Ace Your Exam Andrew Northedge, 2020-12-08 This practical and reassuring guide will ensure your students pass their exams with flying colours. Ace Your Exam establishes a clear, simple framework for revision and helps students get to grips with what exams are all about. Part 1 begins by exploring institutional expectations and common anxieties and exam myths, before showing students how to tackle various types of exam, including essay-based exams, short-answer questions, multiple-choice questions, calculation-based exams and open book exams. Part 2 helps readers plot an effective revision strategy for an imminent exam and, equally important, a detailed strategy for optimal use of time and productive powers during the exam. Finally, Part 3 helps students put their plans into action. Ace Your Exam will be an essential companion to all students preparing for and taking exams.

Promoting Health and Wellness in Underserved Communities Anabel Pelham,Elizabeth Sills,2023-07-03 Starting from the premise that our health status, vulnerability to accidents and disease, and life spans – as individuals and communities – are determined by the organization, delivery, and financing (or lack thereof) of health care, this book explores how educators and community caretakers teach the complex web of inter-connection between the micro level of individual health and well-being and the macro level of larger social structures. Through the lenses of courses in anthropology, ESL, gerontology, management information systems, nursing, nutrition, psychology, public health, and sociology, the contributors offer examples of intergenerational and interdisciplinary practice, and share cutting-edge academic creativity to model how to employ community service learning to promote social change.

Survey of Science Specialties Parent Lesson Plan ,2013-08-01 Survey of Science Specialities Course Description This is the suggested course sequence that allows two core areas of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials within each semester are independent of one another to allow flexibility. Quarter 1: Archaeology The Archaeology Book takes you on an exciting exploration of history and ancient cultures. You will learn both the techniques of the archaeologist and the accounts of some of the richest discoveries of the Middle East that demonstrate the accuracy and historicity of the Bible. You will unearth: how archaeologists know what life was like in the past, why broken pottery can tell more than gold or treasure can, some of the difficulties in dating ancient artifacts, how the brilliance of ancient cultures demonstrates God’s creation, history of ancient cultures, including the Hittites, Babylonians, and Egyptians, the early development of the alphabet and its impact on discovery, the numerous archaeological finds that confirm biblical history. Quarter 2: Geology The Geology Book will teach: what really carved the Grand Canyon, how thick the Earth’s crust is, why the Earth is unique for life, the varied features of the Earth’s surface—from plains to peaks, how sedimentary deposition occurs through water, wind, and ice, effects of erosion, ways in which sediments become sedimentary rock, fossilization and the age of the dinosaurs, the powerful effects of volcanic activity, continental drift theory, radioisotope and carbon dating, geologic processes of the past. Our planet is a most suitable home. Its practical benefits are also enhanced by the sheer beauty of rolling hills, solitary plains, churning seas and rivers, and majestic mountains—all set in place by processes that are relevant to today’s entire population of this spinning rock we call home. Quarter 3: Cave Explore deep into the hidden wonders beneath the surface as cave expert Dr. Emil Silvestru takes you on an

illuminating and educational journey through the mysterious world of caves. Discover the beautiful, thriving ecology, unique animals, and fragile balance of this little-seen ecosystem in caves from around the globe. The Cave Book will teach you about: a creationary model for how caves form, a history of how caves have been used by humans for shelter and worship, how old caves really are, the surprising world of Neanderthals and their connection to modern humans, how to make a stone axe and about early tools, just how long it really takes for cave formations to form, unusual animals that make caves their home, examples of how connected caves are to mythology of many cultures, the climate and geologic processes and features of caves and karst rocks, the process by which ice caves form, exploration, hazards, and record-setting caves, how caves form, and features above and below the surface. Quarter 4: Fossil Fossils have fascinated humans for centuries. But where did they come from, and how long have they been around? These and many other questions are answered in this remarkable book. The Fossil Book will teach you about: the origin of fossils, how to start your own fossil collection, what kinds of fossils can be commonly found, the age of fossils, how scientists find and preserve fossils, how to identify kinds of fossils, how the Flood affected fossil formation, the Geologic Column Diagram, the difference between evolutionists' and creationists' views on fossils, the "four Cs" of biblical creation, the different kinds of rocks fossils are found in, coal and oil formation. Learning about fossils, their origins, and how to collect them can be both fun and educational.

Motivation and Learning Strategies for College Success Myron H. Dembo,Helena Seli,2012 This popular text combines theory, research, and applications to teach college students how to become more self-regulated learners. Study skills are treated as a serious academic course of study. Students learn about human motivation and learning as they improve their study skills. The focus is on relevant information and features designed to help students to identify the components of academic learning that contribute to high achievement, to master and practice effective learning and study strategies, and then to complete self-regulation studies whereby they are taught a process for improving their academic behavior. A framework organized around six components related to academic success (motivation, methods of learning, time management, control of the physical and social environment, and monitoring performance) makes it easy for students to understand what they need to do to become more successful in the classroom. Pedagogical Features include Exercises; Follow-Up Activities; Student Reflections; Chapter-end Reviews ; Key Point; and a Glossary. New in the Fourth Edition: More emphasis on research findings; expanded discussion of motivation ; more emphasis on the impact of students' use of social networking and technology; research about neuroscience in relationship to motivation and learning; new exercises, including web-based activities; Companion Website, including an Instructor's Manual

Practical Jazz Theory for Improvisation Craig Fraedrich,2014-06-09 Practical Jazz Theory for Improvisation is a jazz theory text with an emphasis on improvisation. Originally conceived as the Jazz Theory/Improvisation text and curriculum for the 2014 National Jazz Workshop, it has already been adopted by several university jazz programs. This book begins at a

level accessible by students just beginning in jazz, with reference appendices to fill any fundamental music theory knowledge, yet progresses systematically in technical and conceptual content well beyond all but the most advanced college improvisation classes. With notated examples and exercises demonstrating all concepts as well free downloadable play-along tracks for all exercises, this book will have students playing the material almost immediately. While not required, the available 300+ page companion book, Practical Jazz Theory for Improvisation Exercise Workbook (available in treble and bass clef) has all exercises notated in all keys to allow for quicker technical and aural advancement.
