The Dark Secrets of SHTF Survival Selco Begovic, 2019-01-13 This is not a guide that will tell you step-by-step HOW to survive. This is a reality check that will tell you that everything you have expected and planned for is probably wrong. Selco is a household name in prepping and survival circles. He survived the Balkan War in a city with no power, no running water, and no supplies. For a year, he and his family fought every single day for bare subsistence. Over the years since the war, Selco has written nearly a quarter of a million words of memories, articles, and advice. This book is a collection of his darkest moments. The first thing you must do when disaster strikes is to adapt quickly to the new rules that apply when the SHTF. And to do that, you need to know what it's like so you won't be shocked...frozen...paralyzed by the atrocities taking place right in front of you. This book is Selco's version of tough love. There's nothing watered down about it. It is a collection of stories, memories, and articles he has documented over the past decade. He has revisited those horrible days to give us the reality check we must have. It's a glimpse into the day-to-day events of the SHTF. It is smelly. It is dirty. It's dark and brutal. It's REAL. It is all the stuff that Selco rarely talks about because the memories are so ugly. WARNING: This book contains graphic content. It truly gives you the terrifying reality of the SHTF and you need to know these things. in order to survive if you ever find yourself in the chaos and mayhem of an apocalyptic situation. It is not a cheery, optimistic overview of the SHTF. It's dark, brutal, and shocking. It is the real, gritty truth about what it's like to live in a world where everyone has become something other than an ordinary human. Where death and fear are constantly near. Where evil comes out to play. Don't say we didn't warn you. PLEASE NOTE: This book is written by a person from Bosnia. English is not Selco's first language. The book is lightly edited for clarity but these stories are his and should be told in his own words.

SHTF Survival Stories Selco Begovic, 2020-02-03 There are many books out there on all the different aspects of preparedness and survival that can provide you with information, checklists, and theoretical solutions to potential problems. But no matter how much you read or how well-researched the books you choose are, there's only so much you can take away from these tomes. Getting your information from someone who has survived a sh*t hit the fan crisis will take your preparedness to an entirely different level. Meet Selco, a legend in the preparedness world. He survived in a city that was under siege for more than a year. He had no power, no running water, no stores for supplies, and every day, he ran the risk of meeting a violent death, whether by shells, sniper fire, or a person intent on hurting others. This book is a collection of

memories from the darkest days of the Balkan War, where each moment could have been his last. This isn't a cheerful and uplifting guide to survival. There's no misplaced optimism. There's only Selco, the darkness he faced, and the grim reality of an SHTF scenario most of us can't even fathom. But if you can grasp it all before it happens, you'll be much further ahead than those who are frozen in shock.***Please note that Selco's first language is not English. These stories have been lightly edited for clarity, but they still retain the accent.

The Merciless Dead John Frederick Burke,2008 It all began as a tribute to the memory of families ruthlessly driven from their crofts during the Highland Clearances. A descendant who has done well for himself overseas decides to fund a sentimental rebuilding of his ancestors' home, calling in experts to authenticate each relic and to trace the legendary Ross Tapestry. But when one of his most bitter enemies is murdered, and one of his most conscientious employees finds holes in the basic story and dies near a tragic historic site, the researchers find themselves caught up in a menacing game. The Tortured and the Damned Robert Payne,1977

The 2030 Spike Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

The S. H. T. F. Art of War Jeffrey Olson,2013-03-28 It doesn't matter if it's an EMP, solar flare, earthquake, global financial crash or pandemic that causes a societal collapse.When the grid goes down and the lights go out, many won't be prepared to defend against those who are organized and intent on doing them harm.Even with advanced warning of an impending winter storm or hurricane, the News routinely shows people running, last minute to the store for basic supplies. Humans for the most part, are unprepared, reactionary creatures and store shelves don't hold enough supplies for everyone.When people suddenly need life saving knowledge on survival, and warfare, they're going to be desperately scrambling for that information. They aren't going to have the time to sit down and read another novel about an apocalyptic

survivor trying to make his way home after (insert trendy S.H.T.F. event here). This book covers those controversial, real world subjects you never think about unless you live in a war zone or an underdeveloped country. It pushes your mind into an uncomfortable way of thinking. As the saying goes; No Pain, No Gain. It's stripped down to quickly deliver the reader information on topics such as how the criminal element will conduct their reign of terror. It covers how to pick a winning survival team, how to prepare for a stay at a FEMA camp, what to expect in a 100 mile traffic jam and what it takes to be a post apocalyptic scavenger. It also provides a list of post collapse professions that ensure you're essential to a grid down community. Plus a whole lot more.

Bunker Bradley Garrett, 2021-08-03 Since prehistory, bunkers have been built as protection from cataclysmic social and environmental forces, and as places of power and transformation. Today, the bunker has become the extreme expression of our greatest fears- from pandemics to climate change and nuclear war. And once you look, it doesn't take long to start seeing bunkers everywhere. In *Bunker*, acclaimed urban explorer and cultural geographer Bradley Garrett explores the global and rapidly growing movement of 'prepping' for social and environmental collapse, or 'Doomsday'. From the 'dread merchants' hustling safe spaces in the American mid-West to eco-fortresses in Thailand, from geoscrapers to armoured mobile bunkers, *Bunker* is a brilliant, original and never less than deeply disturbing story from the frontlines of the way we live now, an illuminating reflection on our age of disquiet and dread that brings it into new, sharp focus. The bunker, Garrett shows, is all around us, in malls, airports, gated communities, the vehicles we drive. Most of all, he shows, it's in our minds.
