Farrachuchos José Luis Gómez Ledesma,2022-06-27 Aquellos cielos azules y este sol de la niñez. Mi infancia son recuerdos de Cunchillos. Agua fresca de manantial. Huertos rodeados de bardal donde canta la moroneta y el ruiseñor. Picarazas, con sus nidos de palitroques en lo alto del chopo. Tres viejos olmos, en ellos anidan las cardelinas y duermen los gorriones. A lo lejos, los secanos montes de aliagas, cardos, ontinas y tomillo. En áridos rastrojos corretean la codorniz y la calandria.

A User's Guide to the Brain John J. Ratey, M.D.,2001-11-13 John Ratey, bestselling author and clinical professor of psychiatry at Harvard Medical School, lucidly explains the human brain's workings, and paves the way for a better

understanding of how the brain affects who we are. Ratey provides insight into the basic structure and chemistry of the brain, and demonstrates how its systems shape our perceptions, emotions, and behavior. By giving us a greater understanding of how the brain responds to the guidance of its user, he provides us with knowledge that can enable us to improve our lives. In *A User's Guide to the Brain*, Ratey clearly and succinctly surveys what scientists now know about the brain and how we use it. He looks at the brain as a malleable organ capable of improvement and change, like any muscle, and examines the way specific motor functions might be applied to overcome neural disorders ranging from everyday shyness to autism. Drawing on examples from his practice and from everyday life, Ratey illustrates that the most important lesson we can learn about our brains is how to use them to their maximum potential.

EN-RED-@DA Inmaculada Gómez, 2018-08-31 En su mente no hay descanso. María, una dependienta de 40 años que ansía encontrar el amor, convierte al teléfono móvil en su mejor aliado. Poco a poco, sin apenas darse cuenta, va sumergiéndose en diferentes redes que la atrapan sin remedio hasta convertirla en una absoluta dependiente de la aprobación masculina. Su necesidad de aceptación, el miedo a la soledad, la intensidad de sus emociones, su endeble autoestima y una mente obsesiva la obligarán a transitar por senderos mentales tortuosos que terminarán por poner en peligro su vida. EN-RED-@DA es el primer libro de una trilogía que te atrapará.

Countering Design Exclusion Simeon L. Keates, John Clarkson, 2003-09-01 Inclusive design, universal design and universal access are long standing, familiar terms with clear and laudable goals. However, their teaching and industrial uptake has been very limited. Many products still exclude users unnecessarily for reasons ranging from corporate insensitivity and the size of the market for inclusive products to the individual designer's inability to design them. This pragmatic approach to making inclusive design desirable to industry addresses these issues and discusses why existing methods have failed to be assimilated into industry. Through the use of case studies and examples, *Countering Design Exclusion* introduces the mind-set necessary to think through the challenges raised by inclusive design and to adapt their solutions to the needs of particular companies. The practical outlook will appeal to anyone who wishes to take account of the largest possible part of the population in their designs.

Siento la furia de bostezar Iván Cherem, 2024-11-07 «Pero me arriesgo a caer en el error de declarar que yo soy todo aquello de lo que no me arrepiento.» Iván vive habitado por la furia. No se trata de simples momentos de enojo, más o menos transitables, sino de un sentimiento turbio y feroz, que proviene de su incapacidad para aceptar el sinsentido de la vida. Y, también, del tumor canceroso que le aplasta la amígdala. Un mal día, exasperado por el ruido de la aspiradora que ruge en el departamento arriba del suyo, comete un acto terrible: mecánicamente busca un bote de tiner y lo vacía frente a la puerta de su vecina para después prenderle fuego. La vecina muere en el incendio que ocasiona, pero Iván logra escapar a Israel,

gracias a la ayuda de su adinerada familia y del Comité Central. El escondite, sin embargo, le dura poco, pues el video de seguridad que lo inculpa se difunde en Facebook, causando una voraz ola de indignación. Siento la furia bostezar es una novela que reflexiona con descarnada lucidez en torno a los salvajes privilegios de las clases altas, a la malvada banalidad de las redes sociales, a veces disfrazada de justicia social, y a las posibilidades de nuestro libre albedrío. Con estos elementos, Iván Cherem hubiera podido escribir una fábula, un complaciente relato de redención moral, y en cambio hizo algo más arduo y riesgoso: una ficción con la que escarba en sí mismo.

Mathematical Statistics with Applications in R Kandethody M. Ramachandran, Chris P. Tsokos, 2018-11-13 *Mathematical Statistics with Applications in R, Second Edition*, offers a modern calculus-based theoretical introduction to mathematical statistics and applications. The book covers many modern statistical computational and simulation concepts that are not covered in other texts, such as the Jackknife, bootstrap methods, the EM algorithms, and Markov chain Monte Carlo (MCMC) methods such as the Metropolis algorithm, Metropolis-Hastings algorithm and the Gibbs sampler. By combining the discussion on the theory of statistics with a wealth of real-world applications, the book helps students to approach statistical problem solving in a logical manner. This book provides a step-by-step procedure to solve real problems, making the topic more accessible. It includes goodness of fit methods to identify the probability distribution that characterizes the probabilistic behavior or a given set of data. Exercises as well as practical, real-world chapter projects are included, and each chapter has an optional section on using Minitab, SPSS and SAS commands. The text also boasts a wide array of coverage of ANOVA, nonparametric, MCMC, Bayesian and empirical methods; solutions to selected problems; data sets; and an image bank for students. Advanced undergraduate and graduate students taking a one or two semester mathematical statistics course will find this book extremely useful in their studies. Step-by-step procedure to solve real problems, making the topic more accessible Exercises blend theory and modern applications Practical, real-world chapter projects Provides an optional section in each chapter on using Minitab, SPSS and SAS commands Wide array of coverage of ANOVA, Nonparametric, MCMC, Bayesian and empirical methods
