Philosophy of Statistics ,2011-05-31 Statisticians and philosophers of science have many common interests but restricted communication with each other. This volume aims to remedy these shortcomings. It provides state-of-the-art research in the area of philosophy of statistics by encouraging numerous experts to communicate with one another without feeling restricted by their disciplines or thinking piecemeal in their treatment of issues. A second goal of this book is to present work in the field without bias toward any particular statistical paradigm. Broadly speaking, the essays in this Handbook are concerned with problems of induction, statistics and probability. For centuries, foundational problems like induction have been among philosophers' favorite topics; recently, however, non-philosophers have increasingly taken a keen interest in these issues. This volume accordingly contains papers by both philosophers and non-philosophers, including scholars from nine academic disciplines. - Provides a bridge between philosophy and current scientific findings - Covers theory and applications - Encourages multi-disciplinary dialogue

Inclusive Computing Education in the Secondary School Louise Hayes,Eleanor Overland,2023-10-24 Underpinned by pedagogical practices and theories of what works in teaching computing, this book gives existing and new teachers ideas to enable them to plan an inclusive curriculum for the secondary school computing classroom. Computing is one of the fastest-developing subjects in the curriculum, and computing teachers will always be updating their subject knowledge and pedagogical approaches. Each chapter explores a specific aspect of inclusion and potential barriers faced by students and is designed to challenge teachers to think about their own practice and curriculum design. Themes include the influence of classroom environments, bias in the use of data, collaborative learning, building cultural capital, and racism within AI

applications. The book is also laced with practical ideas to develop teaching shared by a wealth of experienced practitioners, researchers and industry professionals. Written with consideration for the National Curriculum for Computing, this valuable text will give trainee teachers, recently qualified teachers, and experienced teachers the confidence and knowledge they need to successfully deliver an inclusive computing curriculum in the classroom.

Competency-based Assessment Kate Lafferty, Melissa Barnes, 2024-11-18 This book is a practical, evidence-based guide for educators at all levels on how to assess and promote student learning, broadening teachers' understanding of assessment. Balancing assessment with the development and promotion of student learning can be a significant challenge for teachers. This book provides the content, as well as practical guidance, to support educators in developing their understanding of assessment from task-driven, domain-bound content knowledge, towards the assessment of complex competencies. Supported by research, but not overwhelmed by it, the book provides practical strategies that can be applied in the classroom. The pedagogical structure of the book encourages self-guided learning, with each chapter providing opportunities for reflection to facilitate planning and goal setting, as well as quotes and vignettes from students and teachers highlighting their experiences of and perspectives on assessment. This book is a great resource for practising educators and postgraduate students who want to improve their understanding of assessment, implement it more effectively and support better outcomes for their students.

Economics Today Roger LeRoy Miller, 2004 Economics Today has long led the field in offering students and instructors a dynamic, application-rich approach to teaching and learning economics. The book is based on the belief that students learn more when they are involved and engaged. The 12th edition features all new examples that have been selected to grab and hold students' attention. These examples serve one basic purpose-to drive home the application of the theory just presented. One of the keys to the success of Economics Today is that it is suitable for many teaching styles. Instructors who wish to stress theory can do so. Those who wish to stress applications and examples can do that. Those who wish to incorporate technology into the class can do so with ease using MyEconLab.

Thrive Ben Wright, Emily Clements, Martha Boyne, 2018-05-16 Martha, Emily and Ben are thriving teachers. In Thrive they share their personal experiences and demonstrate how you too can thrive during the tricky training year, the daunting NQT year and the crucial RQT year. Using their collective insights, and plenty of evidence-informed strategies and advice, they detail how you can get to grips with the classroom basics - from behaviour management and lesson planning to differentiation and providing for SEND - and effectively continue your professional development. This book is not just a survival manual to help teachers get through their first three years in teaching. Nor is it an academic text that has been written by authors who have only a distant memory of what it takes to stand in front of a class of teenagers for the first time. Thrive is something very different. It gives both the aspiring and the newly qualified the support and guidance to become a

thriving teacher, and has been co-authored by three recently qualified teachers who in this book invest their passion and practical knowledge to inspire and inform others who want to pursue enjoyable and rewarding careers in teaching. Thrive is divided into three parts specifically detailing what can be expected in the training year, NQT year and RQT year respectively - with the authors' commentary threaded throughout to demonstrate how the ideas discussed can be successfully put into practice. Their accounts are also complemented by expert advice from two people who are at the very top of their profession, Lianne Allison and Dr Simon Thompson, who provide wider perspectives drawn from a wealth of teaching experience. Forty of the book's forty-six chapters begin with a checklist outlining what a developing teacher is expected to do, and each chapter ends with a to-do list that can be used as a quick reference point to structure the strategies implemented. These to-do lists are also followed by lists of suggested further reading so that readers can delve deeper into topics and fields of research that they find particularly interesting or relevant. Furthermore, the book offers helpful counsel on choosing the best training route as well as an in-depth analysis of the change in priorities for busy teachers as they progress: encouraging constant reflection, outlining potential pathways and emphasising the importance of evidence-based practice and how new teachers can, and should, incorporate this into their teaching. Rooted in practical strategies and innovative ideas, Thrive is the essential guide for trainee secondary school teachers and teacher trainers.

Learning and Teaching Using ICT in Secondary Schools John Woollard,2007-03-16 Motivated by the conviction that ICT should be used as an effective tool, this book shows how it can support teaching and learning in the classroom and in the virtual world of school intranet, websites and learning platforms. Practical tasks and teaching tips demonstrate how imaginative use of technology can promote creative and enthusiastic teaching, as well as enable new approaches to teaching and learning. It includes descriptions of new technologies and systems and how they can be used, as well as guidance on the software, and activities to engage pupils in their own learning.

100 Ideas for Primary Teachers: Supporting EAL Learners Chris Pim,2018-04-19 No matter what you teach, there is a 100 Ideas title for you! The 100 Ideas series offers teachers practical, easy-to-implement strategies and activities for the classroom. Each author is an expert in their field and is passionate about sharing best practice with their peers. Each title includes at least ten additional extra-creative Bonus Ideas that won't fail to inspire and engage all learners. This book is a brand new title in the bestselling 100 Ideas series, providing primary teachers with strategies and activities to support the induction, assessment and learning of pupils with English as an additional language (EAL). According to data collected by the Department for Education in 2016, over 20% of pupils in primary schools are exposed to a language other than English in their home, making this an essential resource for every teacher. EAL expert Chris Pim offers a range of ideas for use both in

the classroom and to adopt as a whole-school approach. There is an emphasis on using ICT throughout the book, featuring advice on where to find the best software, resources and websites. Ideas include: setting up the classroom, parent conferences, cross-cultural maths, effective questioning techniques and running a 'Young Interpreter Scheme.' 100 Ideas for Primary Teachers: Supporting EAL Learners is a treasure trove of adaptable ideas to use for pupils who are beginners and advanced learners of EAL.

Human Resource Management Greg L. Stewart, Kenneth G. Brown, 2009 'Human Resource Management' provides readers with a framework for determining the human resources decisions that are most appropriate given specific organisational strategies. This helps them develop a set of human resource tools as well as become proficient at determining when each tool should be used.

Teaching with Tablets Helen Caldwell, James Bird, 2015-03-19 The presence of handheld technologies in the classroom isn't enough - you need to know how to use them to enhance teaching and transform learning. As more and more primary schools acquire devices such as iPads and tablets, it is becoming clear that adding them as a classroom resource is not enough. Teachers and trainees need strategies to integrate these into existing learning contexts in a meaningful way. Without this, these fantastic resources lose their value. This book helps teachers to make the most of these devices in the primary classroom. It offers guidance on: how to use tablets to devise meaningful learning activities embed them in genuine curriculum contexts, drawing upon case studies from existing practice It is written for non-specialists and explains technical terms in an accessible, practical way. Each chapter begins with a case study contributed by a teacher using tablets in schools. Real life examples and comments like this give the text a truly practical focus. The book's Pinterest board includes the apps mentioned in the book as well as a handy infographic for a snapshot guide on starting off your tablet teaching journey. A note from the authors The use of technology in schools continues to evolve rapidly as new devices and tools become available, and the adoption of mobile devices such as iPads and tablets has been a particularly exciting development in recent years. The benefits offered by these technologies, such as their portability, connectivity, accessibility and range of media, present new challenges and opportunities for teaching and learning. As the take up of tablets gathers pace in our schools there is a need for advice on the best approaches and apps to help achieve successful learning outcomes. Teachers need to find meaningful ways to integrate the devices into their own practice and to evaluate which of the many thousands of educational apps might be appropriate for their pupils. This book considers how iPads and tablets can be used to enhance teaching and learning in primary schools. It is especially relevant in the light of the computing curriculum, which puts a new emphasis on children as makers and creators of digital content. Across other curriculum subjects too, the introduction of mobile devices that can be quickly and reliably accessed has precipitated a shift in practice. For example, they have enabled

teachers and children to spontaneously pursue lines of inquiry, to connect, collaborate and publish in many different ways, and to use their digital skills to enhance their exploration of the physical world outside the classroom. With these opportunities in mind, we offer anecdotes from the classroom and examples of how tablets might be embedded within current pedagogy and practice as a natural learning tool. Each chapter combines a practical case study with discussion of related pedagogy, and recommends apps to support a personalised, inclusive and active approach to teaching and learning.

Pay Attention, Carter Jones Gary D. Schmidt,2019-04-04 Carter Jones is astonished early one morning when he finds a real English butler, bowler hat and all, on the doorstep. He announces he is here to stay to help the Jones family, which is a little bit broken. In addition to figuring out middle school, Carter has to adjust to the unwelcome presence of this new know-it-all adult in his life and navigate the butler's notions of decorum and love of cricket. And ultimately, when his burden of grief and anger from the past can no longer be ignored, Carter learns that a burden becomes lighter when it is shared. Sparkling with humour, this insightful and compassionate story is the latest from the award-winning author of *Orbiting Jupiter*.

Mathematics Inside the Black Box Dylan Wiliam, 2006 'Mathematics Inside the Black Box' is an easy-to-read booklet offering great advice and guidance on how to develop formative assessment in Mathematics. The booklet suggests methods for teachers to interact more effectively with pupils on a day-to-day basis to promote their learning, for instance by using focused questioning techniques and careful analysis of pupils' responses. The title sets out in detail the authors' findings on ways of implementing assessment for learning: * Developing questioning In classrooms * The Importance of feedback * The role of self- and peer-assessment A final section pulls together key issues in implementing the strategies in a whole-school context. Table of contents: * What does this booklet offer? * Background * Aims of mathematics teaching * Principles of learning * Classroom dialogue: talking in and about mathematics * Challenging activities (The obvious answer is not always correct. Using what we know about pupils' mathematical understanding. Problems with more or less than one correct answer. Generating mathematical structure. Closed questions can sometimes be valuable. Mistakes are often better for learning than correct answers. Using textbooks. What is different about easy and hard questions. Using summative tests formatively. Good problems are not universal. Generating challenging activities.) * Encouraging pupil talk through questioning and listening * Strategies to support all learners * Opportunity for peer discussion * Encouraging open discussion * Feedback and marking (Enabling pupils to identify the errors themselves. Identifying where pupils use and extend their existing knowledge. Encouraging pupils to reflect. Suggesting pupils discuss their ideas with other pupils. Helping pupils to show their working. Advice on learning facts and procedures.) * Self and peer assessment (Two stars and a wish. Commenting in pairs. Checking understanding. Discussing comments.) * Putting it into practice.
