Preventing Chronic Diseases World Health Organization, 2005-09-28 The major causes of premature adult deaths in all regions of the world, due to chronic diseases such as heart disease, strokes, diabetes and cancer, have been generally neglected on the international health and development agenda. Four out of every five chronic disease-related deaths in the world occur in low and middle income countries, where people tend to develop these diseases at a younger age and to die sooner. The death toll is projected to rise by a further 17 per cent in the next 10 years, whilst child obesity rates are

increasing worldwide. This report examines the actual scale and severity of the problem using the most recent data available, considers the major risk factors and associated trends, and discusses the public health policy actions required to implement effective integrated chronic disease prevention and control measures.

Philosophical Foundations of Labour Law Hugh Collins, Gillian Lester, Virginia Mantouvalou, 2018-12-06 This collection of essays presents an interdisciplinary investigation by lawyers and philosophers into the philosophical ideas, concepts, and principles that provide the foundation for the field of labour law and employment law. The book addresses the doubts that have been expressed about whether a body of labour law that protects workers is needed at all, what should be regarded as the proper scope of the field in the light of developments such as the integration of work and home life by means of technology, the globalization of the economy, and the precarious kinds of work that thrive in the gig economy. Paying particular attention to political philosophy and theories of justice, the contributions focus on four themes: I. freedom, dignity, and human rights; II. distributive justice and exploitation; III. workplace democracy and self-determination; and IV. social inclusion.

Reading Capital Louis Althusser, Etienne Balibar, 2009-06-09 Establishing a rigorous program of "symptomatic reading" that cuts through the silences and lacunae of Capital to reveal its philosophical core, Louis Althusser interprets Marx's structural analysis of production as a revolutionary break—the basis of a completely new science. Building on a series of Althusser's conceptual innovations that includes "overdetermination" and "social formation," Étienne Balibar explores the

historical and structural facets of production as Marx understood them, scrutinizing many of the most fundamental points in Capital, as though for the first time.

Labor Justice across the Americas Leon Fink, Juan Manuel Palacio, 2017-12-21 Opinions of specialized labor courts differ, but labor justice undoubtedly represented a decisive moment in worker 's history. When and how did these courts take shape? Why did their originators consider them necessary? Leon Fink and Juan Manuel Palacio present essays that address these essential questions. Ranging from Canada and the United States to Chile and Argentina, the authors search for common factors in the appearance of labor courts while recognizing the specific character of the creative process in each nation. Their transnational and comparative approach advances a global perspective on the various mechanisms for regulating industrial relations and resolving labor conflicts. The result is the first country-by-country study of its kind, one that addresses a defining shift in law in the first half of the twentieth century. Contributors: Rossana Barragán Romano, Angela de Castro Gomes, David Díaz-Arias, Leon Fink, Frank Luce, Diego Ortúzar, Germán Palacio, Juan Manuel Palacio, William Suarez-Potts, Fernando Teixeira da Silva, Victor Uribe-Urán, Angela Vergara, and Ronny J. Viales-Hurtado.

Once Upon a Time in Rio Francisco Azevedo, 2014-06-24 From well-known Brazilian playwright Francisco Azevedo, a heartwarming debut novel about three generations of a family whose kitchen contains the secret ingredient for happiness—sure to appeal to fans of *Like Water for Chocolate*. Once upon a time there was some rice. Rice planted in the earth, fallen from the sky, and gathered up from the stone. Rice that doesn't spoil, it came from far away, by ship with three exuberant young people filled with dreams... *Once Upon a Time in Rio* is a spellbinding family saga beginning with José Custódio and Maria Romana and their search for a prosperous future. As newlyweds, José and Maria immigrated to Brazil at the beginning of the twentieth century, accompanied by a special gift. During the dinner preparations to celebrate their centenary wedding anniversary, their eldest son Antonio, already a grandfather, looks back at the lives of his parents, his aunt, his brothers, their children and grandchildren, as well as his own. Antonio knows that family is a difficult dish to get right and that happiness must be cooked up day by day; however, what separates his family from any other is its possession of a secret ingredient for happiness: the sack of magical rice given to his parents on their wedding day. With the help of the rice, whose magic is as old as fire and time, Antonio's family has been guided through the most trying of life's tribulations. Lyrically written, *Once Upon a Time in Rio* bares the fragile yet strong nature of the human spirit and with great insight captures the solace provided by loved ones in times of need. Already an international bestseller, this is a beautifully told tale about the wisdom of past generations and the inextricable ties of family.
