The Knight in Rusty Armor Robert Fisher,2017-09-10 The Knight in Rusty Armor is a 1987 novella by Robert Fisher. It tells the tale of a knight obsessed with being a knight, so much so that he spends all his time in his armor and completely alienates his family. One day, he discovers that he cannot take his armor off, not even able to lift his visor for meals. He learns that the wizard Merlin may be able to help him, so he sets out to find him.

Global Perspectives in Cancer Care Michael Silbermann,Ann Berger,2022 Contemporary medical models focus predominantly on the technical and financial aspects of care. While these are important aspects of care, they fail to include what may be the most critical need of patients and families - that is, the whole-person approach to care where psychosocial and spiritual needs are viewed as essential and just as important as the physical. Cecily Saunders, the founder of hospice, was one of the first to describe the concept of 'total pain', which led to the biopsychosocial and spiritual model of care. In 2014, the World Health Assembly for the WHO passed a resolution which included spiritual care as an essential domain of palliative care, stating that Palliative Care is an approach that improves the quality of life of patients through the prevention and relief of suffering by means of early identification and correct assessment and treatment of pain and other problems, whether physical, psychosocial or spiritual. WHO also noted that it is the ethical duty of health care professionals to alleviate pain and suffering, whether physical, psychosocial or spiritual and further supported an interdisciplinary model by noting the need for collaboration between professional palliative care providers and support care providers, including spiritual support and counseling--

Shaky Colonialism Charles F. Walker,2008-05-26 Contemporary natural disasters such as Hurricane Katrina are quickly followed by disagreements about whether and how communities should be rebuilt, whether political leaders represent the

community's best interests, and whether the devastation could have been prevented. *Shaky Colonialism* demonstrates that many of the same issues animated the aftermath of disasters more than 250 years ago. On October 28, 1746, a massive earthquake ravaged Lima, a bustling city of 50,000, capital of the Peruvian Viceroyalty, and the heart of Spain's territories in South America. Half an hour later, a tsunami destroyed the nearby port of Callao. The earthquake-tsunami demolished churches and major buildings, damaged food and water supplies, and suspended normal social codes, throwing people of different social classes together and prompting widespread chaos. In *Shaky Colonialism*, Charles F. Walker examines reactions to the catastrophe, the Viceroy's plans to rebuild the city, and the opposition he encountered from the Church, the Spanish Crown, and Lima's multiracial population. Through his ambitious rebuilding plan, the Viceroy sought to assert the power of the colonial state over the Church, the upper classes, and other groups. Agreeing with most inhabitants of the fervently Catholic city that the earthquake-tsunami was a manifestation of God's wrath for Lima's decadent ways, he hoped to reign in the city's baroque excesses and to tame the city's notoriously independent women. To his great surprise, almost everyone objected to his plan, sparking widespread debate about political power and urbanism. Illuminating the shaky foundations of Spanish control in Lima, Walker describes the latent conflicts—about class, race, gender, religion, and the very definition of an ordered society—brought to the fore by the earthquake-tsunami of 1746.

Fischer Black and the Revolutionary Idea of Finance Perry Mehrling, Aaron Brown, 2011-11-30 praise for FISCHER BLACK AND THE REVOLUTIONARY IDEA OF FINANCE The story of Fischer Black. . . . is remarkable both because of the creativity of the man and because of the revolution he brought to Wall Street. . . . Mehrling's book is fascinating. FINANCIAL TIMES A fascinating history of things we take for granted in our everyday financial lives. THE NEW YORK TIMES Mehrling's book is essential reading for anyone interested in the development of modern finance or the life of an idiosyncratic creative genius. PUBLISHERS WEEKLY Fischer Black was more than a vital force in the development of finance theory. He was also a character. Perry Mehrling has captured both sides of the picture: the evolution of thinking about the pricing of risk and time, as well as the thinkers, especially this fascinating eccentric, who worked it out. ROBERT M. SOWLO, Nobel laureate and Institute Professor of Economics, Emeritus, Massachusetts Institute of Technology Although I worked closely with Fischer for nine years at Goldman Sachs and clearly recognized both his genius and the breadth and originality of his ideas, until I read this book, I had only the vaguest grasp of the source of his inspiration and no understanding at all of the source of his many idiosyncrasies. BOB LITTEMAN, Partner, Kepos Capital Perry Mehrling has done a remarkable job of tracing the intellectual and personal development of one of the most original and complex thinkers of our generation. Fischer Black deserved it: a charming and brilliant book about a charming and brilliant man. ROBERT E. LUCAS JR., Nobel laureate and Professor of Economics, The University of Chicago

Eighteenth-century Reforms in the Caribbean Altagracia Ortiz,1983 A study of the application of the Bourbon reforms to Puerto Rico during the reign of Charles III. The author examines in detail the administration of Miguel de Muesas, for it was during his bureaucratic rule that the first reforms were initiated.

Cartoonists, Works, and Characters in the United States through 2005 John Lent,2006-04-30 This penultimate work in John Lent's series of bibliographies on comic art gathers together an astounding array of citations on American cartoonists and their work. Author John Lent has used all manner of methods to gather the citations, searching library and online databases, contacting scholars and other professionals, attending conferences and festivals, and scanning hundreds of periodicals. He has gone to great length to categorize the citations in an easy-to-use, scholarly fashion, and in the process, has helped to establish the field of comic art as an important part of social science and humanities research. The ten volumes in this series, covering all regions of the world, constitute the largest printed bibliography of comic art in the world, and serve as the beacon guiding the burgeoning fields of animation, comics, and cartooning. They are the definitive works on comic art research, and are exhaustive in their inclusiveness, covering all types of publications (academic, trade, popular, fan, etc.) from all over the world. Also included in these books are citations to systematically-researched academic exercises, as well as more ephemeral sources such as fanzines, press articles, and fugitive materials (conference papers, unpublished documents, etc.), attesting to Lent's belief that all pieces of information are vital in a new field of study such as comic art.

Introduction to the Study of Law Dr. Felipe de Jesús Alvidrez Fierro,2018-04-28 In this important work, Dr. Felipe Fierro offers a comprehensive view on the subject of Introduction to the Study of Law, in which he revives the use of Gnoseology, Philosophy, History and Logic as Auxiliary Sciences; and exposes how the abandonment of such has contributed to the exponential growth of Skepticism and Relativism, currently prevailing in the legal world. The above, through extensive experience in teaching Law from the Aristotelian-Thomistic platform, based on the elementary assumption that we must first prove the existence of the object of study, and contrast main legal branches in topics such as: what is Law?, why is Science?, what are Law, Justice, Facultative rights and the Common Good?; supported by extensive and select bibliography. In addition, the being, nature, concept, essence and properties of the sources, fundamentals and classification are described. But important elements such as knowledge, order, principles, Jurisprudence, and Natural law, fundamental legal concepts, the legislative process, the Constitution, interpretation and others are not absent. Morality and Legal Law are obligatory markers, which although considered in their own field, are not excluded, but different as to object and method. Predominantly, Justice is exposed as one of the great values of the Law, and main theories in order to offer future lawyers the basis regarding the current Science of Law and its significance.

Emotions in a Crusading Context, 1095-1291 Stephen J. Spencer, 2019 *Emotions in a Crusading Context* is the first book-length study of the emotional rhetoric of crusading. It investigates the ways in which a number of emotions and affective displays—primarily fear, anger, and weeping—were understood, represented, and utilised in twelfth- and thirteenth-century western narratives of the crusades, making use of a broad range of comparative material to gauge the distinctiveness of those texts: crusader letters, papal encyclicals, model sermons, chansons de geste, lyrics, and an array of theological and philosophical treatises. In addition to charting continuities and changes over time in the emotional landscape of crusading, this study identifies the underlying influences which shaped how medieval authors represented and used emotions; analyzes the passions crusade participants were expected to embrace and reject; and assesses whether the idea of crusading created a profoundly new set of attitudes towards emotions. *Emotions in a Crusading Context* calls on scholars of the crusades to reject the traditional methodological approach of taking the emotional descriptions embedded within historical narratives as straightforward reflections of protagonists' lived feelings, and in so doing challenges the long historiographical tradition of reconstructing participants' beliefs and experiences from these texts. Within the history of emotions, Stephen J. Spencer demonstrates that, despite the ongoing drive to develop new methodologies for studying the emotional standards of the past, typified by experiments in 'neurohistory', the social constructionist (or cultural-historical) approach still has much to offer the historian of medieval emotions.

Handbook of Middle American Indians, Volumes 14 and 15 Robert Wauchope, 2015-02-18 Volumes 14 and 15 of the *Handbook of Middle American Indians*, published in cooperation with the Middle American Research Institute of Tulane University under the general editorship of Robert Wauchope (1909–1979), constitute Parts 3 and 4 of the *Guide to Ethnohistorical Sources*. The *Guide* has been assembled under the volume editorship of the late Howard F. Cline, Director of the Hispanic Foundation in the Library of Congress, with Charles Gibson, John B. Glass, and H. B. Nicholson as associate volume editors. It covers geography and ethnogeography (Volume 12); sources in the European tradition (Volume 13); and sources in the native tradition: prose and pictorial materials, checklist of repositories, title and synonymy index, and annotated bibliography on native sources (Volumes 14 and 15). The present volumes contain the following studies on sources in the native tradition: “A Survey of Native Middle American Pictorial Manuscripts,” by John B. Glass “A Census of Native Middle American Pictorial Manuscripts,” by John B. Glass in collaboration with Donald Robertson “Techialoyan Manuscripts and Paintings, with a Catalog,” by Donald Robertson “A Census of Middle American Testarian Manuscripts,” by John B. Glass “A Catalog of Falsified Middle American Pictorial Manuscripts,” by John B. Glass “Prose Sources in the Native Historical Tradition,” by Charles Gibson and John B. Glass “A Checklist of Institutional Holdings of Middle American Manuscripts in the Native Historical Tradition,” by John B. Glass “The Botutini Collection,” by John B. Glass “Middle American Ethnohistory: An Overview” by H. B. Nicholson The *Handbook of Middle American Indians* was assembled and edited at the Middle American

Research Institute of Tulane University with the assistance of grants from the National Science Foundation and under the sponsorship of the National Research Council Committee on Latin American Anthropology.

Ethical Hermeneutics Michael D. Barber, 1998 Enrique Dussel's philosophy has gained worldwide prominence. This is the first full-length book on Dussel's philosophy ever to appear in English. The essence of Dussel's thought is presented through the concept of ethical hermeneutics, which seeks to interpret reality from the viewpoint of what Emmanuel Levinas presents as the other - those who are vanquished, forgotten, or excluded from existent socio-political or cultural systems.

Chiselled Horizons: A Multi-Cultural Approach to Visual Literacy Taina Brown, Alejandro Miseses Castellanos, 2019-01-04 This volume was first published by Inter-Disciplinary Press in 2016. Shaping visual literacy has been at the forefront of contemporary discourse, as images have increasingly surpassed words in becoming the primary vehicles to persuade our emotions. Visually encoded domains of symbols and signs inform the educational, public and entertainment industries increasingly as an undifferentiated whole, aided by globalizing media forces in various forms. Whether top-down, peer-peer, one-to-many, or many-to-many, this volume attempts to derive sets of rules used to visually decode patterns present in certain media formats - press, cinema, television and maps, among others - and the place of the spectator in their respective dynamics. The topics discussed transition through various approaches to deconstruct mass media influences to engage critical thinking skills, and ending with a collection of chapters dedicated to exploring their effects upon children, and the capacity to be implemented to foster collaboration-based creative learning environments.

Climate and Catastrophe in Cuba and the Atlantic World in the Age of Revolution Sherry Johnson, 2011-11-14 From 1750 to 1800, a critical period that saw the American Revolution, French Revolution, and Haitian Revolution, the Atlantic world experienced a series of environmental crises, including more frequent and severe hurricanes and extended drought. Drawing on historical climatology, environmental history, and Cuban and American colonial history, Sherry Johnson innovatively integrates the region's experience with extreme weather events and patterns into the history of the Spanish Caribbean and the Atlantic world. By superimposing this history of natural disasters over the conventional timeline of sociopolitical and economic events in Caribbean colonial history, Johnson presents an alternative analysis in which some of the signal events of the Age of Revolution are seen as consequences of ecological crisis and of the resulting measures for disaster relief. For example, Johnson finds that the general adoption in 1778 of free trade in the Americas was catalyzed by recognition of the harsh realities of food scarcity and the needs of local colonists reeling from a series of natural disasters. Weather-induced environmental crises and slow responses from imperial authorities, Johnson argues, played an inextricable and, until now,

largely unacknowledged role in the rise of revolutionary sentiments in the eighteenth-century Caribbean.

Writing Mexican History Eric Van Young, 2012-03-14 Essential essays from “one of the most prolific, provocative, and pre-eminent historians working in the field of Mexican and Latin-American history today” (Susan Deans-Smith, author of *Bureaucrats, Planters, and Workers*). This collection brings together a group of important and influential essays on Mexican history and historiography by Eric Van Young, a leading scholar in the field. The essays, several of which appear here in English for the first time, are primarily historiographical; that is, they address the ways in which separate historical literatures have developed over time. They cover a wide range of topics: the historiography of the colonial and nineteenth-century Mexican and Latin American countryside; historical writing in English on the history of colonial Mexico; British, American, and Mexican historical writing on the Mexican Independence movement; the methodology of regional and cultural history; and the relationship of cultural to economic history. Some of the essays have been and will continue to be controversial, while others—for example, those on studies of the Mexican hacienda since 1980, on the theory and method of regional history, and on the “new cultural history” of Mexico—are widely considered classics of the genre. “Van Young is one of the two or three preeminent thinkers in the Mexican and Latin American field whose essays are of such pioneering and enduring value to warrant this kind of greatest hits collection. Not only does he cross fields and disciplines and integrate northern and southern intellectual currents, his essays are a pleasure to read and constitute a rare combination of analytical bite, erudition, and playfulness.” —Gilbert M. Joseph, Yale University
