Waste Management and the Environment VIII C.A. Brebbia, H. Itoh, 2016-07-14 Waste Management and the Environment VIII contains papers present at the 8th International Conference on Waste Management and the Environment, organised every two years by the Wessex Institute. The contents were contributed by professionals, researchers, government departments and local authorities and cover the current situation of waste management. Waste Management is one of the key problems of modern society due to the ever-expanding volume and complexity of discarded domestic and industrial waste. There is a need to establish better practices and safer solutions for waste disposal. This requires further investigation into disposal methods and recycling, as well as new technologies to monitor waste disposal sites, clean technologies, waste monitoring, public and corporate awareness and general education. Unfortunately many of the policies adopted in the past were aimed at short-term solutions without regard to the long-term implications on health and the environment, leading in many cases to the need to take difficult and expensive remedial action. The development of sustainable strategies is the preferred trend for Waste Management. The approach which has emerged as the most promising has been called 4Rs, where reduction, reuse, recycling and recovery (including the sale of waste as Secondary Raw Materials (SRM) and of Refuse Derived Fuel (RDF)) are seen as the best actions. This largely decreases the volume of waste that needs final disposal. Contents cover such topics as: Environmental impact; Reduce, reuse, recycle and recovery (4Rs); Waste incineration and gasification; Energy from waste; Industrial waste management; Hazardous waste; Agricultural waste; Wastewater; eWaste; Landfill optimisation and mining; Remote sensing; Thermal treatment; Emergent pollutants; Environmental remediation; Direct and indirect pre-treatment of MSW; Disposal of high-level radioactive waste; Legislation; Behavioural issues.

Engineering Design Applications II Andreas Öchsner, Holm Altenbach, 2019-06-27 This book offers an update on recent developments in modern engineering design. Different engineering disciplines, such as mechanical, materials, computer and process engineering, provide the foundation for the design and development of improved structures, materials and processes. The modern design cycle is characterized by the interaction between various disciplines and a strong shift to computer-based approaches where only a few experiments are conducted for verification purposes. A major driver for this development is the increased demand for cost reduction, which is also linked to environmental demands. In the transportation industry (e.g. automotive or aerospace), the demand for higher fuel efficiency is related to reduced operational costs and less environmental damage. One way to fulfil such requirements is lighter structures and/or improved processes for energy conversion. Another emerging area is the interaction of classical engineering with the health and medical sector.

Roberts brings together essays from the Sloan Management Review that consider three crucial questions: which people, which structures, and which strategies produce the most useful ideas? Among other topics, the essays consider the kind of staff needed and the ways a manager can maximize their productivity; outline the benefits and risks of various management styles in the cardiac-pacemaker industry; and explore the direct and indirect influence of government on technology strategy. In addition, the book includes a complete overview of research in this area, providing indispensable background information as well as suggestions for further reading.

La optimización mecánica en el medio acuático María Carrasco Poyatos,2021-06-29 El ser humano no está estructuralmente preparado para desenvolverse de forma óptima en el medio acuático, sin embargo, tiene la capacidad de aprender para mejorar su competencia. En este libro se presentan los condicionantes de la estaticidad y del movimiento del cuerpo en el medio acuático, distinguiendo los elementos que son propios del agua de los que son propios del cuerpo, para determinar qué factores son los que se pueden mejorar para optimizar el dominio de este medio. Además, como complemento fundamental, se integran en este proceso las áreas del control motor, la sensopercepción, y el tono muscular, haciendo especial hincapié en la estabilidad del core. Finalmente, todo queda integrado en unas recomendaciones prácticas fundamentadas en el ejercicio correctivo. Se pretende ofrecer una nueva perspectiva desde la que construir propuestas de enseñanza-aprendizaje de calidad para continuar desarrollando nuestra destreza en el medio acuático.

La figura del Coordinador de Seguridad y Salud durante la ejecución de la obra en España Francisco José, Martínez Montesinos,2017-12-01 La figura del Coordinador de Seguridad y Salud durante la ejecución de la obra, desde su aparición en España con la publicación del Real Decreto 1627/1997, no ha estado exenta de polémica. Existe una problemática en torno

a esta figura, que aún hoy, 20 años después, continúa vigente. El concepto de técnico competente para desempeñar esta labor, sus obligaciones recogidas en el artículo 9 del citado Real Decreto 1627/1997, la coordinación de obras sin proyecto o las responsabilidades que asume el Coordinador, son cuestiones que no terminan de tener la claridad y la concreción deseables en una actividad tan importante y que cuenta ya con 20 años de recorrido. En la presente monografía se realiza un análisis integral de la figura del Coordinador durante la ejecución de la obra. Así, se pretende mostrar en qué estado se encuentra en la actualidad dicha figura, profundizando en las distintas cuestiones polémicas que la rodean, y aportando propuestas encaminadas a mejorar y dignificar esta faceta profesional. El capítulo dedicado a las responsabilidades incluye un análisis de 50 sentencias penales relevantes que afectan al Coordinador, la mayoría de ellas muy recientes, en el que se pone de manifiesto el criterio de los Tribunales, y del que se extraen interesantes conclusiones a tener en cuenta por los Coordinadores en su labor profesional.
