**Reza Shadmehr, Alaa A. Ahmed**

**PROMOTING WELLNESS for prostate cancer patients** Mark A. Moyad, 2012-11-27 Promoting Wellness for Prostate Cancer Patients is a unique educational book for individuals dealing with the many aspects of prostate cancer—from prevention to treatment and managing the common (and not so common) side effects of conventional therapy. In this fully updated and redesigned Fourth Edition, Dr. Moyad covers the latest advancements in prostate cancer treatment while providing his trademark no-nonsense analysis on groundbreaking research that is currently underway. A new series of “Quick Tips” run throughout the book, where Dr. Moyad shares his secrets to improving overall health and vitality. Discover small diet and lifestyle changes that can produce big results. This title is also available in a Spanish edition, Mayor bienestar para los pacientes con cancer prostatico.

The Diabetes Cooking Book Fiona Hunter, Heather Whinney, 2010-08-02 Learn how to manage your diet with the Diabetes Cookbook, in e-book format Managing your diet is the key to good diabetes control. With recipes for lunch, dinner and healthy snacks, The Diabetes Cookbook is guaranteed to tempt your taste buds and contribute to the health and well-being of everyone with diabetes. Featuring over 250 delicious recipes, from tempting curries to delicious puddings, each one suitable to help manage type 2 diabetes. Each recipe has a simple points system that allows users to track their glucose, saturated fat and cholesterol intake to balance their diet - the key to staying healthy.

**Global Health and the Future Role of the United States** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Global Health, Committee on Global Health and the Future of the United States, 2017-09-05 While much progress has been made on achieving the Millennium Development Goals over the last decade, the number and complexity of global health challenges has persisted. Growing forces for globalization have increased the interconnectedness of the world and our interdependency on other countries, economies, and cultures. Monumental growth in international travel and trade have brought improved access to goods and services for many, but also carry ongoing and ever-present threats of zoonotic spillover and infectious disease outbreaks that threaten all. Global Health and the Future Role of the United States identifies global health priorities in light of current and emerging world threats. This report assesses the current global health landscape and how challenges, actions, and players have evolved over the last decade across a wide range of issues, and provides recommendations on how to increase responsiveness, coordination, and

efficiency – both within the U.S. government and across the global health field.

**Single Cell Protein** Israel Goldberg, 2013-03-13 In early 1973, I returned to Israel from a post-doctoral fellowship at Harvard University, and was accepted as a lecturer in the Department of Applied Microbiology at the Hebrew University of Jerusalem. Shortly after my return, Professor Richard Mateles, who at that time was head of the Department, suggested that I purchase a good and comprehensive book on single cell protein (SCP) in order to expand my general knowledge in the subject I had started then to work on; that was microbial utilization of one-carbon (C<sub>1</sub>) compounds. Naturally, I took his advice (after all, he was the Boss) and bought the book, which was the only general book published on this subject at that time, and was based on papers presented at the First International Conference on Single Cell Protein, held at the Massachusetts Institute of Technology (M.I.T.), on October 1967 (Mateles and Tannenbaum, editors) [1]. Through this book I became acquainted with the world's hunger problem that existed in the past, and ways in which it was to be solved by SCP products prepared from CO<sub>2</sub>, fossil-based raw materials, and from wastes.

**Presenteeism** H. Quazi, 2013-11-21 Presenteeism presents the important issues related to the nature and extent of presenteeism and cited examples from different studies. The book discusses in depth why employees come to work despite being sick, strategies to manage presenteeism behavior and who should be taking the lead in managing such employee behavior.

**The Silicon Web** Michael G. Raymer, 2022-06 From computers to optical communication, this text explores core principles underlying those technologies that continue to revolutionize our lives. Designed for nonscientists, this book requires no higher math or prior physics. It details basic physics principles at the core of information technology; examines the quantum era, discussing digital

**Social Determinants of Health in Non-communicable Diseases** Katsunori Kondo, 2021-11-04 This book is open access under a CC BY-NC-ND 4.0 license. This open access book is the first compilation that reviews a wide range of social determinants of health (SDHs) for non-communicable diseases (NCDs) and healthy ageing in Japan. With the highest life expectancy and the largest elderly population in the world, Japan has witnessed health inequality by region and social class becoming more prevalent since the 2000s. The first half of this volume describes in detail major NCDs, such as cancers, heart and kidney diseases, diabetes, stroke, and metabolic syndrome. The second half, on the other hand, explores various SDHs relating to healthy ageing. All chapters review and focus on SDHs, particularly health inequality associated with socio-economic status and social capital, which are widely addressed in the field of social epidemiology. The book makes the argument that “Health for All” advocated by the WHO should be implemented based on social justice and benefits for the greater society. Public health researchers and policymakers, both in Japan and other nations, will gain scientific evidence from this book to prepare for the coming era as ageing becomes a global issue.

Intelligent Data Engineering and Automated Learning - IDEAL 2020 Cesar Analide, Paulo Novais, David Camacho, Hujun Yin, 2020-10-29 This two-volume set of LNCS 12489 and 12490 constitutes the thoroughly refereed conference proceedings of the 21th International Conference on Intelligent Data Engineering and Automated Learning, IDEAL 2020, held in Guimaraes, Portugal, in November 2020.\* The 93 papers presented were carefully reviewed and selected from 134 submissions. These papers provided a timely sample of the latest advances in data engineering and machine learning, from methodologies, frameworks, and algorithms to applications. The core themes of IDEAL 2020 include big data challenges, machine learning, data mining, information retrieval and management, bio-/neuro-informatics, bio-inspired models, agents and hybrid intelligent systems, real-world applications of intelligent techniques and AI. \* The conference was held virtually due to the COVID-19 pandemic.

*Sustainable Bioeconomy* V. Venkatramanan, Shachi Shah, Ram Prasad, 2020-11-06 Sustainable development is the most important challenge facing humanity in the 21st century. The global economic growth in the recent past has indeed exhibited marked progress in many countries. Nevertheless, the issues of income disparity, poverty, gender gaps, and malnutrition are not uncommon in the global landscape, in spite of the upward growth of the economy and technological advances. This grim picture is further exacerbated by our growing human population, unmindful resource use, ever-increasing consumption trends, and changing climate. In order to protect humanity and preserve the planet, the United Nations issued the “2030 agenda for sustainable development,” which includes but is not limited to sustainable production and consumption practices, e.g. in a sustainable bioeconomy. The hallmark of the sustainable bioeconomy is a paradigm shift from a fossil-fuel-based economy to a biological-based one, which is driven by the virtues of sustainability, efficient utilization of resources, and “circular economy.” As the sustainable bioeconomy is based on the efficient utilization of biological resources and societal transformations, it holds the immense potential to achieve the UN’s Sustainable Development Goals. This book shares valuable insights into the linkages between the sustainable bioeconomy and Sustainable Development Goals, making it an essential read for policymakers, researchers and students of environmental studies.

**The Wahls Protocol** Terry Wahls M.D., 2014-12-30 Fully expanded with new information and updated research, a clear prescriptive guide about how to beat autoimmune conditions using functional medicine and nutrient-rich foods, from a doctor, researcher, and sufferer of progressive multiple sclerosis. The Wahls Protocol has become a sensation, transforming the lives of people with autoimmune diseases. Now in this fully revised edition, Dr. Terry Wahls outlines the latest research that validates the program and offers new, powerful tools to arm readers and help them achieve total health. The Wahls Protocol comes out of Dr. Wahls' own quest to treat the debilitating symptoms she experiences as a sufferer of progressive MS. Informed by science, she began using Paleo principles as guidelines for her unique, nutrient-rich plan. This book shares Dr. Wahls' astonishing personal story of recovery and details the program, with up-to-date research she's now conducting at

the University of Iowa. Split into three different levels, this updated edition allows readers to choose the modified Wahls Diet if they're new to the regime, the Wahls Paleo Diet if they're ready to amp up their health, or the more advanced Wahls Paleo Plus Diet if they need more aggressive treatment. They can also incorporate the just-added Wahls Elimination Diet into their plan to pinpoint individual food sensitivities, so their diet is as personal as ever. With new recipes and content on intermittent fasting and how the protocol impacts the microbiome, The Wahls Protocol is a key addition to the whole food revolution, and a deeply moving, results-driven testimonial to the healing power of food.

**Technology and Global Change** Arnulf Grübler,2003-10-16 This is the first book to comprehensibly describe how technology has shaped society and the environment over the last 200 years. It will be useful for researchers, as a textbook for graduate students, for people engaged in long-term policy planning in industry and government, for environmental activists, and for the wider public interested in history, technology, or environmental issues.

**Breeding Oilseed Brassicas** Kuldeep S. Labana,Surinder S. Banga,Shashi K. Banga,2013-11-09 The present status of rapeseed-mustard crops as the third most important source of edible oils is attributable to the success of plant breeders and associate researchers in developing high yielding varieties with improved quality and resistance to biotic and abiotic stresses. However, the need to maximize the production gains and quality at lower economic costs is greater than ever before. Breeding Oilseed Brassicas was thus conceived to review the past accomplishments in order to identify research gaps and suggest ways and means to meet the challenge of sustainable productivity upgradation. Theoretical and applied aspects of breeding, genetics, cytogenetics, crop physiology, and biotechnology are covered. The emphasis is on the application of theoretical knowledge to the solution of problems that confront the Brassica breeders.

**Vigor** Reza Shadmehr,Alaa A. Ahmed,2025-02-18 An examination of the link between the vigor with which we move and the value that the brain assigns to the goal of the movement. Why do we reflexively run toward people we love, but only walk toward others? In Vigor, Reza Shadmehr and Alaa Ahmed examine the link between how the brain assigns value to things and how it controls our movements. They find that brain regions thought to be principally involved in decision making also affect movement vigor—and that brain regions thought to be principally responsible for movement also bias patterns of decision making. Shadmehr and Ahmed first consider the relationship of value and vigor from a behavioral and mathematical perspective, considering a series of fascinating observations—including, for example, data showing that people in certain cities tend to walk faster than those living elsewhere—through the lens of optimal foraging theory. They then go on to explore the neural basis of vigor and valuation, synthesizing results from experiments that have measured activity in various brain structures and neuromodulators, including dopamine and serotonin. They speculate that in the future, technologies may be able to predict our personal preferences by measuring our movements; through the vigor with which we move, we unwittingly reveal one of our well-guarded secrets: how much we value the object of our attention.

**Rice Bran and Rice Bran Oil** Ling-Zhi Cheong,Xuebing Xu,2019-01-14 Rice Bran and Rice Bran Oil (RBO) provides much-needed best practices on the science and technology of RBO, including the chemistry, detection methods, nutrition (including the effect of processing technologies on micronutrients) and applications. RBO contains many nutritional components, including up to 2% oryzanol, tocotrienol, and phytosterols. In addition, the fatty acid composition is well balanced with mainly oleic acid and very little linolenic acid, which allows for versatile uses in frying, cooking, and in formulating oil blends for food uses, especially as a trans-free alternative. Many food industrial sectors are seeking possibilities to use RBO in their products from not only Asia and South America, but also Europe and North America. However, there are many processing, analytical, and nutritional considerations that must be documented in one resource. This volume is perfect for those interested in understanding the many emerging potential uses for this alternative oil. Written by a team of experts from academia and industry, this book is the first of its kind. In addition, it provides an overview of related rice bran products and their development, including: • Rice bran protein • Rice dietary fiber • Dietary rice bran/meal • Rice husk/ash applications • Paddy straw applications • Valued added products, including rice bran wax - Delivers practical application guidance in the selection and storage of raw materials, ensuring processing conditions address stability concerns during production - Presents simple and reliable detection methods, as well as the international and national rice bran oil standards - Provides core scientific insights into this trans-free oil option

**Prevention and Treatment of Atherosclerosis** Arnold von Eckardstein,Christoph J. Binder,2022-01-31 This open access book is supported by the European Atherosclerosis Society Association (EAS). This follow-up edition of the well-received Handbook volume 'Atherosclerosis: Diet and Drugs' reflects the state-of-the-art and most recent developments in atherosclerosis research. Outstanding international experts give a comprehensive overview of the field covering topics, such as improving the treatment focusing on established targets, novel drug developments addressing pre-defined targets, hypothesis-based and hypothesis-free approaches to unravel novel targets.

**Principles of Metal Manufacturing Processes** J. Beddoes,M. Bibby,1999-05-28 Metals are still the most widely used structural materials in the manufacture of products and structures. Their properties are extremely dependent on the processes they undergo to form the final product. Successful manufacturing therefore depends on a detailed knowledge of the processing of the materials involved. This highly illustrated book provides that knowledge.Metal processing is a technical subject requiring a quantitative approach. This book illustrates this approach with real case studies derived from industry. - Real industrial case studies - Quantitative approach - Challenging student problems

Prevention and Treatment of Complications in Proctological Surgery Mario Pescatori,2012-09-22 The volume is authored by a colorectal surgeon with long-standing clinical and scientific experience and is devoted to the management of complications following surgery of the anorectum and the pelvic floor. It is aimed not only at general surgeons, perineologists

and, of course, proctologists, but also at gastroenterologists, endoscopists, radiologists and physiotherapists, i.e. those who may be involved in both diagnosis and cure whenever an adverse event, either unpredictable or potentially preventable, causes an intra- or postoperative, early or late, mild or life-threatening complication. Severe bleeding, dehiscence, perforation, anorectal stricture, fecal incontinence, and even caval vein thrombosis, fatal Fournier gangrene and pneumomediastinum may occur after anal surgery. The incidence, pathogenesis prevention and treatment of such events are discussed in detail in 10 chapters with 30 tables, 200 illustrations and more than 1000 references. Both conventional procedures and recent innovations are reported. “Unforgettable clinical cases (complications with litigation)” and “Tips and Tricks” are sections increasing the appeal of this book. The approach is “evidence-based” and holistic, focusing on anorectal problems while taking into consideration whole body-mental unity—showing, for example, that a non-healing perineal wound may be due to hypo-pituitarism, and failure after a re-intervention may be related to psychological distress.
