*The City of Ebla* Erica Scarpa, 2017 The ancient city of Ebla (modern Tell Mardikh) is rightfully considered one of the most important urban centers in upper Syro-Mesopotamia during the III and the first half of the II millennium BCE: best known for the discovery of the Royal Archives, its archaeological and epigraphic evidence provides information on cultural, historical, economic, and political aspects of early Syrian history. This book aims to provide an updated, comprehensive bibliography of books, articles, and digital resources concerning Ebla: it includes references to philological, archaeological, and historical studies published to date.

**Handbook of Self-Regulation of Learning and Performance** Dale H. Schunk, Barry Zimmerman, 2011-05-15 Self-regulated learning (or self-regulation) refers to the process whereby learners personally activate and sustain cognitions, affects, and behaviours that are systematically oriented toward the attainment of learning goals. This is the first volume to integrate into a single volume all aspects of the field of self-regulation of learning and performance: basic domains,

applications to content areas, instructional issues, methodological issues, and individual differences. It draws on research from such diverse areas as cognitive, educational, clinical, social, and organizational psychology. Distinguishing features include: Chapter Structure - To ensure uniformity and coherence across chapters, each chapter author addresses the theoretical ideas underlying their topic, research evidence bearing on these ideas, future research directions, and implications for educational practice. International - Because research on self-regulation is increasingly global, a significant number of international contributors are included (see table of contents). Readable - In order to make the book accessible to students, chapters have been carefully edited for clarity, conciseness, and organizational consistency. Expertise - All chapters are written by leading researchers from around the world who are highly regarded experts on their particular topics and are active contributors to the field.

*Sargonic Akkadian* Rebecca Hasselbach, 2005 Since the second edition of I.J. Gelb's *Old Akkadian Writing and Grammar* in 1961, which is still the standard grammar of Old Akkadian to this day, a significant number of new texts from the Old Akkadian period has been discovered and important improvements have been made regarding the analysis of Old Akkadian and Early Semitic grammar - particularly phonology - and writing. The present volume seeks to update our understanding of the syllabically written textual material from the Sargonic period (2350-2100 BCE), which contains most of our evidence for the Akkadian used at this period. It consists of a detailed investigation of the Sargonic Akkadian syllabary, phonology and morphology, with specific focus on geographical and dialectal variations that are noticeable in this text corpus, but which have not yet been examined thoroughly. The grammatical investigation further compares specific linguistic features of this period with the two later Akkadian dialects, Babylonian and Assyrian, in order to establish the position of the individual sub-groups of Sargonic Akkadian within the dialect geography of Akkadian.

**Self-regulation of Learning and Performance** Dale H. Schunk, Barry J. Zimmerman, 2009 In recent years, educators have become increasingly concerned with students' attempts to manage their own learning and achievement efforts through activities that influence the instigation, direction and persistence of those efforts. In 1989, Zimmerman and Schunk edited the first book devoted to this topic. They assembled key theorists offering a range of perspectives on how students self-regulate their academic functioning. One purpose of that volume was to provide theoretical direction to ongoing as well as nascent efforts to explore academic self-regulatory processes. Since that date, there has been an exponential surge in research. This second volume on academic self-regulation offers the fruits of the first generation of research. It also addresses a number of key issues that have arisen since then such as how self-regulation differs from such related constructs

as motivation and metacognition, and whether students can be taught self-regulatory skills. The contributors reveal an interesting, uplifting, and at times, disturbing picture of how students grapple with the day-to-day problems of achieving in circumstances with inherent limitations and obstacles. This volume provides insight into the source of students' capabilities to surmount adversities -- the origins of their self-initiated processes designed to improve learning, motivation, and achievement. The text is organized on the basis of a conceptual framework that analyzes academic self-regulation into four major dimensions. That model is presented in the first chapter, and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow. Because each chapter is written to follow a common format, this work provides a level of continuity and parsimony normally found only in authored textbooks.

Ebla and its Landscape Paolo Matthiae, Nicoló Marchetti, 2016-06-16 The discovery of 17,000 tablets at the mid-third millennium BC site of Ebla in Syria has revolutionized the study of the ancient Near East. This is the first major English-language volume describing the multidisciplinary archaeological research at Ebla. Using an innovative regional landscape approach, the 29 contributions to this expansive volume examine Ebla in its regional context through lenses of archaeological, textual, archaeobiological, archaeometric, geomorphological, and remote sensing analysis. In doing so, they are able to provide us with a detailed picture of the constituent elements and trajectories of early state development at Ebla, essential to those studying the ancient Near East and to other archaeologists, historians, anthropologists, and linguists. This work was made possible by an IDEAS grant from the European Research Council.

*Self-Regulated Learning and Academic Achievement* Barry J. Zimmerman, Dale H. Schunk, 2013-05-13 This volume brings together internationally known researchers representing different theoretical perspectives on students' self-regulation of learning. Diverse theories on how students become self-regulated learners are compared in terms of their conceptual origins, scientific form, research productivity, and pedagogical effectiveness. This is the only comprehensive comparison of diverse classical theories of self-regulated learning in print. The first edition of this text, published in 1989, presented descriptions of such differing perspectives as operant, phenomenological, social learning, volitional, Vygotskian, and constructivist theories. In this new edition, the same prominent editors and authors reassess these classic models in light of a decade of very productive research. In addition, an information processing perspective is included, reflecting its growing prominence. Self-regulation models have proven especially appealing to teachers, coaches, and tutors looking for specific recommendations regarding how students activate, alter, and sustain their learning practices. Techniques for enhancing these processes have been studied with considerable success in tutoring sessions, computer learning programs, coaching sessions, and self-directed practice sessions. The results of these applications are discussed in this new edition. The introductory chapter presents a historical overview of research and a theoretical framework for comparing and contrasting the theories described in the following chapters, all of which follow a common organizational format. This parallel format enables the book to

function like an authored textbook rather than a typical edited volume. The final chapter offers an historical assessment of changes in theory and trends for future research. This volume is especially relevant for students and professionals in educational psychology, school psychology, guidance and counseling, developmental psychology, child and family development, as well as for students in general teacher education.

**Semitic and Assyriological Studies** Pelio Fronzaroli, 2003 This substantial volume comprises almost fifty Semitic and Assyriological studies dedicated to Pelio Fronzaroli, professor of Semitic philology at the University of Florence, written by colleagues and pupils.

*Motivation and Self-Regulated Learning* Dale H. Schunk, Barry J. Zimmerman, 2012-08-06 This volume focuses on the role of motivational processes – such as goals, attributions, self-efficacy, outcome expectations, self-concept, self-esteem, social comparisons, emotions, values, and self-evaluations– in self-regulated learning. It provides theoretical and empirical evidence demonstrating the role of motivation in self-regulated learning, and discusses detailed applications of the principles of motivation and self-regulation in educational contexts. Each chapter includes a description of the motivational variables, the theoretical rationale for their importance, research evidence to support their role in self-regulation, suggestions for ways to incorporate motivational variables into learning contexts to foster self-regulatory skill development, and achievement outcomes.

**Psychology of Self-Regulation** Joseph P. Forgas, Roy F. Baumeister, Dianne M. Tice, 2011-02-25 The ability to regulate and control our behaviors is a key accomplishment of the human species, yet the psychological mechanisms involved in self-regulation remain incompletely understood. This book presents contributions from leading international researchers who survey the most recent developments in this fascinating area. The chapters shed new light on the subtle and often subconscious ways that the people seek to regulate their thoughts, feelings and behaviors in everyday social life. The contributions seek answers to such intriguing questions as: How can we improve our ability to control our actions? How do people make decisions about which goals to pursue? How do we maintain and manage goal-oriented behavior? What happens when we run out of self-regulation resources? Can we match people and the regulatory demands of to specific tasks so as to optimize performance? What role does self-regulation play in sports performance, in maintaining successful relationships, and in managing work situations? The book offers a highly integrated and representative coverage of this important field, and is suitable as a core textbook in advanced courses dealing with social behavior and the applications of psychology to real-life problems.

Studia Eblaitica 2 Paolo Matthiae, 2016-11-10 The aim of this new international journal is to contribute to developing the

study of the interpretation and understanding of the ancient cultures of Syria, remaining as open as possible to the different methodologies and problems that characterize present-day research. Thanks to the generous policy of international collaboration pursued by the cultural authorities of the Syrian Arab Republic, the increase in archaeological research in Syria, particularly from the 1970s on, opened up a series of new perspectives on the study of ancient Syria. The discovery of the Royal Archives of Ebla was decisive in this renaissance, as well as the role that Ebla played in establishing the very foundations of cultural development in ancient Syria. This project originates at a time of serious crisis for Syria, whose plight does not even spare the countrys magnificent, thousand-year-old cultural heritage. It is also intended as the strongest of hopes for a not-too-distant future of peace, prosperity, harmony and justice for the whole of the Syrian people.
