**The Enemies of Progress** Austin Williams, 2016-12-02 This polemical book examines the concept of sustainability and presents a critical exploration of its all-pervasive influence on society, arguing that sustainability, manifested in several guises, represents a pernicious and corrosive doctrine that has survived primarily because there seems to be no alternative to its canon: in effect, its bi-partisan appeal has depressed critical engagement and neutered politics. It is a malign philosophy of misanthropy, low aspirations and restraint. This book argues for a destruction of the mantra of sustainability, removing its unthinking status as orthodoxy, and for the reinstatement of the notions of development, progress, experimentation and ambition in its place. Al Gore insists that the 'debate is over', while musician K.T. Tunstall, spokesperson for 'Global Cool', a campaign to get stars to minimize their carbon footprint, says 'so many people are getting involved that it is becoming really quite uncool not to be involved'. This book will say that it might not be cool, but it is imperative to argue against the moralizing of politics so that we can start to unpick the contemporary world of restrictive, sustainable practices.

*The Speed Handbook* Enda Duffy, 2009-07-20 Speed, the sensation one gets when driving fast, was described by Aldous Huxley as the single new pleasure invented by modernity. The Speed Handbook is a virtuoso exploration of Huxley's claim. Enda Duffy shows how the experience of speed has always been political and how it has affected nearly all aspects of modern culture. Primarily a result of the mass-produced automobile, the experience of speed became the quintessential way for individuals to experience modernity, to feel modernity in their bones. Duffy plunges full-throttle into speed's "adrenaline aesthetics," offering deft readings of works ranging from F. Scott Fitzgerald's *The Great Gatsby*, through J. G. Ballard's *Crash*, to the cautionary consumerism of Ralph Nader. He describes how speed changed understandings of space, distance, chance, and violence; how the experience of speed was commodified in the dawning era of mass consumption; and how society was incited to abhor slowness and desire speed. He examines how people were trained by new media such as the cinema to see, hear, and sense speed, and how speed, demanded of the efficient assembly-line worker, was given back to that worker as the chief thrill of leisure. Assessing speed's political implications, Duffy considers how speed pleasure was offered to citizens based on criteria including their ability to pay and their gender, and how speed quickly became something to be patrolled by governments. Drawing on novels, news reports, photography, advertising, and much more, Duffy provides a

breakneck tour through the cultural dynamics of speed.

*The Great Neighborhood Book* Jay Walljasper, Project for Public Spaces, 2007-06-01 Practical ways to make your neighborhood come alive!

**Car Country** Christopher W. Wells, 2013-05-15 For most people in the United States, going almost anywhere begins with reaching for the car keys. This is true, Christopher Wells argues, because the United States is Car Country—a nation dominated by landscapes that are difficult, inconvenient, and often unsafe to navigate by those who are not sitting behind the wheel of a car. The prevalence of car-dependent landscapes seems perfectly natural to us today, but it is, in fact, a relatively new historical development. In Car Country, Wells rejects the idea that the nation's automotive status quo can be explained as a simple byproduct of an ardent love affair with the automobile. Instead, he takes readers on a tour of the evolving American landscape, charting the ways that transportation policies and land-use practices have combined to reshape nearly every element of the built environment around the easy movement of automobiles. Wells untangles the complicated relationships between automobiles and the environment, allowing readers to see the everyday world in a completely new way. The result is a history that is essential for understanding American transportation and land-use issues today. Watch the book trailer: <http://www.youtube.com/watch?v=48LTKOxxrXQ>

Highway Robbery Robert Doyle Bullard, Glenn Steve Johnson, Angel O. Torres, 2004 Firmly places transportation equity at the center of the ongoing civil rights struggle for equal opportunity.

Better yet, she shares the 411 so we can easily understand it and get control of our pocket books and bank accounts. Topics include: Identifying Your Spending Personality Choosing a Money Lifestyle Chemo for Chronic Bad Debt If Men Are from Home Depot, Women Are from Macy's Coming Soon: A Girl and Her Brilliant Investments A Girl and Her Luminous Retirement A Girl and Her Fabulous Home Business

**The River of History** Peter Farrugia, 2005 The articles in this collection are dedicated to the proposition that human beings make history, not just in the sense of being agents of change in the here and now, but in the sense that we interpret, appropriate and make use of the past for our own purposes in the future. Covering topics that range from teaching history, to the concept of property rights and the discipline of history in the television age, these essays will radically alter the notion of how we 'make history'. It will show that we are never fully able to bend history to our will, and that as we attempt to do so, we are often shocked at the turns it takes, despite our best efforts to shape it for future generations.

Manufacturing Green Prosperity Jon Rynn, 2010-07-12 This timely set of solutions based on a new theory of economics

shows how America can reverse its inexorable economic decline and stop the bleeding of its middle class by rebuilding its manufacturing sector on a green basis. *Manufacturing Green Prosperity: The Power to Rebuild the American Middle Class* connects two critical issues: the importance of manufacturing to the growth and fair distribution of national wealth and the need to create an environmentally sustainable society. In so doing, the book offers groundbreaking arguments demonstrating the centrality of manufacturing and shows ways in which creating a green economy will rebuild U.S. manufacturing and expand the middle class. Drawing from the fields of political science, economics, ecology, history, engineering, and philosophy, the author challenges existing myths about manufacturing, exposes the weaknesses of neoclassical economics, and proposes a production-centered alternative. America, he persuasively argues, needs a sophisticated, green manufacturing base in order to create an entirely new transportation and energy infrastructure—one that will make cities ecologically sustainable; prevent the worst effects of global warming; protect vulnerable ecosystems; and counter the depletion of oil, coal, and other critical natural resources.

**Reading Bataille Now** Shannon Winnubst, 2007-01-08 The work of Georges Bataille (1897-1962) has often been reduced to his outrageous, erotic, and libertine fiction and essays. This book presents contemporary interpretations that situate Bataille in French and European intellectual traditions, and brings forward key concepts to understand the challenges posed by his important work and philosophy

Medical Anthropology and the World System Hans A. Baer, Merrill Singer, Ida Susser, 2013-05-23 Now in its third edition, this textbook serves to frame understandings of health, health-related behavior, and health care in light of social and health inequality as well as structural violence. It also examines how the exercise of power in the health arena and in society overall impacts human health and well-being. *Medical Anthropology and the World System: Critical Perspectives, Third Edition* includes updated and expanded information on medical anthropology, resulting in an even more comprehensive resource for undergraduate students, graduate students, and researchers worldwide. As in the previous versions of this text, the authors provide insights from the perspective of critical medical anthropology, a well-established theoretical viewpoint from which faculty, researchers, and students study medical anthropology. It addresses the nature and scope of medical anthropology; the biosocial and political ecological origins of disease, health inequities, and social suffering; and the nature of medical systems in indigenous and pre-capitalist state societies and modern societies. The third edition also includes new material on the relationship between climate change and health. Finally, this textbook explores health praxis and the struggle for a healthy world.

**A Road Runs Through it** Thomas Reed Petersen, 2006 This book explores what many consider to be the most important issue in the re-wilding of America today—roads. Not highways, but the 500,000 miles of roads built on federal forest lands to access natural resources and then abandoned when the resources were removed. *A Road Runs Through It* features a collection of essays by some of today's finest nonfiction writers: Peter Matthiessen, Barry Lopez, Janisse Ray, David Quammen, David Petersen, Stephanie Mills, William Kittredge, and two dozen others. Together, they cover all aspects of roads and their impact on the wilderness. As all royalties from this book are being donated to Wildlands CPR, a nonprofit organization dedicated to protecting and reviving wild places by promoting road removal and re-vegetation, this book not only educates and informs on the issues of roads—it becomes part of the solution. **The Nature of College** James J. Farrell, 2010-10-01 Stately oaks, ivy-covered walls, the opposite sex — these are the things that likely come to mind for most Americans when they think about the nature of college. But the real nature of college is hidden in plain sight: it's flowing out of the keg, it's woven into the mascots on our T-shirts. Engaging in a deep and richly entertaining study of campus ecology, *The Nature of College* explores one day in the life of the average student, questioning what natural is and what common sense is really good for and weighing the collective impacts of the everyday. In the end, this fascinating, highly original book rediscovers and repurposes the great and timeless opportunity presented by college: to study the American way of life, and to develop a more sustainable, better way to live.

Radical Simplicity Jim Merkel, 2003-09-03 Imagine you are first in line at a potluck buffet. The spread includes not just food and water, but all the materials needed for shelter, clothing, healthcare, and education. How do you know how much to

take? How much is enough to leave for your neighbors behind you - not just the six billion people, but the wildlife, and the as-yet-unborn? In the face of looming ecological disaster, many people feel the need to change their own lifestyles as a tangible way of transforming our unsustainable culture. *Radical Simplicity* is the first book that guides the reader to a personal sustainability goal, then offers a process to monitor progress to a lifestyle that is equitable amongst all people, species, and generations. It employs three tools to help readers begin their customized journey to simplicity: It builds on steps from *Your Money or Your Life* so readers can design their own personal economics to save money, get free of debt, and align their work with their values. It uses refined tools from *Our Ecological Footprint* so readers can measure how much nature is needed to supply all they consume and absorb their waste. And by advocating time alone in wild nature, it opens readers to another reality with humanity as one species among many on a complex and inter-related planet. Combining lyrical narrative, compassionate advocacy and absorbing science, *Radical Simplicity* is a practical, personal answer to 21st century challenges that will appeal as much to Cultural Creatives and students as to spiritual seekers, policy makers and sustainability professionals.

Big Green Purse Diane Maceachern, 2008-02-28 Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming-even hopeless? As Diane MacEachern argues in *Big Green Purse*, the best way to fight the industries that pollute the planet, thereby changing the marketplace forever, is to mobilize the most powerful consumer force in the world-women. MacEachern's message is simple but revolutionary. If women harness the power of their purse and intentionally shift their spending money to commodities that have the greatest environmental benefit, they can create a cleaner, greener world. Spirited and informative, this book: - targets twenty commodities-cars, cosmetics, coffee, food, paper products, appliances, cleansers, and more-where women's dollars can make a dramatic difference; - provides easy-to-follow guidelines and lists so women can choose the greenest option regardless of what they're buying, along with recommended companies they should support; - encourages women to spend wisely by explaining what's worth the premium price some green products cost, what's not, and when they shouldn't spend money at all; and - differentiates between products that are actually green and those that are simply marketed as ecofriendly. Whether readers want to start with small changes or are ready to devote the majority of their budget to green products, MacEachern offers concrete and immediate ways that women can take action and make a difference. Empowering and enlightening, *Big Green Purse* will become the green shopping bible for women everywhere who are asking, What can I do?
