Tango Lessons Marilyn G. Miller, 2014-02-07 From its earliest manifestations on the street corners of nineteenth-century Buenos Aires to its ascendancy as a global cultural form, tango has continually exceeded the confines of the dance floor or the music hall. In *Tango Lessons*, scholars from Latin America and the United States explore tango's enduring vitality. The interdisciplinary group of contributors—including specialists in dance, music, anthropology, linguistics, literature, film, and fine art—take up a broad range of topics. Among these are the productive tensions between tradition and experimentation in tango nuevo, representations of tango in film and contemporary art, and the role of tango in the imagination of Jorge Luis Borges. Taken together, the essays show that tango provides a kaleidoscopic perspective on Argentina's social, cultural, and intellectual history from the late nineteenth to the early twenty-first centuries. Contributors. Esteban Buch, Oscar Conde, Antonio Gómez, Morgan James Luker, Carolyn Merritt, Marilyn G. Miller, Fernando Rosenberg, Alejandro Sust

*From Recipients to Donors* Doctor Emma Mawdsley, 2012-08-09 *From Recipients to Donors* examines the emergence, or re-emergence, of a large number of nations as partners and donors in international development, from global powers such as Brazil, China and India, to Gulf states such as Saudi Arabia, to former socialist states such as Poland and Russia. The impact of these countries in international development has grown sharply, and as a result they have become a subject of intense interest and analysis. This unique book explores the range of opportunities and challenges this phenomenon presents for poorer countries and for development policy, ideology and governance. Drawing on the author's rich original research, whilst expertly condensing published and unpublished material, *From Recipients to Donors* is an essential critical analysis and

review for anyone interested in development, aid and international relations.

Design-Based Research in Education Zoi A. Philippakos, Emily Howell, Anthony Pellegrino, 2021-10-15 Effective research in educational settings requires collaboration between researchers and school-based practitioners to codesign instruction and assessment, analyze findings to inform subsequent iterations, and make thoughtful revisions. This innovative reference and course text examines the theory and practice of design-based research (DBR), an important methodology for conducting studies in authentic educational contexts. Leading experts provide specific examples of high-quality DBR addressing different research foci, grade levels, and subject areas (literacy/English language arts, math, and science). Applications are presented for curriculum development, intervention, assessment, and digital contexts, as well as teaching second-language learners. Also addressed is DBR's role in educator preparation, professional development, dissertation research, and technical education.

*An Anthropology for Contemporaneous Worlds* Marc Augé, 1999 Under what conditions is anthropology possible today, when a crisis of social meaning—a crisis that makes it more difficult to conceive and manage our relation to the other—makes the need for anthropology appear more clearly than ever before? This book sets forth at least the beginning of an answer to this question. The volume's title combines a singular noun, anthropology, with a plural one, contemporaneous worlds. It aims to register the double movement of universalization and particularization that is simultaneously affecting the entire planet. Social anthropology has always taken into account the context of the groups and phenomena it studied. Today, while multiplicity is being maintained or, more precisely, renewed, that context has become, in all cases, planetary. Positioned in opposition not only to political theories of universalization and uniformization more or less tied to the theme of "the end of history," but also to "postmodernist" versions of anthropological theories of multiplicity and relativism, the author argues that social anthropology, through its self-critical tradition, is fully capable of adapting to the accelerated change that is continuously recomposing relations between universalism and particularisms. It is for social anthropology to select, analyze, and understand the new modes of sociality and the new spaces in which (not without calamities and contradictions) these utterly new recompositions, a major aspect of our contemporary world, manifest themselves.

The Roman Banquet Katherine M. D. Dunbabin, 2003 Dining was an important social occasion in the classical world. Scenes of drinking and dining decorate the wall paintings and mosaic pavements of many Roman houses. They are also painted in tombs and carved in relief on sarcophagi and on innumerable smaller grave monuments. Drawing frequently upon ancient literature inscriptions as well as archaeological evidence, this book examines the visual and material evidence for dining through Roman antiquity. Richly illustrated, Roman Banqueting offers the fullest and varied picture of the role of the banquet in Roman life.

International Handbook of Educational Change Andy Hargreaves, A. Lieberman, M. Fullan, D.W. Hopkins, 1998-05-31 The

International Handbook of Educational Change is a state of the art collection of the most important ideas and evidence of educational change. The book brings together some of the most influential thinkers and writers on educational change. It deals with issues like educational innovation, reform, restructuring, culture-building, inspection, school-review, and change management. It asks why some people resist change and what their resistance means. It looks at how men and women, older teachers and younger teachers, experience change differently. It looks at the positive aspects of change but does not hesitate to raise uncomfortable questions about many aspects of educational change either. It looks critically and controversially at the social, economic, cultural and political forces that are driving educational change. School leaders, system administration, teacher leaders, consultants, facilitators, educational researchers, staff developers and change agents of all kinds will find this book an indispensable resource for guiding them to both classic and cutting-edge understandings of educational change, no other work provides as comprehensive coverage of the field of educational change.

*The Gamification Toolkit* Kevin Werbach, Dan Hunter, 2015-05-05 Take your gamification efforts to the next level When The Economist covered Kevin Werbach and Dan Hunter's new book For the Win in 2012, they referred to gamification as a management craze. Since then, gamification has proved to be much more than a fleeting fad: it is a global movement. For the Win has been published globally in English, Chinese, Japanese, Korean, Russian, and Spanish, and more than a quarter of a million people have taken Werbach's gamification course on Coursera. Now, in their new ebook The Gamification Toolkit, Werbach and Hunter go deeper into the key game elements and provide you with the tools to take gamification to the next level. This brief but comprehensive ebook is a user's guide to help you build a game—for the win.

*Gender, Nutrition, and the Human Right to Adequate Food* Anne C. Bellows, Flavio L.S. Valente, Stefanie Lemke, María Daniela Núñez Burbano de Lara, 2015-12-07 This book introduces the human right to adequate food and nutrition as evolving concept and identifies two structural disconnects fueling food insecurity for a billion people, and disproportionately affecting women, children, and rural food producers: the separation of women's rights from their right to adequate food and nutrition, and the fragmented attention to food as commodity and the medicalization of nutritional health. Three conditions arising from these disconnects are discussed: structural violence and discrimination frustrating the realization of women's human

rights, as well as their private and public contributions to food and nutrition security for all; many women's experience of their and their children's simultaneously independent and intertwined subjectivities during pregnancy and breastfeeding being poorly understood in human rights law and abused by poorly-regulated food and nutrition industry marketing practices; and the neoliberal economic system's interference both with the autonomy and self-determination of women and their communities and with the strengthening of sustainable diets based on democratically governed local food systems. The book calls for a social movement-led reconceptualization of the right to adequate food toward incorporating gender, women's rights, and nutrition, based on the food sovereignty framework.

*Handbook of Outpatient Treatment of Adults* Barry A. Edelstein,Michel Hersen,M.E. Thase,2013-06-29 During the past several decades, the field of mental health care has expanded greatly. This expansion has been based on greater recognition of the prevalence and treatability of mental disorders, as well as the availability of a variety of forms of effective treatment. Indeed, throughout this period, our field has witnessed the introduction and the wide spread application of specific pharmacological treatments, as well as the development, refinement, and more broadly based availability of behavioral, psychodynamic, and marital and family interventions. The community mental health center system has come into being, and increasing numbers of mental health practitioners from the fields of psychiatry, psychology, social work, nursing, and related professional disciplines have entered clinical practice. In concert with these developments, powerful sociopolitical and socioeconomic forces-including the deinstitutionalization movement of the late 1960s and early 1970s and the cost-containment responses of the 1980s, necessitated by the spiraling cost of health care-have shaped the greatest area of growth in the direction of outpatient services. This is particularly true of the initial assessment and treatment of nonpsychotic mental disorders, which now can often be managed in ambulatory-care settings. Thus, we decided that a handbook focusing on the outpatient treatment of mental disorders would be both timely and useful. When we first began outlining the contents of this book, the third edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM-III) was in its fourth year of use.

**Effective Schools in Developing Countries (RLE Edu A)** Henry Levin, Marlaine Lockheed, 2012-05-31 This volume brings together eight case studies which describe a variety of initiatives to create more effective schools for children of poverty, especially in the Third World. The initiatives reviewed published and unpublished documents and both qualitative and statistical studies were examined. Countries include Brazil, Burundi, Colombia, Ghana, Nepal, Sri Lanka, Thailand and the United States. Each initiative was developed independently to address unique challenges and situations but taken as a group, the features of the approaches described in this volume can be viewed as a basis for considering the development of effective schools strategies in other contexts.

History Under Debate Carlos Barros, Lawrence J. McCrank, 2004 Historians from around the world explore new trends, movements, & conceptualizations in history as a discipline & profession. This volume offers innovative approaches to historians attempting to redefine their discipline relative to the global society of the 21st century.

*The Atomic Age and Our Biological Future* Holger Valdemar Brøndsted, 1957

*Ocotillo Dreams* Melinda Palacio, 2011 Set in Chandler, Arizona, during the city's infamous 1997 migrant sweeps, *Ocotillo Dreams* delivers a wallop that resonates in today's volatile immigration debate. But this is no run-of-the-mill border-debate tale. In this captivating first novel, author Melinda Palacio skillfully weaves a story of politics, intrigue, love, and trust. Isola, a young woman who inherits her mother's Chandler home, relocates from California only to find that her mother had lived a secret life of helping undocumented immigrants and that one such immigrant apparently was involved with her. Isola must confront her own confusion and sense of loyalty in a strange and overtly hostile environment. As she gets to know her mother from clues left behind, she grapples with issues of identity and belonging that eventually lead her to explore her life's meaning and to reconnect with her roots.--Jacket.

**The Siege of Leningrad** José Sanchis Sinisterra, 2003 The enormous changes that have taken place in social and political behavior in the past quarter century are reflected through the immense naivete and tenderness of two characters. Priscilla and Natalie to a large extent possess the poetry associated with great clowns. Poetry to express the ambivalence between comedy and tragedy, sorrow and happiness, grandeur and misery, laughter and tears, that forms the clown's humanity.
