A Silvan Tomkins Handbook Adam J. Frank, Elizabeth A. Wilson, 2020-08-04 An accessible guide to the work of American psychologist and affect theorist Silvan Tomkins The brilliant and complex theories of psychologist Silvan Tomkins (1911-1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories are not well understood. A Silvan Tomkins Handbook makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary scholars and students of affect. A Silvan Tomkins Handbook provides readers with a clear outline of Tomkins's affect theory as he developed it in his four-volume masterwork *Affect Imagery Consciousness*. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and emotion. In addition to clarifying his affect theory, the Handbook emphasizes Tomkins's other significant contributions, from his broad theories of imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know more about the foundations of affect studies.

Channel Kindness: Stories of Kindness and Community Born This Way Foundation Reporters with Lady Gaga, Lady Gaga, 2020-09-22 Channel Kindness is a collection of fifty-one stories of kindness, bravery, and resilience from young people

all over the world collected by the Born This Way Foundation and introduced by Lady Gaga. For Lady Gaga, kindness is the driving force behind everything she says and does. The quiet power of kindness can change the way we view one another, our communities, and even ourselves. She embodies this mission, and through her work, brings more kindness into our world every single day. Lady Gaga has always believed in the importance of being yourself, being kind to yourself and others, no matter who they are or where they come from. With that sentiment in mind, she and her mother, Cynthia Germanotta, founded Born This Way Foundation, a nonprofit organization dedicated to making the world a kinder and braver place. Through the years, they've collected stories of kindness, bravery, and resilience from young people all over the world, proving that kindness truly is the universal language. And now, we invite you to read these stories and follow along as each and every young author finds their voice, just as Lady Gaga has found hers. Within these pages, you'll meet young changemakers who found their inner strength, who prevailed in the face of bullies, who started their own social movements, who decided to break through the mental health stigma and share how they felt, who created safe spaces for LGBTQ+ youth, and who have embraced kindness with every fiber of their being by helping others without the expectation of anything in return. Individually and collectively, the stories collected here prove that kindness not only saves lives but builds community. Kindness is inclusion, it is pride, it is empathy, it is compassion, it is self-respect and it is the guiding light to love. Kindness is always transformational, and its never-ending ripples result in even more kind acts that can change our lives, our communities, and our world.

EPZ Thousand Plateaus Gilles Deleuze, Félix Guattari, 2004-09-01 'A rare and remarkable book.' Times Literary Supplement Gilles Deleuze (1925-1995) was Professor of Philosophy at the University of Paris VIII. He is a key figure in poststructuralism, and one of the most influential philosophers of the twentieth century. Félix Guattari (1930-1992) was a psychoanalyst at the la Borde Clinic, as well as being a major social theorist and radical activist. A Thousand Plateaus is part of Deleuze and Guattari's landmark philosophical project, Capitalism and Schizophrenia - a project that still sets the terms of contemporary philosophical debate. A Thousand Plateaus provides a compelling analysis of social phenomena and offers fresh alternatives for thinking about philosophy and culture. Its radical perspective provides a toolbox for 'nomadic thought' and has had a galvanizing influence on today's anti-capitalist movement. Translated by Brian Massumi>

Kafka Gilles Deleuze, 1986 In Kafka Deleuze and Guattari free their subject from his (mis)interpreters. In contrast to traditional readings that see in Kafka's work a case of Oedipalized neurosis or a flight into transcendence, guilt, and subjectivity, Deleuze and Guattari make a case for Kafka as a man of joy, a promoter of radical politics who resisted at every turn submission to frozen hierarchies.

Where the Wild Winds Are Nick Hunt,2017-09-07 SHORTLISTED FOR THE STANFORD DOLMAN TRAVEL BOOK OF THE YEAR AWARD A Financial Times Book of the Year A Spectator Book of the Year A Daily Telegraph Book of the Year 'Travel writing in excelsis' -Jan Morris, author of Venice 'A thrilling and gorgeous tale, packed with meteorological wonder' - Amy Liptrot, author of The Outrun Nick Hunt sets off on an unlikely quest: to follow four of Europe's winds across the continent... His wind-walks begin on Cross Fell, the highest point of the Pennines, as he chases the roaring Helm - the only named wind in Britain. In southern Europe he follows the Bora - a bitter northerly that blows from Trieste through Slovenia and down the Croatian coast. His hunt for the 'snow-eating' Foehn becomes a meandering journey of exhilaration and despair through the Alpine valleys of Switzerland, and his final walk traces an ancient pilgrims' path in the south of France on the trail of the Mistral - the 'wind of madness' which animated and tormented Vincent Van Gogh. These are journeys into wild wind, but also into wild landscapes and the people who inhabit them - a cast of meteorologists, storm chasers, mountain men, eccentric wind enthusiasts, sailors and shepherds. Soon Nick finds himself borne along by the very forces he is pursuing, through rain, blizzards, howling gales, and back through time itself. For, where the wild winds are, there are also myths and legends, history and hearsay, science and superstition - and occasionally remote mountain cabins packed with pickles, cured meats and homemade alcohol. Where the Wild Winds Are is a beautiful, unconventional travelogue that makes the invisible

visible.

Process Modelling and Simulation César de Prada,Constantinos Pantelides,José Luis Pitarch,2019-09-23 Since process models are nowadays ubiquitous in many applications, the challenges and alternatives related to their development, validation, and efficient use have become more apparent. In addition, the massive amounts of both offline and online data available today open the door for new applications and solutions. However, transforming data into useful models and information in the context of the process industry or of bio-systems requires specific approaches and considerations such as new modelling methodologies incorporating the complex, stochastic, hybrid and distributed nature of many processes in particular. The same can be said about the tools and software environments used to describe, code, and solve such models for their further exploitation. Going well beyond mere simulation tools, these advanced tools offer a software suite built around the models, facilitating tasks such as experiment design, parameter estimation, model initialization, validation, analysis, size reduction, discretization, optimization, distributed computation, co-simulation, etc. This Special Issue collects novel developments in these topics in order to address the challenges brought by the use of models in their different facets, and to reflect state of the art developments in methods, tools and industrial applications.

Encyclopedia of Quality of Life and Well-Being Research Alex C. Michalos,2014-02-12 The aim of this encyclopedia is to

provide a comprehensive reference work on scientific and other scholarly research on the quality of life, including health-related quality of life research or also called patient-reported outcomes research. Since the 1960s two overlapping but fairly distinct research communities and traditions have developed concerning ideas about the quality of life, individually and collectively, one with a fairly narrow focus on health-related issues and one with a quite broad focus. In many ways, the central issues of these fields have roots extending to the observations and speculations of ancient philosophers, creating a continuous exploration by diverse explorers in diverse historic and cultural circumstances over several centuries of the qualities of human existence. What we have not had so far is a single, multidimensional reference work connecting the most salient and important contributions to the relevant fields. Entries are organized alphabetically and cover basic concepts, relatively well established facts, lawlike and causal relations, theories, methods, standardized tests, biographic entries on significant figures, organizational profiles, indicators and indexes of qualities of individuals and of communities of diverse sizes, including rural areas, towns, cities, counties, provinces, states, regions, countries and groups of countries.
