Geoffrey Pridham, Tatu Vanhanen

The European Union Kristin Archick, 2019-09-15 The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed Brexit) comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the

Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a foe on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's America First foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

Opting Out of the European Union Rebecca Adler-Nissen,2014-08-14 This book provides the first in-depth account of how European Union opt-outs and differentiated integration work in practice.

Europe in 12 Lessons Pascal Fontaine,2017

The European Union: A Very Short Introduction John Pinder,Simon Usherwood,2013-07-25 John Pinder and Simon Usherwood explain the EU in plain readable English. They show how and why it has developed, how the institutions work, and what it does - from the single market to the euro, and from agriculture to the environment.

Democratization in Eastern Europe Geoffrey Pridham,Tatu Vanhanen,2002-11 In light of the sudden collapse of communist systems in Eastern Europe in 1989-90, this book attempts to explain their democratization from a variety of theoretical perspectives.

The Ever-changing Union Christian Egenhofer,Sebastian Kurpas,Louise van Schaik,2009 The Ever-Changing Union provides a concise overview of the EU's history, institutional structures and decision-making processes. As such, its aim is not to cover the breadth or complexity of information that can now be found in EU text books; this overview should provide the reader with all the information required to gain access to a complex institutional system that has been changing ever since its creation. In the first section the European integration process is described from its beginnings in the early 1950s to the current ratification problems of the Treaty of Lisbon. A second part presents the EU's main institutions with their distinct features and a third explains how these institutions interact within the European decision-making process as a whole. In addition, the Reader includes an overview of fundamental principles of the European integration process, a comparison between the EU and federalist systems, the basic features of the EU budget and the key innovations to be introduced by the Treaty of Lisbon. The book is written for those with an initial or occasional interest in European policies and politics. More particularly, the authors believe it to be useful for civil servants, diplomats, businesses, NGO representatives as well as

students and scholars who encounter the European Union in their work.

Andorra and the European Union Michael Emerson,2007

Assuring the Quality of Health Care in the European Union Helena Legido-Quigley,2008 People have always travelled within Europe for work and leisure, although never before with the current intensity. Now, however, they are travelling for many other reasons, including the quest for key services such as health care. Whatever the reason for travelling, one question they ask is If I fall ill, will the health care I receive be of a high standard? This book examines, for the first time, the systems that have been put in place in all of the European Union's 27 Member States. The picture it paints is mixed. Some have well developed systems, setting standards based on the best available evidence, monitoring the care provided, and taking action where it falls short. Others need to overcome significant obstacles.

European Variations as a Key to Cooperation Ernst Hirsch Ballin,Emina Ćerimović,Huub Dijstelbloem,Mathieu Segers,2020-01-02 This Open Access book offers a novel view on the benefits of a lasting variation between the member states in the EU. In order to bring together thirty very different European states and their citizens, the EU will have to offer more scope for variation. Unlike the existing differentiation by means of opt-outs and deviations, variation is not a concession intended to resolve impasses in negotiations; it is, rather, a different structuring principle. It takes differences in needs and in democratically supported convictions seriously. A common core remains necessary, specifically concerning the basic principles of democracy, rule of law, fundamental rights and freedoms, and the common market. By taking this approach, the authors remove the pressure to embrace uniformity from the debate about the EU's future. The book discusses forms of variation that fall both within and outside the current framework of European Union Treaties. The scope for these variations is mapped out in three domains: the internal market; the euro; and asylum, migration and border control.

The European Fund for Strategic Investments: The Legacy European Investment Bank,2021-01-07 The inside story of the European Fund for Strategic Investments from 2015 to 2020 told through interviews with the Managing Director, Deputy Managing Director, members of the Investment Committee and final beneficiaries across Europe. The architects of this €500 billion-plus programme, the head of the EU bank and the president of the European Commission, describe the genesis of this financial pillar of the Investment Plan for Europe. Then the people who ran one of the biggest economic stimulus programmes in history detail how they did it—and what the lessons are for policymakers responding to new crises, including the economic shock caused by the COVID-19 pandemic. The European Fund for Strategic Investments has been one of the good news stories to emerge in a decade of economic uncertainty. It has gone well beyond its highly ambitious target of €500 billion in mobilised investments. The Juncker Plan has made a strong contribution to the 14 million jobs created in the EU between 2015 and 2020. It has become a success in co-financing projects that otherwise might not have been carried through. It has also charted the path towards new ways of financing. This is not only the case in relatively conventional areas,

such as infrastructure, but also in sectors like research and innovation or the contribution to climate change mitigation. This is exactly what makes EFSI so ground-breaking: responding to the needs of the market through continuous financial innovation. The principle of the European Fund for Strategic Investments is here to stay. It has paved the way for its successor, the InvestEU programme, which is to be deployed under the 2021-2027 multiannual financial framework. This publication details why the programme was such a success.

Autonomy of Sport in Europe Jean-Loup Chappelet, 2010-01-01 Given the impact that successive court rulings have had on the organisation of the sports movement in the past 15 years, the autonomy of non-governmental sports organisations has become a highly topical concern in Europe. It is also closely related to the issue of governance, the subject of previous Council of Europe studies. The Enlarged Partial Agreement on Sport (EPAS) decided to explore the concept of autonomy in greater depth by studying the conceptual, political, legal, economic and psycho-sociological aspects of the subject. This study was carried out at the request of the EPAS by the Swiss Graduate School of Public Administration (IDHEAP) on the basis of a questionnaire sent to public authorities in charge of sport and to national and international umbrella sports organisations. In addition to an analysis of the data obtained, documents produced by public authorities and sports organisations on this emerging issue are presented. This study contributes to a better understanding of the concept of autonomy and offers a clear picture of the issues involved.

Global Business Today Global Edition 8e Charles Hill, 2014-09-16 Global Business Today has been developed specifically to meet the needs of international students of business. Written in a refreshing, informative, and accessible style, it has become the most widely used text in the International Business market with its comprehensive and up-to-date contents; focus on managerial implications and application of international business concepts; and incorporation of ancillary resources that enliven the text and make it easier to teach. In addition to boxed material which provides insightful illustrations in every chapter, interesting anecdotes have been carefully weaved into the narrative of the text to engage the reader. Enhancements to the Global Edition include: New Country Focus boxes that provide background on the political, economic, social, or cultural aspects of countries grappling with an international business issue to help raise students' awareness of how national and geographic differences affect the conduct of international business, such as Corruption in the Philippines and the Export Processing Zone Authority of Pakistan. New Management Focus boxes that provide lively illustrations of the relevance of chapter material for the practice of international business, including Patenting Basmati Rice and Expatriate Managers. New Perspective boxes that provide additional context for chapter topics, such as Market Economy in China, Australian SMEs Embrace the Chinese Currency, and Global Variations in Ownership Structure.

Uniting of Europe Ernst B. Haas, Ernst Haas, Dr, 2020-11-15 The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed

in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the power to redirect the loyalties and expectations of political actors. In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a united Europe took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

Europe's Future Sergio Fabbrini, 2019-03-14 The EU's crises have triggered a division between 'sovereignist' and 'Europeanist' forces. Fabbrini proposes a way for dealing with it.

Differentiated Integration Dirk Leuffen, Berthold Rittberger, Frank Schimmelfennig, 2012-10-03 Far from displaying a uniform pattern of integration, the European Union varies significantly across policy areas, institutional development and individual countries. Why do some policies such as the Single Market attract non-EU member states, while some member states choose to opt out of other EU policies? In answering these questions, this innovative new text provides a state-of-the-art introduction to the study of European integration. The authors introduce the most important theories of European integration and apply these to the trajectories of key EU policy areas - including the single market, monetary policy, foreign and security policy, and justice and home affairs. Arguing that no single theory offers a completely convincing explanation of integration and differentiation in the EU, the authors put forward a new analytical perspective for describing and explaining the institutions and policies of the EU and their development over time. Written by a team of prominent scholars in the field, this thought-provoking book provides a new synthesis of integration theory and an original way of thinking about what the EU is and how it works.

The European Central Bank Hanspeter K. Scheller, European Central Bank, 2006 Comprehensive 200-page overview of the ECB from its inception in June 1998 until the present day.

The New European Economy Loukas Tsoukalis, 1993 Many changes have occurred in Europe in the last few years, with more developments arising in light of the impending unification of the European economic market. This volume scrutinizes the process of economic integration in Western Europe and its gradual emergence as a new regional entity. Tsoukalis identifies some distinguishing features of this economy as well as the outstanding issues as European unification approaches. Strongly oriented toward policy, the book contributes to the debate about the nature and future of European economic

development, without neglecting the wider political ramifications of the issues.

The European Union in the 21st Century Stefano Micossi, Gian Luigi Tosato, Centre for European Policy Studies (Brussels, Belgium), 2009 The contributors to this book are all members of EuropEos, a multidisciplinary group of jurists, economists, political scientists, and journalists in an ongoing forum discussing European institutional issues. The essays analyze emerging shifts in common policies, institutional settings, and legitimization, sketching out possible scenarios for the European Union of the 21st century. They are grouped into three sections, devoted to economics and consensus, international projection of the Union, and the institutional framework. Even after the major organizational reforms introduced to the EU by the new Treaty of Lisbon, which came into force in December 2009, Europe appears to remain an entity in flux, in search of its ultimate destiny. In line with the very essence of EuropEos, the views collected in this volume are sometimes at odds in their specific conclusions, but they stem from a common commitment to the European construction.

The New Intergovernmentalism Christopher J. Bickerton, Dermot Hodson, Uwe Puetter, 2015-07-16 The twenty years since the signing of the Maastricht Treaty have been marked by an integration paradox: although the scope of European Union (EU) activity has increased at an unprecedented pace, this increase has largely taken place in the absence of significant new transfers of power to supranational institutions along traditional lines. Conventional theories of European integration struggle to explain this paradox because they equate integration with the empowerment of specific supranational institutions under the traditional Community method. New governance scholars, meanwhile, have not filled this intellectual void, preferring instead to focus on specific deviations from the Community method rather than theorizing about the evolving nature of the European project. The New Intergovernmentalism challenges established assumptions about how member states behave, what supranational institutions want, and where the dividing line between high and low politics is located, and develops a new theoretical framework known as the new intergovernmentalism. The fifteen chapters in this volume by leading political scientists, political economists, and legal scholars explore the scope and limits of the new intergovernmentalism as a theory of post-Maastricht integration and draw conclusions about the profound state of political disequilibrium in which the EU operates. This book is of relevance to EU specialists seeking new ways of thinking about European integration and policy-making, and general readers who wish to understand what has happened to the EU in the two troubled decades since 1992.

The European Higher Education Area Adrian Curaj, Liviu Matei, Remus Pricopie, Jamil Salmi, Peter Scott, 2015-10-12 Bridging the gap between higher education research and policy making was always a challenge, but the recent calls for more evidence-based policies have opened a window of unprecedented opportunity for researchers to bring more contributions to shaping the future of the European Higher Education Area (EHEA). Encouraged by the success of the 2011 first edition, Romania and Armenia have organised a 2nd edition of the Future of Higher Education - Bologna Process Researchers'

Conference (FOHE-BPRC) in November 2014, with the support of the Italian Presidency of the European Union and as part of the official EHEA agenda. Reuniting over 170 researchers from more than 30 countries, the event was a forum to debate the trends and challenges faced by higher education today and look at the future of European cooperation in higher education. The research volumes offer unique insights regarding the state of affairs of European higher education and research, as well as forward-looking policy proposals. More than 50 articles focus on essential themes in higher education: Internationalization of higher education; Financing and governance; Excellence and the diversification of missions; Teaching, learning and student engagement; Equity and the social dimension of higher education; Education, research and innovation; Quality assurance, The impacts of the Bologna Process on the EHEA and beyond and Evidence-based policies in higher education. The Bologna process was launched at a time of great optimism about the future of the European project - to which, of course, the reform of higher education across the continent has made a major contribution. Today, for the present, that optimism has faded as economic troubles have accumulated in the Euro-zone, political tensions have been increased on issues such as immigration and armed conflict has broken out in Ukraine. There is clearly a risk that, against this troubled background, the Bologna process itself may falter. There are already signs that it has been downgraded in some countries with evidence of political withdrawal. All the more reason for the voice of higher education researchers to be heard. Since the first conference they have established themselves as powerful stakeholders in the development of the EHEA, who are helping to maintain the momentum of the Bologna process. Their pivotal role has been strengthened by the second Bucharest conference. Peter Scott, Institute of Education, London (General Rapporteur of the FOHE-BPRC first edition)
