Industrial Relations in Schools Mike Ironside, Roger Seifert, 2005-08-12 The subject of industrial relations is intimately connected with the nature of schooling - in particular, the teacher trade unions have played and will continue to play a crucial role in shaping the school system - yet this subject has been virtually neglected in educational literature. Mike Ironside and Roger Seifert's book redresses this balance and unravels the complex issues surrounding the employment and management of teachers. Recent changes in education have had massive implications for the way in which our education system is organised. In the light of recent events, this book questions who controls or ought to control schools, focusing on the government, Department of Education, LEA's, head teachers, school governors, parents and teaching unions. The authors argue that in order for schools to continue to function, industrial relations must be given priority, including the development of a proper framework for negotiation and the resolution of conflicts.

Industrial Relations Trevor Colling, Mike Terry, 2010-09-07 This revised edition of Industrial Relations: Theory and Practice follows the approach established successfully in preceding volumes edited by Paul Edwards. The focus is on Britain after a decade of public policy which has once again altered the terrain on which employment relations develop. Government has attempted to balance flexibility with fairness, preserving light-touch regulation whilst introducing rights to minimum wages and to employee representation in the workplace. Yet this is an open economy, conditioned significantly by developing patterns of international trade and by European Union policy initiatives. This interaction of domestic and cross-national influences in analysis of changes in employment relations runs throughout the volume.

Rural and Regional Futures Anthony Hogan, Michelle Young, 2014-09-19 Agriculture, mining and related rural industries

have been central to the development of Australia's economy. This book details the role that the Australian Government has played in the making of rural and regional Australia, particularly since World War II. The book reviews these policies and evaluates them with regards the commitments undertaken by the Government to contribute towards vibrant, rural communities. Policy areas addressed include agriculture, water, education, welfare and population, natural resource management, resource extraction, Indigenous and affairs, localism, rural research and regional innovation, Youth Affairs and the devolution of regional governance. Overall two distinct policy strategies can be observed: one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development, leaving this role to the market. Having considered these strategies and their impacts, the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant, prosperous rural and regional Australia. Rural and Regional Futures concludes with several chapters looking to the future. One chapter explores what the role of the state can be within a social market economy while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation. While these materials present as a case study of developments in Australia, the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such, the insights offered by this book will have wide appeal.

Unions and Globalisation Peter Fairbrother, John O'Brien, Anne Junor, Michael O'Donnell, Glynne Williams, 2011-09-15 In recent decades, trade unions have suffered major reversals and experienced declining memberships. Transnational corporations and state-owned multi-nationals have increasingly implemented deteriorating terms and conditions of employment, with vulnerable and insecure job contracts. In this context, there has been a wide-ranging debate about the form of trade unionism, the bases for collective organization and struggle and the future of trade unionism. This book addresses these questions both theoretically, in relation to debates, as well as substantively via a series of selected studies. It is a must read for all those studying industrial relations, human resource management, the sociology of work and employment, economic sociology, economic and labor geography and business studies in general.

Educating Generation Next Lucas Walsh, 2016-01-26 Is the current industrial model of schooling capable of preparing young people for modern working life? This book provides an unsettling picture of the challenges young people face following the uncertainty of the Global Financial Crisis. It asks whether teachers and schooling are able to provide the skills needed in a contemporary global economy.

The Selfless Constitution Stu Woolman, 2021-07-28 Do you possess 'freedom'-the will to do as you choose-as an individual, as a participant in social affairs or as a citizen in the political realm? Well, no. Not really. At least not as most of us understand a term loaded down with metaphysical baggage. Don't worry. You've got something better: a neurological system capable of carrying out the most complex analytical and computational tasks; membership in innumerable communities that provide you with huge stores of knowledge and wisdom; and a politico-constitutional order that ought to provide the material and the immaterial conditions that will enable you to pursue a life worth valuing. Drop the simplistic folk-psychology of unfettered freedom, whilst holding on to intentionality, and you might be inclined to adopt a set of social practices and political arrangements that enhance the chances that you and your compatriots will flourish. As many recent studies of consciousness reveal our neurological systems are complex feedback mechanisms designed to create myriad for trial and error and (if you survive) the production of new stores of knowledge. Individuals-comprised of numerous radically heterogeneous, naturally and socially determined selves-are always experimenting, attempting to divine through reflection and action, what 'works' best: even when 'best' means fully embracing who we already are. Choice architects, those persons charged with constructing the environments within which we operate daily, should (if responsible) regularly run experiments that attempt to eliminate biases, and ultimately, deliver norms that nudge us away from negative defaults toward more optimal ends. A constitutional democracy, made up of millions of radically heterogeneous, densely populated individuals, constantly strives to determine what works best for most of its many constituents. Because South Africa's Constitution states (at an extremely high level of generality) only some of the norms that govern our lives, it remains for citizens, representatives and judges to create doctrines and institutions that serve its capacious framed ends best. After canvassing the relevant literature in neuroscience, empirical philosophy, behavioural psychology, social capital theory, development economics, and emergent experimental governance, this work suggests that manifold experiments in living that fall within the accepted parameters of our shared constitutional norms are likely, over time, to produce more optimal ways of being that can be replicated by other members of our polity. Our reflexive stance toward best practices-a linchpin of this book's take on experimental governance-when inextricably linked to a commitment to flourishing and to the expansion of individual capabilities, should cause us to alter the content of the fundamental norms that shape our lives and bind us to one another. A political order founded upon experimental constitutionalism and flourishing promises an egalitarian pluralist reformation of South African society. The book spins out its novel thesis against the concrete backdrop of political arrangements and judicial doctrines that have emerged during the first 20 years of our truly vibrant constitutional democracy. Its trenchant analysis of political institutions and constitutional case law shows us how far we have come, and how far we still have to go.

The Australian People James Jupp, 2001-10 Australia is one of the most ethnically diverse societies in the world today.

From its ancient indigenous origins to British colonisation followed by waves of European then international migration in the twentieth century, the island continent is home to people from all over the globe. Each new wave of settlers has had a profound impact on Australian society and culture. The Australian People documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people. It is one of the largest reference works of its kind, with approximately 250 expert contributors and almost one million words. Illustrated in colour and black and white, the book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation.

International Labour Law Reports - 15 Benjamin Aaron,Zvi H. Bar-Niv,Felice Morgenstern,Jean-Maurice Verdier,Thilo Ramm,Tore Sigeman,1997-01-01 The International Labour Law Reports is a series of annual publications of labour law judgements by the highest courts in a number of jurisdictions. ILLR is intended primarily for the use of judges, labour law practitioners, industrial relations specialists and students who need or desire ready access to authoritative information of a comparative nature on problems arising in the field of labour law and industrial relations. Each judgement reprinted in ILLR is accompanied by Headnotes and in practically all cases by an Annotation which sets forth, among other things, the legal issues involved, the basic facts of the case (if not included in the judgement itself), the relevant statutory provisions and judicial precedents, the labour law and industrial relations context in which the case arose and the significance of the judgement in the development of the law. The ILLR provide the reader with factual information that is not coloured by the personal views of the annotators. As a rule, judgements are printed in extenso; editorial discretion has been relied upon to delete or to summarize portions of judgements that are purely technical or only of marginal interest. Volume 15 covers the period 1 October 1994 to 30 September 1995.

Policy Learning and British Governance in the 1960s Hugh Pemberton,2004-07-12 Why did Britain's economic policy revolution in the 1960s achieve so little? Drawing on the latest political science theories of policy networks and policy learning, Hugh Pemberton outlines a new model of economic policy making and then uses it to interrogate recently-released government documents. In explaining both the radical shift in policy and its failure to achieve its full potential, this book has much to say about the problems of British governance throughout the whole of the postwar period.

The Changing Institutional Face of British Employment Relations Linda Dickens,Alan C. Neal,2006-01-01 Employment

protection in Britain, once seen as resting on collective bargaining supported by public policy, has increasingly come to be framed in terms of individual legal rights, enforceable before judicial forums such as employment tribunals. This dramatic shift towards juridification of the individual employment relationship has not only contributed towards significant changes to the institutional `landscape of employment relations in Britain, but also carries important implications for the future of employment law and regulation in `the home of collective bargaining. This comprehensive evaluation of current institutional reality and trends prepared to mark the 30th anniversary of the Advisory Conciliation and Arbitration Service (Acas) provides a unique look inside the key institutions of British employment relations. Each contributor leading academics and senior practitioners, all closely associated with particular institutions locates their institution in terms of purpose, origins, and context, discusses its structure, governance and composition, and assesses its operation, considering current challenges and future direction. In the course of examining issues relating to institutional choice and roles, the presentations offer contemporary views on the impact of decentralisation and the shrinking of collective bargaining, decline in trade union membership and strength, and the political effects of increasing global competition. The influence of EU social policy initiatives upon British legislative policy is identified, while attention is drawn to the consequences of an increased feminisation of the workforce, along with an increasing incidence of `non-standard workers and continuing service sector growth. Set alongside the evidence of decline in manufacturing, restructuring of the public sector, and the growth of the SME sector, this volume demonstrates the remarkable pressures for change which have impacted upon the institutions of British employment relations over the past thirty years. These essays offer an especially valuable mix of expert independent discussion along with personal insights gained from direct involvement in the operation of the key bodies. As a much-needed overview and basis for evaluation of the current institutional map of British employment relations, as well as a contemporary consideration of lessons to be drawn from the changing institutional face of employment relations in Britain, this book will be of inestimable value to policy-makers and practitioners in the field, as well as to students, academics, and more generally interested observers of the British experience.

Youth policy in Greece Sladjana Petkovic,Howard Williamson,Council of Europe,2015-07-21 Greece is the 20th country to have had its youth policy reviewed by an international review team appointed by the Council of Europe. The financial crisis and resulting high unemployment rate, especially among young people, was the major concern encountered by the review team. Although the crisis has compelled Greece to engage in profound fiscal reform and address many of its structural weaknesses, this has not been matched by labour market activation policies and other youth policy measures needed to reverse the mood of despondency and stem the tide of emigration of young people. This international review focused in particular on two aspects of youth transitions: the transition from the education system to the labour market; and the related

issue of military service and conscription, which is an integral part of life for young men in Greece. The review team also considered characteristics of the public administration, which dwells on bureaucratic compliance and has limited scope and licence for fostering initiative and creativity, despite incessant rhetoric about the need for “entrepreneurship”. The review team advocates the establishment of more creative and innovative mechanisms to free the entrepreneurial and participative spirit not only of young people in Greece, but also of its regional and local administrations, youth organisations and local youth councils, in order for them to provide timely and purposeful intervention, opportunity and support according to local need and circumstances.
