The Devil in History Vladimir Tismaneanu, 2012-09-28 The Devil in History is a provocative analysis of the relationship between communism and fascism. Reflecting the author's personal experiences within communist totalitarianism, this is a book about political passions, radicalism, utopian ideals, and their catastrophic consequences in the twentieth century's experiments in social engineering. Vladimir Tismaneanu brilliantly compares communism and fascism as competing, sometimes overlapping, and occasionally strikingly similar systems of political totalitarianism. He examines the inherent ideological appeal of these radical, revolutionary political movements, the visions of salvation and revolution they pursued, the value and types of charisma of leaders within these political movements, the place of violence within these systems, and their legacies in contemporary politics. The author discusses thinkers who have shaped contemporary understanding of totalitarian movements—people such as Hannah Arendt, Raymond Aron, Isaiah Berlin, Albert Camus, François Furet, Tony

Judd, Ian Kershaw, Leszek Kolakowski, Richard Pipes, and Robert C. Tucker. As much a theoretical analysis of the practical philosophies of Marxism-Leninism and Fascism as it is a political biography of particular figures, this book deals with the incarnation of diabolically nihilistic principles of human subjugation and conditioning in the name of presumably pure and purifying goals. Ultimately, the author claims that no ideological commitment, no matter how absorbing, should ever prevail over the sanctity of human life. He comes to the conclusion that no party, movement, or leader holds the right to dictate to the followers to renounce their critical faculties and to embrace a pseudo-miraculous, a mystically self-centered, delusional vision of mandatory happiness.

Guidebook for Social Work Literature Reviews and Research Questions Rebecca L. Mauldin, Matthew DeCarlo, 2020 Book Description: This open educational resource is currently in development. Please be aware that there might be updates throughout the semester as we continue adding and editing content, testing for accessibility, and incorporating feedback from pilot semester(s). If you need an accessibility accommodation or have questions about the use of this text, please contact OER services at pressbooks@uta.edu. As an introductory textbook for social work students studying research methods, this book guides students through the process of writing a literature review and determining research questions for a research project. Students will learn how to discover a researchable topic that is interesting to them, examine scholarly literature, and write a literature review. This text is currently in the pilot stage Fall 2019 with an anticipated publication date of January 2020. We recommend that you use the Chrome web browser at this time. Please be aware that there might be some cosmetic tweaks throughout the semester as we continue testing for browser support, accessibility, and export types.

Reporting Qualitative Research in Psychology Heidi M. Levitt, 2020 Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (PC) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper: the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting

standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting.--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).

How Muslims Shaped the Americas Omar Mouallem,2021-09-21 *Winner of the Wilfrid Eggleston Award for Nonfiction* *Selected as a Most Anticipated Book of Fall by The Globe and Mail and The Toronto Star* An insightful and perspective-shifting new book, from a celebrated journalist, about reclaiming identity and revealing the surprising history of the Muslim diaspora in the west—from the establishment of Canada’s first mosque through to the long-lasting effects of 9/11 and the devastating Quebec City mosque shooting. “Until recently, Muslim identity was imposed on me. But I feel different about my religious heritage in the era of ISIS and Trumpism, Rohingya and Uyghur genocides, ethnonationalism and misinformation. I’m compelled to reclaim the thing that makes me a target. I’ve begun to examine Islam closely with an eye for how it has

shaped my values, politics, and connection to my roots. No doubt, Islam has a place within me. But do I have a place within it?" Omar Mouallem grew up in a Muslim household, but always questioned the role of Islam in his life. As an adult, he used his voice to criticize what he saw as the harms of organized religion. But none of that changed the way others saw him. Now, as a father, he fears the challenges his children will no doubt face as Western nations become increasingly nativist and hostile toward their heritage. In *Praying to the West*, Mouallem explores the unknown history of Islam across the Americas, traveling to thirteen unique mosques in search of an answer to how this religion has survived and thrived so far from the place of its origin. From California to Quebec, and from Brazil to Canada's icy north, he meets the members of fascinating communities, all of whom provide different perspectives on what it means to be Muslim. Along this journey he comes to understand that Islam has played a fascinating role in how the Americas were shaped—from industrialization to the changing winds of politics. And he also discovers that there may be a place for Islam in his own life, particularly as a father, even if he will never be a true believer. Original, insightful, and beautifully told, *Praying to the West* reveals a secret history of home and the struggle for belonging taking place in towns and cities across the Americas, and points to a better, more inclusive future for everyone.

MLA Style Manual and Guide to Scholarly Publishing Joseph Gibaldi, Modern Language Association of America, 1998 The *MLA Style Manual* has been the standard guide for graduate students, teachers, and scholars in the humanities and for professional writers in many fields. The second edition contains several added sections and updated guidelines on citing electronic works -- including materials found on the World Wide Web. There is an expanded chapter on the publication process, from manuscript to published work, and advice for those seeking to publish their articles or books. A chapter by the attorney Arthur F. Abelman reviews legal issues, such as copyright law, the concept of fair use, the provisions of a typical publishing contract, defamation, and the emergence of privacy law. Other chapters discuss stylistic conventions and the preparation of manuscripts, theses, and dissertations and offer an authoritative and comprehensive presentation of MLA documentation style.

Scientific Writing for Impact Factor Journals Eric Lichtfouse, 2013-01-01 Publish or Perish. This old adage illustrates the importance of scientific communication; essential to research, it also represents a strategic sector for each country's competitiveness. An often-neglected topic, scientific communication is of vital importance, with new information technologies accelerating and profoundly changing how knowledge is disseminated. The necessity of optimally disseminating experts' findings has also become crucial to researchers, institutes and universities alike, which has prompted the recent advent of Impact Factors for the evaluation and financing of research, the goal being for scientific knowledge to be equally distributed to a very broad audience, especially to the media, entrepreneurs and sociopolitical players. This handbook presents the golden rules for publishing scientific articles. In order to do away with major recurring errors, the author explains how to easily structure an article and offers support for the typical mistakes made by native French speakers publishing in English, tips on how to make the style more academic or more general to fit your intended readership and, in the book's closing section, suggests new publishing techniques of the Internet age such as the micro-article, which allows researchers to focus their findings into a single innovative point. The major principles presented can be applied to a broad range of documents such as theses, industry reports, publicity texts, letters of intent, CVs/resumes, blogs and press releases, as all of these documents involve presenting information on advances, discoveries, innovations, or changes to our previous knowledge.
