in urban renewal and displacement, furthering our understanding of public housing, gentrification and the effects of forced relocation on vulnerable urban communities.

Pictures of a Gone City Richard A. Walker,2018-06-01 The San Francisco Bay Area is currently the jewel in the crown of capitalism—the tech capital of the world and a gusher of wealth from the Silicon Gold Rush. It has been generating jobs, spawning new innovation, and spreading ideas that are changing lives everywhere. It boasts of being the Left Coast, the Greenest City, and the best place for workers in the USA. So what could be wrong? It may seem that the Bay Area has the best of it in Trump's America, but there is a dark side of success: overheated bubbles and spectacular crashes; exploding inequality and millions of underpaid workers; a boiling housing crisis, mass displacement, and severe environmental damage; a delusional tech elite and complicity with the worst in American politics. This sweeping account of the Bay Area in the age of the tech boom covers many bases. It begins with the phenomenal concentration of IT in Greater Silicon Valley, the fabulous economic growth of the bay region and the unbelievable wealth piling up for the 1% and high incomes of Upper Classes—in contrast to the fate of the working class and people of color earning poverty wages and struggling to keep their heads above water. The middle chapters survey the urban scene, including the greatest housing bubble in the United States, a metropolis exploding in every direction, and a geography turned inside out. Lastly, it hits the environmental impact of the boom, the fantastical ideology of TechWorld, and the political implications of the tech-led transformation of the bay region.

A Climate of Uncertainty Economic Council of Canada,1980

Just Green Enough Winifred Curran,Trina Hamilton,2017-12-12 While global urban development increasingly takes on the mantle of sustainability and green urbanism, both the ecological and equity impacts of these developments are often overlooked. One result is what has been called environmental gentrification, a process in which environmental improvements lead to increased property values and the displacement of long-term residents. The specter of environmental gentrification is now at the forefront of urban debates about how to accomplish environmental improvements without massive displacement. In this context, the editors of this volume identified a strategy called just green enough based on field work in Greenpoint, Brooklyn, that uncouples environmental cleanup from high-end residential and commercial development. A just green enough strategy focuses explicitly on social justice and environmental goals as defined by local communities, those people who have

been most negatively affected by environmental disamenities, with the goal of keeping them in place to enjoy any environmental improvements. It is not about short-changing communities, but about challenging the veneer of green that accompanies many projects with questionable ecological and social justice impacts, and looking for alternative, sometimes surprising, forms of greening such as creating green spaces and ecological regeneration within protected industrial zones. Just Green Enough is a theoretically rigorous, practical, global, and accessible volume exploring, through varied case studies, the complexities of environmental improvement in an era of gentrification as global urban policy. It is ideal for use as a textbook at both undergraduate and graduate levels in urban planning, urban studies, urban geography, and sustainability programs.

Silicon City: San Francisco in the Long Shadow of the Valley Cary McClelland, 2018-10-09 A Stanford University Three Books Selection for 2019 “Essential... A conflicted and complex portrait of a city starving for solutions.” —Brandon Yu, San Francisco Chronicle San Francisco is changing at warp speed. Famously home to artists and activists, and known as the birthplace of the Beats, the Black Panthers, and the LGBTQ movement, the Bay Area has been reshaped by Silicon Valley. The richer the region gets, the more unequal and less diverse it becomes, and cracks in the city’s facade—rapid gentrification, an epidemic of evictions, rising crime, atrophied public institutions—are growing wider. Inspired by Studs Terkel’s classic works of oral history, Cary McClelland spent years interviewing people at the epicenter of recent change, from venture capitalists and coders to politicians and protesters, capturing San Francisco as never before.

The Road to Resegregation Alex Schafran, 2018-10-09 How could Northern California, the wealthiest and most politically progressive region in the United States, become one of the earliest epicenters of the foreclosure crisis? How could this region continuously reproduce racial poverty and reinvent segregation in old farm towns one hundred miles from the urban core? This is the story of the suburbanization of poverty, the failures of regional planning, urban sprawl, NIMBYism, and political fragmentation between middle class white environmentalists and communities of color. As Alex Schafran shows, the responsibility for this newly segregated geography lies in institutions from across the region, state, and political spectrum, even as the Bay Area has never managed to build common purpose around the making and remaking of its communities, cities, and towns. Schafran closes the book by presenting paths toward a new politics of planning and development that weave scattered fragments into a more equitable and functional whole.

The Gentrification of the Internet Jessa Lingel, 2023-02-07 How we lost control of the internet—and how to win it back. The internet has become a battleground. Although it was unlikely to live up to the hype and hopes of the 1990s, only the most skeptical cynics could have predicted the World Wide Web as we know it today: commercial, isolating, and full of, even fueled by, bias. This was not inevitable. The Gentrification of the Internet argues that much like our cities, the internet has become gentrified, dominated by the interests of business and capital rather than the interests of the people who use it.

Jessa Lingel uses the politics and debates of gentrification to diagnose the massive, systemic problems blighting our contemporary internet: erosions of privacy and individual ownership, small businesses wiped out by wealthy corporations, the ubiquitous paywall. But there are still steps we can take to reclaim the heady possibilities of the early internet. Lingel outlines actions that internet activists and everyday users can take to defend and secure more protections for the individual and to carve out more spaces of freedom for the people—not businesses—online.

Urban Sprawl Gregory D. Squires, 2002 Urban Sprawl is not simply a development that undercuts the quality of life for suburbanites. It has raised alarms across the nation, as fair housing advocates, environmentalists, land use planners, and even many suburban employers who cannot find the workers they need, have recognized that the costs go far beyond aesthetics. Despite the agreement that something needs to be done, there is no consensus on what works. *Urban Sprawl: Causes, Consequences, and Policy Responses* assembles leading scholars who analyze the major causes and consequences of urban sprawl and the policy initiatives that are being explored in response to these developments.

Newcomers Matthew L. Schuerman, 2019-11-07 Gentrification is transforming cities, small and large, across the country. Though it's easy to bemoan the diminished social diversity and transformation of commercial strips that often signify a gentrifying neighborhood, determining who actually benefits and who suffers from this nebulous process can be much harder. The full story of gentrification is rooted in large-scale social and economic forces as well as in extremely local specifics—in short, it's far more complicated than both its supporters and detractors allow. In *Newcomers*, journalist Matthew L. Schuerman explains how a phenomenon that began with good intentions has turned into one of the most vexing social problems of our time. He builds a national story using focused histories of northwest Brooklyn, San Francisco's Mission District, and the onetime site of Chicago's Cabrini-Green housing project, revealing both the commonalities among all three and the place-specific drivers of change. Schuerman argues that gentrification has become a too-easy flashpoint for all kinds of quasi-populist rage and pro-growth boosterism. In *Newcomers*, he doesn't condemn gentrifiers as a whole, but rather articulates what it is they actually do, showing not only how community development can turn foul, but also instances when a "better" neighborhood truly results from changes that are good. Schuerman draws no easy conclusions, using his keen reportorial eye to create sharp, but fair, portraits of the people caught up in gentrification, the people who cause it, and its effects on the lives of everyone who calls a city home.

A People's Guide to the San Francisco Bay Area Rachel Brahinsky, Alexander Tarr, 2020-10-06 An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. *A People's Guide to the San Francisco Bay Area* looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial

and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often-unrecognized labor of farmworkers and everyday people. The book asks who had—and who has—the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area, with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and lush hills to suburban cul-de-sacs and wetlands, stretching from the North Bay to the South Bay, from the East Bay to San Francisco. Original maps help guide readers, and thematic tours offer starting points for creating your own routes through the region.

Transit-Oriented Displacement or Community Dividends? Karen Chapple,Anastasia Loukaitou-Sideris,2019-04-09 An examination of the neighborhood transformation, gentrification, and displacement that accompany more compact development around transit. Cities and regions throughout the world are encouraging smarter growth patterns and expanding their transit systems to accommodate this growth, reduce greenhouse gas emissions, and satisfy new demands for mobility and accessibility. Yet despite a burgeoning literature and various policy interventions in recent decades, we still

understand little about what happens to neighborhoods and residents with the development of transit systems and the trend toward more compact cities. Research has failed to determine why some neighborhoods change both physically and socially while others do not, and how race and class shape change in the twenty-first-century context of growing inequality. Drawing on novel methodological approaches, this book sheds new light on the question of who benefits and who loses from more compact development around new transit stations. Building on data at multiple levels, it connects quantitative analysis on regional patterns with qualitative research through interviews, field observations, and photographic documentation in twelve different California neighborhoods. From the local to the regional to the global, Chapple and Loukaitou-Sideris examine the phenomena of neighborhood transformation, gentrification, and displacement not only through an empirical lens but also from theoretical and historical perspectives. Growing out of an in-depth research process that involved close collaboration with dozens of community groups, the book aims to respond to the needs of both advocates and policymakers for ideas that work in the trenches.
