Six Settings of [Ave regina coelorum] (ZWV 128) Jan Dismas Zelenka,2018-10-31 Dresden-based Bohemian composer Jan Dismas Zelenka (1679–1745) is now regarded as one of the leading figures of early eighteenth-century German musical life. His six settings of the Marian antiphon [Ave regina coelorum] (ZWV 128), written in 1737, belong to his late period, when he composed some of his most celebrated works. Offering stylistic variety and flexibility of ensemble, they also exemplify key elements of Viennese liturgico-musical practices, which were emphasized in Dresden following the arrival of Habsburg archduchess Maria Josepha, and her influential brand of religious expression, *pietas austriaca*, upon her marriage to Friedrich August II. This volume presents, for the first time, a critical edition of the complete set.

Giovanni Pierluigi da Palestrina Clara Marvin,2013-10-15 First Published in 2002. This guide introduces students and scholars to the literature on Palestrina as well as the complicated history of the publication of his works. This bibliography is divided into four primary sections: historical background on musical, social, and cultural life; biographical literature; studies of sources, music, and style; and reception history. They are divided roughly into the periods dating from Palestrina's lifetime to about 1750; from about 1750 to about 1914; from 1914 to the present. This title also contains historical research on performance conditions and practices as they would have applied in Palestrina's time.

Salvation Is from the Jews Roy H. Schoeman, 2019-04-15 The book traces the role of Judaism and the Jewish people in God's plan for the salvation of mankind, from Abraham through the Second Coming, as revealed by the Catholic faith and by a thoughtful examination of history. It will give Christians a deeper understanding of Judaism, both as a religion in itself and as a central component of Christian salvation. To Jews it reveals the incomprehensible importance, nobility and glory that Judaism most truly has. It examines the unique and central role Judaism plays in the destiny of the world. It documents that throughout history attacks on Jews and Judaism have been rooted not in Christianity, but in the most anti-Christian of forces. Areas addressed include: the Messianic prophecies in Jewish scripture; the anti-Christian roots of Nazi anti-Semitism; the links between Nazism and Arab anti-Semitism; the theological insights of major Jewish converts; and the role of the Jews in the Second Coming. Perplexed by controversies new and old about the destiny of the Jewish people? Read this book by a Jew who became a Catholic for a well-written, provocative, ground-breaking account. Some of the answers most have never heard before. Ronda Chervin, Ph.D., Hebrew-Catholic

Without Title Geoffrey Hill, 2006 Praise for Geoffrey Hill's newest collection of poems: Without Title, his new collection, combines the force and freedom of Hill's narrative verse with a renewed faith in his masterly talents for form and wordplay. The result is alarmingly good; a collection of lyrics on the difficulties of ageing, the problems of belief and the vagaries of language bracketing a sequence of pindarics in which Hill, ostensibly responding to thoughts of the Italian poet Cesare Pavese, meditates at length on both their lives and considers the place of a poet in the world.-Tim Martin, Independent on Sunday

The Structure of Recognizable Diatonic Tunings Easley Blackwood, 2014-07-14 In a comprehensive work with important implications for tuning theory and musicology, Easley Blackwood, a distinguished-composer, establishes a mathematical basis for the family of diatonic tunings generated by combinations of perfect fifths and octaves. [Studies on the Origin of Harmonic Tonality](#) Carl Dahlhaus, 2014-07-14 Carl Dahlhaus was without doubt the premier musicologist of the postwar generation, a giant whose recent death was mourned the world over. Translated here for the first time, this fundamental work on the development of tonality shows his complete mastery of the theory of harmony. In it Dahlhaus explains the modern concepts of harmony and tonality, reviewing in the process the important theories of Rameau,

Sechter, Ftis, Riemann, and Schenker. He contrasts the familiar premises of chordal composition with the lesser known precepts of intervallic composition, the basis for polyphonic music in the late Middle Ages and Renaissance. Numerous quotations from theoretical treatises document how early music was driven forward not by progressions of chords but by simple progressions of intervals. Exactly when did composers transform intervallic composition into chordal composition? Modality into tonality? Dahlhaus provides extensive analyses of motets by Josquin, frottole by Cara and Tromboncino, and madrigals by Monteverdi to demonstrate how, and to what degree, such questions can be answered. In his bold speculations, in his magisterial summaries, in his command of eight centuries of music and writings on music, and in his deep understanding of European history and culture, Carl Dahlhaus sets a standard that will seldom be equalled.
