Soft Computing in Information Retrieval Fabio Crestani,Gabriella Pasi,2013-03-19 Information retrieval (IR) aims at defining systems able to provide a fast and effective content-based access to a large amount of stored information. The aim of an IR system is to estimate the relevance of documents to users' information needs, expressed by means of a query. This is a very difficult and complex task, since it is pervaded with imprecision and uncertainty. Most of the existing IR systems offer a very simple model of IR, which privileges efficiency at the expense of effectiveness. A promising direction to increase the

effectiveness of IR is to model the concept of partially intrinsic in the IR process and to make the systems adaptive, i.e. able to learn the user's concept of relevance. To this aim, the application of soft computing techniques can be of help to obtain greater flexibility in IR systems.

American Soccer Gregory G. Reck,Bruce Allen Dick,2015-01-26 This narrative of U.S. soccer's history and present-day status addresses the issues of socioeconomics. Emphasizing the differences between social classes in U.S. soccer past and present, as well as those between American soccer and international football, this work analyzes the role of class in American soccer's failure to carve out a more prominent place in the sports landscape. Contemporary soccer is explored from its beginnings in informal Parks and Recreation leagues to the development of formal club programs, and university, professional, and U.S. national teams. In recent decades, Hispanic leagues formed primarily by Mexican and Central American immigrants have reinforced the theme of a class-based, exclusionary space in U.S. soccer. A personal perspective based on the authors' experience coaching soccer at the informal level broadens the book's appeal.

Ethnic Media in the Digital Age Sherry S. Yu,Matthew D. Matsaganis,2018-12-07 Ethnic media are media produced for, and frequently by, immigrants, ethnic and linguistic minority groups, and indigenous populations. These media represent a sector of the broader media industry that has seen considerable growth globally, even while many mainstream, legacy media have struggled to survive or have ceased to exist, largely due to the emergence of new communication technologies. What is missing in the literature is a careful examination of ethnic media in the digital age. The original research, including case studies, in this book provides insight into (1) what new trends are emerging in ethnic media production and consumption; (2) how ethnic media are adapting to changing technologies in the media landscape of our times; and (3) what enduring roles ethnic media perform in local communities and in an increasingly globalized world. The ethnic media that contributors discuss in this book are produced for and distributed across a variety of platforms, ranging from broadcasting

and print to online platforms. Additionally, these media serve numerous immigrant, ethnic, and indigenous communities who live in and trace their origins back to a variety of regions of the world, including Africa, Asia, Europe, North America, and Oceania.

Building a Nation's Image on the World Wide Web Thomas Kenneth Gaither,2007 This is a rich theoretical and empirical study concerning international public relations on the web for head of state English web sites for developing countries. There is no other research in this area that comes close to the depth with which this topic is addressed in this study. In this regard, its contribution is very significant. Highly original, this study breaks new ground and may very well contribute to a new field in international public relations on the internet. This book is highly recommended for public relations, communications, and international relations scholars ... [it] not only provides scholars with new areas of theoretical development to explore, it also provides practitioners with a blueprint for future practice. - Dr. Patricia A. Curtin, Professor, Endowed Chair of Public Relations, School of Journalism and Communication, The University of Oregon

Screening Vienna: The City of Dreams in English-Language Cinema and Television Timothy K. Conley,2016-01-04 Vienna has been the locale for nearly one hundred and fifty films and television productions in English, from 1920s through

the first years of this century, with imaginative representations of Freud, Strauss, Franz Josef, Mozart, Beethoven, and Klimt; mad scientists, assassins, spies, refugees, romantics, and American professors; historical dramas, cartoons, documentaries, and Hitchcock's only musical comedy. The City of Dreams has appeared as an imperial court, a center of scientific and medical research, a Jewish and Catholic homeland, a locus of international espionage and domestic crime, the destination for innocents abroad, the birthplace of the waltz, a stage for performances and performers, and the site for romantic rendezvous. For many in English-language audiences, such productions have constituted the most significant representations of Vienna, a city that historically has been the capital of one of Europe's largest empires, one of the most important centers for classical music and opera, both a victim and an accomplice of Nazi Germany, and the home of international diplomacy. Cultural historians and Austrian writers have provided significant commentary on the city, but their influence has seldom reached such an extensive audience as the films and television productions screening Vienna for English-language audiences. Screening Vienna thus analyzes the representation of Vienna and the Viennese in English-language film and television, reviews the critical reception of these productions, and measures the representations against the cultural and historical contexts and the writings of contemporary Austrian writers.The book is unique in its scope (over one hundred and fifty productions from the 1920s to 2013) and in its inclusion of leading reviews of many films, references to cultural and historical studies of Vienna, and references to modern and contemporary Austrian fiction.Thus the analysis is more extensive in its coverage and more intensive in its analysis of each film than any previous study, with a focus on scene, language, plot, characterization, and the reception of these films. Scholars and students in American cultural studies, film studies, Austrian and Viennese history, and popular culture will find the book informative and essential for studies of Vienna in the American and British imagination. Given the extensive coverage and filmography, many libraries should also view the book as a reference work, in addition to its status in cultural and film studies. The book will also be useful for film studies and American popular culture studies courses at advanced or graduate level.

Anaphora Resolution and Text Retrieval Helene Schmolz,2015-03-30 This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise. Open Access: In July 2019, this volume was retroactively

turned into an Open Access publication thanks to the support of the Fachinformationsdienst Linguistik. https://www.linguistik.de/

DECISION SUPPORT SYSTEMS: THE INTERNATIONAL JOURNAL ,1998

Action Theory and Communication Research Karsten Renckstorf,Denis McQuail,Judith E. Rosenbaum,Gabi Schaap,2008-08-22 The action theoretical approach has already proved its value as a framework for communication research, most especially in the study of media audiences and media use. It has deep roots in Weberian sociology, symbolic interactionism and phenomenology and it has been a robust survivor of the various storms that have beset the practice of the

social sciences since the collapse of structuralist and social system paradigms. The social action approach privileges the perspective of the acting individual but offers guidelines for connecting the subjective orientation with networks of social interaction and for treating 'behaviour' as a social process. Research within this framework takes account of the wider social context and calls for a careful combination of empirical observation and interpretation, with a corresponding diversity of methodologies. The appeal of the approach stems also from its flexibility, wide range of applications and sensitivity to cultural and social meanings. The contributions assembled in this book, despite their diversity, can all be placed within the framework of social action theory. Some are reports of empirical inquiries, others reflections on theory but each one sheds some light on the significance of media use in everyday experience and contributes to an understanding of communication in society.
