families for follow-up care.

Global Case Studies in Maternal and Child Health Ruth C. White, 2014 Maternal and Child Health (MCH) continues to be one of the most important fields of study for improving the health of populations across the globe. Two the 10 Millennium Development Goals strive specifically to improve maternal and child health, and several others, such as gender equality and HIV/AIDS, are critical aspects of Maternal and Child Health. Written for students in public health, medical, and allied health professions, *Global Case Studies in Maternal and Child Health* brings to life theoretical and conceptual ideas discussed in primary texts, through the analysis of lived stories of maternal and child health programs around the world. Using structured case studies of community-based programs in maternal and child health from around the world, students will be presented with real-life ethical, practical and theoretical challenges that will develop critical and analytical thinking skills and also provide them with practice models that they can use in their future or present work.

The Maternal Health Crisis in America Barbara A. Anderson, DrPH, CNM, FACNM, FAAN, Lisa R. Roberts, DrPH, MSN, RN, FNP-BC, CHES, FAANP, 2019-04-26 Describes how nursing professionals can mitigate the maternal health crisis through advocacy and improved practice. This graduate-level nursing text and professional clinical reference is the first to comprehensively address the escalating crisis in U.S. maternal health—our country experiences the highest maternal mortality among developed nations—and provides strategies and roadmaps for improved outcomes. It challenges the current approach to ameliorating the maternal crisis, which embeds maternal care into “child health” and “women’s health,” and characterizes maternal health as a distinct, contemporary epidemiological crisis in America. At its heart, the book calls for

the application of nursing knowledge and skill in advocating for and changing practices. The text examines the social determinants responsible for the crisis, including structural and systemic economic and political forces, declining accessibility to maternal care, and lack of a national effort to improve maternal health. With a strong public focus, the book engages readers through narratives and interactive critical thinking exercises in analyzing the problem and related structural and systemic barriers. It offers guidelines for advocacy and improved practice while fostering creative thinking by which readers can imagine their own solutions. Specific issues addressed include the current status of health care delivery, the public health safety net, practice-policy initiatives, specific sociocultural factors contributing to enhanced risk, myths and impugning attitudes about childbearing women, the life-long impact of maternal health neglect, and the contribution of nursing to advocacy, prevention, and improved practice. Key Features: Synthesizes key data on the maternal health crisis in America focusing on nursing leadership and contributions Underscores the need for a collaborative public health nursing perspective in addressing the maternal health crisis Examines social determinants responsible for the crisis Presents exercises and narratives for advocacy and improved practice Spotlights maternal health as a specific entity Includes learning objectives, expert opinions, key questions to guide critical thinking, brief summary, and references in each chapter
