Fascism and Theatre Günter Berghaus, 1996 Since the 1920s, an endless flow of studies has analyzed the political systems of fascism, the seizure of power, the nature of the regimes, the atrocities committed, and, finally, the wars waged against other countries. However, much less attention has been paid to the strategies of persuasion employed by the regimes to win over the masses for their cause. Among these, fascist propaganda has traditionally been seen as the key means of influencing public opinion. Only recently has the fascination with Fascism become a topic of enquiry that has also formed the guiding interest of this volume: it offers, for the first time, a comparative analysis of the forms and functions of theater in countries governed by fascist or para-fascist regimes. By examining a wide spectrum of theatrical manifestations in a number of States with a varying degree of fascistization, these studies establish some of the similarities and differences between the theatrical cultures of several cultures in the interwar period.

Words and visions around/about Chinese transnational mobilities □□ Valentina Pedone, Miriam Castorina, 2023 This collection gathers the contributions of ten scholars on the topic of transnational cultural and physical mobility originating in China. These contributions aim to open conversations among Chinese Studies scholars by applying a Mobility Studies perspective. Exploring diverse narratives and forms of representation from people of Chinese heritage, the book is divided into three parts that each look closely at the relationship between movement and cultural production. The first part is dedicated to four types of mobility of people from China to Italy, namely tourist mobility (Miriam Castorina), labor mobility (Valentina Pedone), student mobility (Xu Hao), and mobility of social elites (Andrea Scibetta). The second part is dedicated to examples of reverse mobility from Italy to China (Gao Changxu, Chiara Lepri, Giuseppe Rizzuto). The third part focuses on case studies based on mobilities from China to territories other than Italy (Rebecca Ehrenwirth, Martina Renata Proserpi, Giulia Rampolla).

The Oxford Handbook of Opera Helen M. Greenwald, 2014 What IS opera? Contributors to The Oxford Handbook of Opera respond to this deceptively simple question with a rich and compelling exploration of opera's adaption to changing artistic and political currents. Fifty of the world's most respected scholars cast opera as a fluid entity that continuously reinvents itself in a reflection of its patrons, audience, and creators. The synergy of power, performance, and identity recurs

thematically throughout the volume's major topics: Words, Music, and Meaning; Performance and Production; Opera and Society; and Transmission and Reception. Individual essays engage with repertoire from Monteverdi, Mozart, and Meyerbeer to Strauss, Henze, and Adams in studies of composition, national identity, transmission, reception, sources, media, iconography, humanism, the art of collecting, theory, analysis, commerce, singers, directors, criticism, editions, politics, staging, race, and gender. The title of the penultimate section, Opera on the Edge, suggests the uncertainty of opera's future: is opera headed toward catastrophe or have social and musical developments of the last hundred years stimulated something new and exciting, and, well, operatic? In an epilogue to the volume, a contemporary opera composer speaks candidly about opera composition today. The Oxford Handbook of Opera is an essential companion to scholars, educators, advanced students, performers, and knowledgeable listeners: those who simply love opera.

Stochastic Processes with Applications Antonio Di Crescenzo, Claudio Macci, Barbara Martinucci, 2019-11-28
Stochastic processes have wide relevance in mathematics both for theoretical aspects and for their numerous real-world applications in various domains. They represent a very active research field which is attracting the growing interest of scientists from a range of disciplines. This Special Issue aims to present a collection of current contributions concerning various topics related to stochastic processes and their applications. In particular, the focus here is on applications of stochastic processes as models of dynamic phenomena in research areas certain to be of interest, such as economics, statistical physics, queuing theory, biology, theoretical neurobiology, and reliability theory. Various contributions dealing with theoretical issues on stochastic processes are also included.

Advances in Latent Variables Maurizio Carpita, Eugenio Brentari, El Mostafa Qannari, 2015-04-01 The book, belonging to the series "Studies in Theoretical and Applied Statistics- Selected Papers from the Statistical Societies", presents a peer-reviewed selection of contributions on relevant topics organized by the editors on the occasion of the SIS 2013 Statistical Conference Advances in Latent Variables. Methods, Models and Applications, held at the Department of Economics and Management of the University of Brescia from June 19 to 21, 2013. The focus of the book is on advances in statistical methods for analyses with latent variables. In fact, in recent years, there has been increasing interest in this broad research area from both a theoretical and an applied point of view, as the statistical latent variable approach allows the effective modeling of complex real-life phenomena in a wide range of research fields. A major goal of the volume is to bring together articles written by statisticians from different research fields, which present different approaches and experiences related to the analysis of unobservable variables and the study of the relationships between them.

Living Masks Umberto Mariani, 2008-11-25 The Nobel Prize-winning dramatist Luigi Pirandello (1867-1936) is undoubtedly one of the most innovative playwrights of the twentieth century and also one of the most complex. While his influence spread throughout modernist and postmodernist works, many first-time audiences and readers are confronted with the difficulty associated with such a radical aesthetic experience. In *Living Masks*, Umberto Mariani presents a clear and comprehensive introduction of Pirandello's major plays for general readers, students, and scholars new to Pirandello. Functioning as a guide to understanding the fundamental themes of Pirandello's plays, the author also examines the critical, aesthetic, and technical problems associated with these plays. He provides extensive reflection on some of the failings of early and contemporary criticism on Pirandello's works and offers many corrections of interpretative direction that will be significant and helpful to directors and performers. In particular, Mariani presents a deeper understanding and greater appreciation of Pirandello's works as a challenge to the tendency to adapt, and modify them, which drastically deprive the works of their original power and beauty. A concise and accessible introduction to a twentieth-century literary master, *Living Masks* will be of interest to dramatists, literary scholars, and students and scholars of Italian studies.

The Trade Impact of European Union Preferential Policies Luca De Benedictis, Luca Salvatici, 2011-06-21 The book investigates the EU preferential trade policy and, in particular, the impact it had on trade flows from developing countries. It shows that the capability of the trade as aid model to deliver its expected benefits to these countries crucially differs between preferential schemes and sectors. The book takes an eclectic but rigorous approach to the econometric analysis by combining different specifications of the gravity model. An in-depth presentation of the gravity model is also included, providing significant insights into the distinctive features of this technique and its state-of-art implementation. The evidence produced in the book is extensively applied to the analysis of the EU preferential policies with substantial suggestions for future improvement. Additional electronic material to replicate the book's analysis (datasets and Gams and Stata 9.0 routines) can

be found in the Extra Materials menu on the website of the book.

Acting the Essence Giuliano Campo,2022-06-09 Acting the Essence examines the theory, practice, and history of the art of the performer from the perspective of its inner nature as work on oneself, within, around, and beyond the pedagogy of the actor. Reflecting primarily on the legacy of Jerzy Grotowski, this book is composed of a series of reflections on the Stanislavskian lineage of practitioners and related authors, in an attempt to revive awareness of the original path traced by the Russian master and to refine certain ambiguities in contemporary training. In a new media age of image and sound, accompanied by a proliferation of new technologies and means to communicate, emphasised by the COVID-19 crisis, a classic question comes to be asked of us again: What is the essence and the principal objective of the work of the performer? Is performing art still necessary? While proposing a theoretical advancement of the discipline and an historical overview of the relevant practices, this book provides tools for a better understanding of the traditional function of the performer's practice as work on the self, for its ecological renaissance through a conscient use of trance, attention, and altered states of consciousness. This book offers insight for students in drama, theatre, and performance courses studying acting and performance at university.

Sustainable Urban Transitions Zaheer Allam,2023-07-18 This book aims to explore how sustainability transitions can be explored in current and future cities and how research and policy approaches can be applied to change urban life as we know it, hence aligning the two thematic of urban science and future science, for achieving deep decarbonization. On this, the discourse on philosophy, ethics, and morality appertaining to sustainable cities and urban transitions, across disciplines, are also welcomed as it provides a deeper understanding of humanity in future scenarios. Advances in Distributed Computing and Machine Learning Umakanta Nanda,Asis Kumar Tripathy,Jyoti Prakash Sahoo,Mahasweta Sarkar,Kuan-Ching Li,2024-06-17 This book is a collection of peer-reviewed best selected research papers presented at the Fifth International Conference on Advances in Distributed Computing and Machine Learning (ICADCML 2024), organized by the School of Electronics and Engineering, VIT - AP University, Amaravati, Andhra Pradesh, India, during January 5-6, 2024. This book presents recent innovations in the field of scalable distributed systems in addition to cutting-edge research in the field of Internet of Things (IoT) and blockchain in distributed environments.

The Dynamics of Environmental and Economic Systems Valeria Costantini,Massimiliano Mazzanti,2012-10-30 Exploiting econometric techniques aimed at dealing with the dynamics of economic systems and the heterogeneity of agents performances, the volume integrates innovation-based reasoning with ex-post analyses, and presents ex-ante analyses able to evaluate the role of climate change policies by using computable general equilibrium models such as the Global Trade

Analysis Project for Energy (GTAP-E). The authors merge and use a range of datasets, including OECD-PATSTAT and STAN, to test novel techniques informed by evolutionary economic theories and the Porter hypothesis. The immediate relevance and applicability of the models will strengthen the hand of policy analysts for whom the dynamic efficiency of environmental policy is a new, high-profile evaluation criterion.

Selected Writings of an Eighteenth-Century Venetian Woman of Letters Elisabetta Caminer Turra, 2007-11-01
Elisabetta Caminer Turra (1751-96) was one of the most prominent women in eighteenth-century Italy and a central figure in the international Republic of Letters. A journalist and publisher, Caminer participated in important debates on capital punishment, freedom of the press, and the abuse of clerical power. She also helped spread Enlightenment ideas into Italy by promoting and publishing Voltaire's latest works and translating new European plays—plays she herself directed, to great applause, on Venetian stages. Bringing together Caminer's letters, poems, and journalistic writings, nearly all published for the first time here, *Selected Writings* offers readers an intellectual biography of this remarkable figure as well as a glimpse into her intimate correspondence with the most prominent thinkers of her day. But more important, *Selected Writings* provides insight into the passion that animated Caminer's fervent reflections on the complex and shifting condition of women in her society—the same passion that pushed her to succeed in the male-dominated literary professions.

Intelligent Decision Technologies 2017 Ireneusz Czarnowski, Robert J. Howlett, Lakhmi C. Jain, 2017-05-24
The volume presents a collection of peer-reviewed articles from the 9th KES International Conference on Intelligent Decision Technologies (KES-IDT-17), held in Vilamoura, Algarve, Portugal on 21–23 June 2017. The conference addressed critical areas of computer science, as well as promoting knowledge transfer and the generation of new ideas in the field of intelligent decision making, project management and data analysis. The range of topics addressed includes methods of classification, prediction, data analysis, decision support, modeling, social media and many more in such diverse areas as finance, linguistics, management and transportation.

Schumpeterian Perspectives on Innovation, Competition and Growth Uwe Cantner, Jean-Luc Gaffard, Lionel Nesta, 2009-07-25
Recent developments in economics have gone from the recognition of the importance of innovation for growth and the exploration of innovation mechanisms to the incorporation of the results of the previous research into economic models. An important lesson to be drawn from all this research is that a purely macro-based analysis of growth is not enough. The various mechanisms of innovation creation and diffusion, the importance of agent heterogeneity, of market selection processes, of the internal organization of the firm and of organizational routines, and the obsolescence and the consequent emergence of new types of capital goods are a few examples of micro-economic phenomena that contribute decisively to macro-economic development. The papers in this volume approach those issues from a Schumpeterian point of view and tackle issues like the growing importance of knowledge and human capital; increasing returns and path

dependence; the role of variety in economic growth; competition and industry evolution.
