Teoría de las condiciones y los servicios generales de la producción Gustavo Garza, Jaime Sobrino, Normand Asuad, Carola Conde, Conrado Jiménez, 2013-06-17 La economía política de la urbanización asume que las condiciones generales de la producción constituyen el determinante histórico fundamental de la concentración espacial del capital. En este libro, primero de una trilogía sobre el tema, se extiende esa categoría proponiendo la existencia del binomio condiciones y servicios generales de la producción, como un concepto más adecuado para comprender las aglomeraciones metropolitanas contemporáneas. En la primera parte de la obra se analiza la evolución de dicha categoría dentro de la teoría del capital, su desarrollo histórico mundial como andamiaje infraestructural, así como su definición, tipología y características. En la segunda parte se inicia un estudio empírico sobre el vínculo de la infraestructura con la competitividad urbana y, principalmente, la cuestión de su financiamiento en el caso de la Ciudad de México.

*The Constitution of Society* Anthony Giddens, 1984 Anthony Giddens has been in the forefront of developments in social theory for the past decade. In *The Constitution of Society* he outlines the distinctive position he has evolved during that period and offers a full statement of a major new perspective in social thought, a synthesis and elaboration of ideas touched on in previous works but described here for the first time in an integrated and comprehensive form. A particular feature is Giddens's concern to connect abstract problems of theory to an interpretation of the nature of empirical method in the social sciences. In presenting his own ideas, Giddens mounts a critical attack on some of the more orthodox sociological views. *The Constitution of Society* is an invaluable reference book for all those concerned with the basic issues in contemporary social theory.

*Environmental Education for Sustainability* Mauri Ahlberg, Walter Leal Filho, 1998 The book deals with the matter of environmental education applied to education for sustainability, taking into account formal and non-formal education contexts and bearing in mind the relationship between environmental quality and quality of life. The ideas, experiences and perspectives presented by the various specialists contributing to the book, from various geographical regions, provide an overview of the diversity of approaches used internationally in the field of environmental education and supply background information on the different problems inherent to this field, as well as a bird's eye perspective on the initiatives, projects and concrete action on the ground.

Wildlife Feeding and Nutrition Charles Robbins, 2012-12-02 *Wildlife Feeding and Nutrition* is the fifth in a series of books on animal feeding and nutrition. It fills a serious gap in the wildlife and animal nutrition literature by providing a discussion of the basic principles of nutrition and their application to the broader field of wildlife ecology. This book is based on lectures presented in an upper-level wildlife nutrition course taught at Washington State University. The book discusses the five major nutritional categories of constituents that animals must acquire from their external environments: energy, protein, water, minerals, and vitamins. Subsequent chapters cover topics such as the estimation of energy and protein requirements; dietary protein requirements for captive wildlife and free-ranging populations; wildlife reproductive characteristics; the digestion and metabolism of nutrients; and food intake regulation. The text will be invaluable to wildlife biologists, to those who are interested in captive animal nutrition and management, and to those who are interested in improving the feed supply and nutrition of free-ranging wildlife.
