History of the Italian Agricultural Landscape Emilio Sereni, 1997 From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution.

Men of Honour Giovanni Falcone, Marcelle Padovani, 1993 Judge Falcone, who led the war against the Mafia in Italy, was assassinated with his wife and three bodyguards in a car-bomb explosion in May 1992 - just as he was to be given powers to investigate the organization nationally. Written the previous year, this is his account of the Mafia.

The Ethnically Diverse City Frank Eckardt, John Eade, 2011-01-01

Cosa Nostra: A History of the Sicilian Mafia John Dickie, 2015-03-31 The Italian-American mafia has its roots in a mysterious and powerful criminal network in Sicily. While the mythology of the mafia has been widely celebrated in American culture, the true origins of its rituals, laws, and methods have never actually been revealed. John Dickie uses startling new research to expose the secrets of the Sicilian mafia, providing a fascinating account that is more violent, frightening, and darkly comic than anything conceived in popular movies and novels. How did the Sicilian mafia begin? How did it achieve its powerful grip in Italy and America? How does it operate today? From the mafia's origins in the 1860s to its current tense relationship with the Berlusconi government, Cosa Nostra takes us to the inner sanctum where few have dared to go before. This is an important work of history and a revelation for anyone who ever wondered what it means to be made in the mob.

Been Here a Thousand Years Venezia, Mariolina, 2009-06-09 In this sweeping work, Venezia portrays five generations of the Falcone family. Through their complicated, funny, tragic, and astonishing stories, Venezia also recounts a century and a half of Italy's tumultuous history.

Performative Urbanism Sophie Wolfrum, Nikolai Brandis, 2015 The concept of relational space in urbanism 'understanding the space of the city as produced by society' is connected with an understanding of architecture unfolding in situations. Urban space is induced by architecture, space is produced while experiencing architecture within a situation. There is a dialectical interplay between architectonic material (intra-architectonic reality) and usage and action

(urban reality). Thus, an architectonic situation can be interpreted as performative in the sense of performativity as it has emerged in the discourse over the last decade. The everyday urban life of the city, with all its potential and conflicts, is taken into consideration. Analyzing the urban is not enough. This discourse is about Urban Design. Is architectural design one part, and the actualization of architecture in a performative incident another? Does Urban Design need different practices?

Global Health Risk Framework National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Health Sciences Policy, 2016-05-06 Since the 2014 Ebola outbreak many public- and private-sector leaders have seen a need for improved management of global public health emergencies. The effects of the Ebola epidemic go well beyond the three hardest-hit countries and beyond the health sector. Education, child protection, commerce, transportation, and human rights have all suffered. The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats, many of which could disrupt global health and commerce far more than the recent outbreak. In order to explore the potential for improving international management and response to outbreaks the National Academy of Medicine agreed to manage an international, independent, evidence-based, authoritative, multistakeholder expert commission. As part of this effort, the Institute of Medicine convened four workshops in summer of 2015 to inform the commission report. The presentations and discussions from the Workshop on Research and Development of Medical Products are summarized in this report.

Grow the Core David Taylor, 2013-02-25 Grow the Core stands conventional wisdom about business growth on its head and provides a proven formula for growing your business in recessionary times. These days, it's a common belief among business leaders across industry sectors that the best way to grow their businesses is to expand into new markets. In reality, virtually all top-performing companies achieve superior results through a leading position in their core business. Unfortunately, there's very little in the way of practical advice on how to do this. Grow the Core shows you how to focus on your core business for brand success, with a program of eight workouts road-tested by the author's consultancy, the brandgym. The book provides inspiration, practical advice and proven tools for building and strengthening your core business. It is packed with case studies from brandgym clients, including Mars, Friesland Campina, SAB Miller and Danone. The book features exclusive brandgym research, in addition to front-line experience on over one hundred brand coaching projects.

Material ConneXion George M. Beylerian, Andrew Dent, 2005-11-11 From the largest global resource of new materials comes this innovative new book that connects materials to designers' needs. In each of the seven main sections, this highly illustrated book identifies key trends, looks to the future, and helps design professionals select materials with the most potential for their specific projects. By defining a material based on its base composition rather than current use, Material ConneXion allows a designer to fully understand the potential and limitations for a material while conceiving of its new

application. Organized to follow the model of the Material ConneXion library, the book's chapters are organized on seven base compositions including: Metals, Glass, Ceramics, Polymers, Natural and naturally derived materials, Carbon-based materials, Cement-based materials. The book includes quotes from 54 leading designers, architects, artists and thinkers worldwide, including Wolfgang Joop, Karim Rashid, Peter Marino, Greg Lynn, Gaetano Pesce, and Philippe Starck, that reflect upon the role of materials in contemporary design and identify their favorite materials. Additionally, the book includes an important reference section with a bibliography, glossary of technical terms, and lists of trade show and professional publication web sites.

The Wings of the Sphinx Andrea Camilleri, 2009-12-29 “You either love Andrea Camilleri or you haven’t read him yet. Each novel in this wholly addictive, entirely magical series, set in Sicily and starring a detective unlike any other in crime fiction, blasts the brain like a shot of pure oxygen. Aglow with local color, packed with flint-dry wit, as fresh and clean as Mediterranean seafood — altogether transporting. Long live Camilleri, and long live Montalbano.” A.J. Finn, #1 New York Times bestselling author of *The Woman in the Window* Things are not going well for Inspector Salvo Montalbano. His relationship with Livia is once again on the rocks and—acutely aware of his age—he is beginning to grow weary of the endless violence he encounters. Then a young woman is found dead, her face half shot off and only a tattoo of a sphinx moth giving any hint of her identity. The tattoo links her to three similarly marked girls—all victims of the underworld sex trade—who have been rescued from the Mafia night-club circuit by a prominent Catholic charity. The problem is, Montalbano's inquiries elicit an outcry from the Church and the three other girls are all missing.

Let's Wake Up, Italics! Piero Bassetti, 2017-04-01

When America Became Suburban Robert A. Beauregard, 2006-08-25 In the decades after World War II, the United States became the most prosperous nation in the world and a superpower whose dominance was symbolized by the American suburbs. Spurred by the decline of its industrial cities and by mass suburbanization, people imagined a new national identity—one that emphasized consumerism, social mobility, and a suburban lifestyle. The urbanity of the city was lost. In *When America Became Suburban*, Robert A. Beauregard examines this historic intersection of urban decline, mass suburbanization, domestic prosperity, and U.S. global aspirations as it unfolded from 1945 to the mid-1970s. Suburban expansion and the subsequent emergence of sprawling Sunbelt cities transformed every aspect of American society. Assessing the global implications of America’s suburban way of life as evidence of the superiority of capitalist democracy, Beauregard traces how the suburban ideology enabled America to distinguish itself from both the Communist bloc and Western Europe, thereby deepening its claim of exceptionalism on the world-historical stage. Placing the decline of America’s industrial cities and the rise of vast suburban housing and retail spaces into a cultural, political, and global context, Beauregard illuminates how these phenomena contributed to a changing notion of America’s identity at home and abroad.

When America Became Suburban brings to light the profound implications of de-urbanization: from the siphoning of investments from the cities and the effect on the quality of life for those left behind to a profound shift in national identity. Robert A. Beauregard is a professor in the Graduate School of Architecture, Planning, and Preservation at Columbia University. He is the author of *Voices of Decline: The Postwar Fate of U.S. Cities* and editor of *Economic Restructuring and Political Response and Atop the Urban Hierarchy*.

Cities And The Rise Of States In Europe, A.d. 1000 To 1800 Charles Tilly, Willem Pieter Blockmans, Wim P Blockmans, 1994-10-20 The rise of large, powerful states in Europe after 1000 a.d. transformed life across the Continent and eventually through the whole world. The new European states disposed of unprecedented stores of capital and vast military capacities. In recent decades, scholars have often drawn general models of state formation from the European experience after 1700, then applied them with only partial success to other parts of the world. Although such studies of modern Europe improved on early theories of modernization and development, they failed to accommodate the varied ways in which city-states, empires, federations, centralized states, and other forms of government evolved and the pivotal role that cities played in the multiple paths to state formation. In a sweeping, original work detailing eight centuries of city-state relations, Charles Tilly, Wim P. Blockmans, and their contributors document differences in political trajectories from one part of Europe to another and provide authoritative surveys of urbanization in nine major regions; they also suggest many correctives to previous analyses of state formation. They show that the variable distribution of cities significantly and independently constrained state formation and that states grew differently according to the character of urban networks in a given region. Their systematic study shows that unilinear models of state transformation underestimate the contingency and variability of popular and elite compliance with state-building activities. The book's findings offer important implications for the nature of economy, sovereignty, warfare, state power, and social change throughout the world.

The Gentrification Reader Loretta Lees, Tom Slater, Elvin K. Wyly, 2010 This Reader brings together the classic writings and contemporary literature that has helped to define the field of Gentrification, changed the direction of how it is studied and illustrated the points of conflict and consensus that are distinctive of gentrification research.
