**Big Ears** Nichole T. Rustin, Sherrie Tucker, 2008-11-07 In jazz circles, players and listeners with “big ears” hear and engage complexity in the moment, as it unfolds. Taking gender as part of the intricate, unpredictable action in jazz culture, this interdisciplinary collection explores the terrain opened up by listening, with big ears, for gender in jazz. Essays range from a reflection on the female boogie-woogie pianists who played at Café Society in New York during the 1930s and 1940s to interpretations of how the jazzman is represented in Dorothy Baker’s novel *Young Man with a Horn* (1938) and Michael Curtiz’s film adaptation (1950). Taken together, the essays enrich the field of jazz studies by showing how gender dynamics have shaped the production, reception, and criticism of jazz culture. Scholars of music, ethnomusicology, American studies, literature, anthropology, and cultural studies approach the question of gender in jazz from multiple perspectives. One contributor scrutinizes the tendency of jazz historiography to treat singing as subordinate to the predominantly male domain of instrumental music, while another reflects on her doubly inappropriate position as a female trumpet player and a white jazz musician and scholar. Other essays explore the composer George Russell’s Lydian Chromatic Concept as a critique of mid-twentieth-century discourses of embodiment, madness, and black masculinity; performances of “female hysteria” by Les Diaboliques, a feminist improvising trio; and the BBC radio broadcasts of Ivy Benson and Her Ladies’ Dance Orchestra during the Second World War. By incorporating gender analysis into jazz studies, *Big Ears* transforms ideas of who counts as a subject of study and even of what counts as jazz. Contributors: Christina Baade, Jayna Brown, Farah Jasmine Griffin, Monica Hairston, Kristin McGee, Tracy McMullen, Ingrid Monson, Lara Pellegrinelli, Eric Porter, Nichole T. *Stylistic II/V7/I Voicings for Keyboardists* Luke Gillespie,2015-03 ...So much of the jazz harmonic language deals with the ii V I chord progression...[Students] have learned to play a lot of sophisticated voicings, but sometimes there is a lack of harmonic awareness and inner voice leading as well as a weak sense of how chords resolve in a ii V I progression as a

unit...This book will give the jazz keyboard student and teacher a basic foundation for playing ii V I chord progressions and provide some lessons that can be used in the classroom or in private study...Knowing many different kinds of chords is fine, but it is equally important to know how to play one chord many different ways...--preface.

**Audacious Euphony** Richard Cohn, 2012-01-01 Music theorists have long believed that 19th-century triadic progressions idiomatically extend the diatonic syntax of 18th-century classical tonality, and have accordingly unified the two repertoires under a single mode of representation. Post-structuralist musicologists have challenged this belief, advancing the view that many romantic triadic progressions exceed the reach of classical syntax and are mobilized as the result of a transgressive, anti-syntactic impulse. In *Audacious Euphony*, author Richard Cohn takes both of these views to task, arguing that romantic harmony operates under syntactic principles distinct from those that underlie classical tonality, but no less susceptible to systematic definition. Charting this alternative triadic syntax, Cohn reconceives what consonant triads are, and how they relate to one another. In doing so, he shows that major and minor triads have two distinct natures: one based on their acoustic properties, and the other on their ability to voice-lead smoothly to each other in the chromatic universe. Whereas their acoustic nature underlies the diatonic tonality of the classical tradition, their voice-leading properties are optimized by the pan-triadic progressions characteristic of the 19th century. *Audacious Euphony* develops a set of inter-related maps that organize intuitions about triadic proximity as seen through the lens of voice-leading proximity, using various geometries related to the 19th-century Tonnetz. This model leads to cogent analyses both of particular compositions and of historical trends across the long nineteenth century. Essential reading for music theorists, *Audacious Euphony* is also a valuable resource for music historians, performers and composers.

*The Jazz Language: A Theory Text for Jazz Composition and Improvisation* Dan Haerle, 1980 This text presents all of the materials commonly used by the jazz musician in a logical order dictated both by complexity and need. The book is not intended to be either an arranging or improvisation text, but a pedagogical reference providing the information musicians need to pursue any activity they wish.

**In the Course of Performance** Bruno Nettl, Melinda Russell, 1998-12-15 *In the Course of Performance* is the first book in decades to illustrate and explain the practices and processes of musical improvisation. Improvisation, by its very nature, seems to resist interpretation or elucidation. This difficulty may account for the very few attempts scholars have made to provide a general guide to this elusive subject. With contributions by seventeen scholars and improvisers, *In the Course of*

Performance offers a history of research on improvisation and an overview of the different approaches to the topic that can be used, ranging from cognitive study to detailed musical analysis. Such diverse genres as Italian lyrical singing, modal jazz, Indian classical music, Javanese gamelan, and African-American girls' singing games are examined. The most comprehensive guide to the understanding of musical improvisation available, *In the Course of Performance* will be indispensable to anyone attracted to this fascinating art. Contributors are Stephen Blum, Sau Y. Chan, Jody Cormack, Valerie Woodring Goertzen, Lawrence Gushee, Eve Harwood, Tullia Magrini, Peter Manuel, Ingrid Monson, Bruno Nettl, Jeff Pressing, Ali Jihad Racy, Ronald Riddle, Stephen Slawek, Chris Smith, R.
