Island Rivers John R. Wagner, Jerry K. Jacka, 2018-06-19 Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?

The Class Strikes Back, 2018-01-03 *The Class Strikes Back* examines a number of radical, twenty-first-century workers' struggles. These struggles are characterised by a different kind of unionism and solidarity, arising out of new kinds of labour conditions and responsive to new kinds of social and economic marginalisation. The essays in the collection demonstrate the dramatic growth of syndicalist and autonomist formations and argue for their historical necessity. They show how workers seek to form and join democratic and independent unions that are fundamentally opposed to bureaucratic leadership, compromise, and concessions. Specific case studies dealing with both the Global South and Global North assess the context of local histories and the spatially and temporally located balance of power, while embedding the struggle in a broader picture of resistance and the fight for emancipation. Contributors are: Anne Alexander, Dario Azzellini, Mostafa Bassiouny, Antonios Broumas, Anna Curcio, Demet S. Dinler, Kostas Haritakis, Felix Hauf, Elias Ioakimoglou, Mithilesh Kumar, Kari Lydersen, Chiara Milan, Carlos Olaya, Hansi Oostinga, Ranabir Samaddar, Luke Sinwell, Elmar Wigand.

Trade Unions in China Tim Pringle, 2011-03-09 This book focuses on how the All China Federation of Trade Unions (ACFTU) is reforming under current conditions, and demonstrates that labour unrest is the principal driving force behind trade union reform in China.

The Challenge of Transition Tim Pringle, Simon Clarke, 2010-11-24 This book explores the transformation of employment relations, the rise of worker protest and the reform of trade union practice to ask how successfully the state-socialist trade unions have adapted to their new role of representing the rights and interests of workers.

The Structural Crisis of Capital Istvan Meszaros, 2010-03-01 In this collection of trenchant essays and interviews, István Mészáros, the world's preeminent Marxist philosopher and winner of the 2008 Libertador Award for Critical Thought (the Bolivar Prize), lays bare the exploitative structure of modern capitalism. He argues with great power that the world's economies are on a social and ecological precipice, and that unless we take decisive action to radically transform our societies we will find ourselves thrust headfirst into barbarism and environmental catastrophe. Mészáros, however, is no pessimist. He believes that the multiple crises of world capitalism will encourage the working class to demand center stage in the construction of a new system of production and distribution designed to meet human needs rather than serve the relentless pursuit of profit—a struggle which is already underway in places such as Venezuela. As John Bellamy Foster says in the foreword to this indispensable book, “Today the structural crisis of capital provides the historical setting for a new revolutionary movement for social emancipation in which developments normally taking centuries would flit by like phantoms in decades or even years. But the force for such necessary, vital change, remains with the people themselves, and rests on humanity's willingness to constitute itself as both subject and object of history, through the collective struggle to create a just and sustainable world. This, Mészáros insists, constitutes the unprecedented challenge and burden of our historical time.”

On New Terrain Kim Moody, 2017-11-20 “A detailed and provocative study of how capital has changed since the 1980s and its effects on the working class and political parties in the USA.” —Scottish Left Review *On New Terrain* challenges conventional wisdom about a disappearing working class and the inevitability of a two-party political structure as the only framework for struggle. Through in-depth study of the economic and political shifts at the top of society, Moody shows how recent developments in capitalist production impact the working class and its power to resist the status quo. He argues that this transformed industrial terrain offers new possibilities for organization in the workplace and opens doors for grassroots, independent political action strengthened by reemerging labor and social movements. From the logistics revolution to the unprecedented concentration of business and wealth in the hands of the one percent, *On New Terrain* examines the impact of the current economic terrain on the working class in the United States. Looking beyond the clichés of precarity and the gig economy, Moody shows that the working class and its own self-activity are essential in the global battle against austerity.

"[A] masterful and much-needed book." —Solidarity "Immediately shakes the reader by offering a hard hitting, concrete and sober analysis of the transformation of both the capitalist and working classes of the USA." —Bill Fletcher, Jr., coauthor of *Solidarity Divided* "He explodes myths about the gig economy and the potential to transform the Democratic Party. Readers will put the book down convinced that there is a way for workers to win." —LaborNotes

Red State Revolt Eric Blanc, 2019-04-23 An indispensable window into the changing shape of the American working class and American politics Thirteen months after Trump allegedly captured the allegiance of "the white working class," a strike wave—the first in over four decades—rocked the United States. Inspired by the wildcat victory in West Virginia, teachers in Oklahoma, Arizona, and across the country walked off their jobs and shut down their schools to demand better pay for educators, more funding for students, and an end to years of austerity. Confounding all expectations, these working-class rebellions erupted in regions with Republican electorates, weak unions, and bans on public sector strikes. By mobilizing to take their destinies into their own hands, red state school workers posed a clear alternative to politics as usual. And with similar actions now gaining steam in Los Angeles, Oakland, Denver, and Virginia, there is no sign that this upsurge will be short-lived. *Red State Revolt* is a compelling analysis of the emergence and development of this historic strike wave, with an eye to extracting its main strategic lessons for educators, labor organizer, and radicals across the country. A former high school teacher and longtime activist, Eric Blanc embedded himself into the rank-and-file leaderships of the walkouts, where he was given access to internal organizing meetings and secret Facebook groups inaccessible to most journalists. The result is one of the richest portraits of the labor movement to date, a story populated with the voices of school workers who are winning the fight for the soul of public education—and redrawing the political map of the country at large.

Knowledge and Profanation Martin Mulrow, Asaph Ben-Tov, 2019-06-17 *Knowledge and Profanation* offers numerous instances of profoundly religious polemicists profanizing other religions ad majorem gloriam Dei, as well as sincere adherents of their own religion, whose reflective scholarly undertakings were perceived as profanizing transgressions - occasionally with good reason. In the history of knowledge of religion and profanation unintended consequences often play a decisive role. Can too much knowledge of religion be harmful? Could the profanation of a foreign religion turn out to be a double-edged sword? How much profanating knowledge of other religions could be tolerated in a premodern world? In eleven contributions, internationally renowned scholars analyze cases of learned profanation, committed by scholars ranging from

the Italian Renaissance to the early nineteenth century, as well as several antique predecessors. Contributors are: Asaph Ben-Tov, Ulrich Groetsch, Andreas Mahler, Karl Morrison, Martin Mulrow, Anthony Ossa-Richardson, Wolfgang Spickermann, Riccarda Suitner, John Woodbridge, Azzan Yadin, and Holger Zellentin.

Political Leadership Barbara Kellerman, 1986-09-15 This collection of essays draws on writings from mythologists, sociologists, philosophers, historians, and political activists, to present perspectives on the techniques, philosophies, and theories of political leadership throughout history. The forty-three selections offer a broad range of thought and provide a uniquely comprehensive reference.

Women and Work Susan Ferguson, 2020 An analysis of the divergent strands of feminism, as the fight for women's emancipation takes centre stage.

The Future of Trade Unionism Magnus Sverke, 2019-05-23 First published in 1997, this volume discusses the conditions for contemporary and future unionism in the light of recent economic, political and managerial changes. It presents theoretical and empirical research from Australia, Austria, Canada, Denmark, Italy, the Netherlands, New Zealand, Russia, South Africa, Sweden and the United States. Part 2 provides a rich international description of threats and challenges to contemporary and future unionism. Part 3 focuses on union strategical and structural change. Part 4 is concerned with the consequences of the changing union environment for member-union relations. Magnus Sverke and the contributors here present research addressing how the changing environmental conditions affect unions and their members and demonstrate the importance of applying an international and multi-disciplinary perspective on the analysis of these issues.

The American Dictionary of Criminal Justice Dean J. Champion, 2005 Combines a dictionary of key legal terms with an index of leading United States Supreme Court cases indexed by type of case, such as death penalty, right to counsel, and searches and seizures. The new edition of this resource for students, practitioners, and others who need access to criminal justice information contains 125 new U.S. Supreme Court cases, as well as over 5000 terms, concepts, and names. Includes index.

Symbiosis and Autonomy Franz Ruppert, 2012-07 This is the third book by Professor Franz Ruppert to be translated into English. In it he explores the relationship between our symbiotic interconnectedness and our ability to be autonomous in our lives. The relationship between these two aspects of being is absolutely influenced by early attachment trauma, what Ruppert has termed 'symbiotic trauma': the trauma of an infant attempting to connect with a mother who is herself already traumatised. Additionally Ruppert gives a detailed account of the 'Constellation of the Intention', the process he has devised for working with the psychological splits induced by trauma. This is a particular form of constellation that addresses issues of fragmentation. For those interested in trauma, and understanding how to work with it, this is truly groundbreaking work.

Ruppert's thinking draws on many historical roots but is, even so, particularly unique. It takes us outside our normal ways of thinking about trauma, attachment and what it means to be a human being.

Renamo Alex Vines, 1991 ... this study will testify to the nature of Renamo's chaotic search for power as Mozambique moves from Afro-Marxist policies toward a more democratic multiparty state. —Choice ... an invaluable contribution to understanding why things are so bad and providing some glimmering of how a solution might be found... provides a uniquely useful light on Renamo's murky origins and the means by which it manages to sustain itself. —Africa Analysis ... Alex Vines has compiled the most comprehensive and balanced survey to date of the origins and evolution of the Mozambican counter-revolution. —Third World Quarterly Vines' wide-ranging survey is still the first place to turn for well-documented details on both internal and external aspects of Renamo's war. —International Journal of African Historical Studies ... very informative... it is precisely 'everything you wanted to know about the MNR but were afraid to ask.' —Terence Ranger Vines's encyclopedic book provides essential information about this successful rebel movement which continues to be dangerous for the Mozambican government, even though South Africa has disengaged from its day-to-day operations.

The Roots of Logistics Peter Klaus, Stefanie Müller, 2014-06-11 Is Logistics a science? - The importance and impact of logistics as a function which is critical to the success of companies, of entire industries, and even of nations competing in the global economy, is no longer questioned today. Logistics, within a few decades, has established itself firmly as a profession, an important field of sophisticated managerial practices, and as a large, powerful industry. But in the academic world the question of its status and identity as a science is still being debated. This volume aims to contribute to this debate in two ways: It offers a selection of "classical", in some cases hard to access original international contributions to the evolution of the field in one convenient volume of readings. As such, it should be useful to students of the field, to researchers, and to practitioners who are interested in tracing the logistical ideas and instruments they are using down to their conceptual "roots". Beyond that, by the arrangement and commentaries to the original materials, the editors are proposing their own innovative interpretation of the evolution and identity of the "Science of Logistics". It is an invitation to further debate the potential and future of logistics.

Working through the Past Teri L. Caraway, Maria Lorena Cook, Stephen Crowley, 2015-11-16 Democratization in the developing and postcommunist world has yielded limited gains for labor. Explanations for this phenomenon have focused on the effect of economic crisis and globalization on the capacities of unions to become influential political actors and to secure policies that benefit their members. In contrast, the contributors to *Working through the Past* highlight the critical role that authoritarian legacies play in shaping labor politics in new democracies, providing the first cross-regional analysis of the impact of authoritarianism on labor, focusing on East and Southeast Asia, Eastern Europe, and Latin America. Legacies from

the predemocratic era shape labor's present in ways that both limit and enhance organized labor's power in new democracies. Assessing the comparative impact on a variety of outcomes relevant to labor in widely divergent settings, this volume argues that political legacies provide new insights into why labor movements in some countries have confronted the challenges of neoliberal globalization better than others.
