Dr. Rachel Levitch

Health Measurement Scales David L. Streiner, Geoffrey R. Norman, John Cairney, 2014-11-06 Clinicians and those in health sciences are frequently called upon to measure subjective states such as attitudes, feelings, quality of life, educational achievement and aptitude, and learning style in their patients. This fifth edition of Health Measurement Scales enables these groups to both develop scales to measure non-tangible health outcomes, and better evaluate and differentiate between existing tools. Health Measurement Scales is the ultimate guide to developing and validating measurement scales that are to be used in the health sciences. The book covers how the individual items are developed; various biases that can affect responses (e.g. social desirability, yea-saying, framing); various response options; how to select the best items in the set; how to combine them into a scale; and finally how to determine the reliability and validity of the scale. It concludes with a discussion of ethical issues that may be encountered, and guidelines for reporting the results of the scale development process. Appendices include a comprehensive guide to finding existing scales, and a brief introduction to exploratory and confirmatory factor analysis, making this book a must-read for any practitioner dealing with this kind of data.

Psychocardiology: Exploring the Brain-Heart Interface Kai G. Kahl, Marlies Elizabeth Alvarenga, Don Byrne, 2022-09-23

Fundamental of Research Methodology and Statistics Yogesh Kumar Singh, 2006-12 The book approaches research from a perspective different from that taken in other educational research textbooks. The goal is to show educators that the application of research principles can make them more effective in their job of promoting learning. The basic point is that we do not have to stop teaching to do research; research is something we can do while teaching and if we do good research, we will do better teaching. This book includes most of the topics treated in traditional educational research books, but in a different order and with a different emphasis. The important content consists of:

Handbook of Family Measurement Techniques: Abstracts John Touliatos, Barry F. Perlmutter, Murray A. Strauss, George W. Holden, 2000-12-27 This three-volume handbook represents a significant and indispensable reference tool for those studying the family. Vol. 1 contains full abstracts of 504 instruments plus abbreviated descriptions of another 472. Basic scale construction issues can be examined through the combined use of Vol. 2 & 3. An excellent reference tool that will fulfill researchers and clinicians need for quality instrumentation.

Shame Management Through Reintegration Eliza Ahmed, 2001-10-15 This 2001 book is a follow-on to John Braithwaite's best-selling and influential *Crime, Shame and Reintegration*. Shame management is becoming a central concept, in theoretical and practical terms. This book makes a major contribution to the advancement of shame in a theoretical sense. For criminology, as well as for psychology, sociology and other areas, this accessible book serves as an introduction to the concepts of shame, guilt and embarrassment. Presenting research by the Restorative Justice Centre at the Australian National University, the book contributes immeasurably to the development of practical alternatives to common sanctions in an effort to reduce crime and other social problems. Written by the key exponents of restorative justice, the book is an important re-statement of the theory and practice of shaming. It will develop important and often controversial debates about punishment, shaming and restorative justice to a new level.

Handbook of Research Methods in Diversity Management, Equality and Inclusion at Work Lize A.E. Booysen, Regine Bendl, Judith K. Pringle, 2018-08-31 Equality, diversity and inclusion (EDI) have become features of organizations as a result of both legal and societal advances, as well as neoliberal economic reasoning and considerations. Current research approaches frequently fall short of addressing the challenges faced in EDI research, and this benchmark Handbook brings up to date coverage of research methods in EDI, and advances the development of research in the field.

Resilience in Children, Adolescents, and Adults Sandra Prince-Embury,Donald H. Saklofske,2012-11-06 Resilience in Children, Adolescents, and Adults: Translating Research into Practice recognizes the growing need to strengthen the links between theory, assessment, interventions, and outcomes to give resilience a stronger empirical base, resulting in more effective interventions and strength-enhancing practice. This comprehensive volume clarifies core constructs of resilience and links these definitions to effective assessment. Leading researchers and clinicians examine effective scales, questionnaires, and other evaluative tools as well as instructive studies on cultural considerations in resilience, resilience in the context of disaster, and age-appropriate interventions. Key coverage addresses diverse approaches and applications in multiple areas across the lifespan. Among the subject areas covered are: - Perceived self-efficacy and its relationship to resilience. - Resilience and mental health promotion in the schools. - Resilience in childhood disorders. - Critical resources for recovering from stress. - Diversity, ecological, and lifespan issues in resilience. - Exploring resilience through the lens of core self-evaluation. Resilience in Children, Adolescents, and Adults is an important resource for researchers, clinicians and allied professionals, and graduate students in such fields as clinical child, school, and developmental psychology, child and adolescent psychiatry, education, counseling psychology, social work, and pediatrics.

Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents Amon Rapp, Maurizio Tirassa, Tom Ziemke, 2019-10-10 Cognitive sciences have been involved under numerous accounts to explain how humans interact with technology, as well as to design technological instruments tailored to human needs. As technological advancements in fields like wearable and ubiquitous computing, virtual reality, robotics and artificial intelligence are presenting novel modalities for interacting with technology, there are opportunities for deepening, exploring, and even rethinking the theoretical foundations of human technology use. This volume entitled "Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents" is a collection of articles on the impacts that novel 3 September Frontiers in Psychology 2019 | Cognition and Interaction interactive technologies are producing on individuals. It puts together 17 works, spanning from research on social cognition in human-robot interaction to studies on neural changes triggered by Internet use, that tackle relevant technological and theoretical issues in human-computer interaction, encouraging us to rethink how we conceptualize technology, its use and development. The volume addresses fundamental issues at different levels. The first part revolves around the biological impacts that technologies are producing on our bodies and brains. The second part

focuses on the psychological level, exploring how our psychological characteristics may affect the way we use, understand and perceive technology, as well as how technology is changing our cognition. The third part addresses relevant theoretical problems, presenting reflections that aim to reframe how we conceptualize ourselves, technology and interaction itself. Finally, the last part of the volume pays attention to the factors involved in the design of technological artifacts, providing suggestions on how we can develop novel technologies closer to human needs. Overall, it appears that human-computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape.
