**Mapping The Mind** Rita Carter,2013-03-28 'One of the clearest and best-illustrated attempts to explain the virtually inaccessible, the brain' SUNDAY TIMES Brain scans reveal our thoughts, memories - even our moods - as clearly as an X-ray reveals our bones. We can watch a person's brain literally light up as it registers a joke, or glow dully when it recalls an unhappy memory. MAPPING THE MIND shows how these cans can be used to help explain aspects of our behaviour and how behavioural eccentricities can be traced to abnormalities in an individual brain. Dyslexia, for example, may be caused by a short-circuit in the messages converting sound to visual cues; addiction, eating disorders and alcoholism stem from dysfunction in the brain's reward system. In this acclaimed book Rita Carter draws on the latest in brain imaging to give extraordinary insights into how the brain works.

Itinerario de Enrique III Francisco de Asís Veas Arteseros,2003 Una de las características de la monarquía castellana en la Baja Edad Media es su carácter itinerante ya que el soberano - y con él la corte y buena parte de los integrantes de las instituciones del reino, como de la Cancillería, y en ocasiones de la Audiencia- realizaba frecuentes desplazamientos por el ámbito del territorio. Como único medio para hacer ver la labor de gobierno que le correspondía. El itinerario de Enrique III es, precisamente, el estudio del reinado del citado monarca de Castilla desde la vertiente que ofrecen los diversos viajes que realizó entre 1390, año en que accedió al trono tras la muerte de su padre, Juan I, y el 25 de diciembre de 1406, fecha de su muerte acaecida en Toledo. Una y otra fecha marcan los extremos de una actividad viajera en la que Enrique III, dejando el centro del territorio castellano, caso de Segovia y Burgos, llegó hasta León, Sevilla, Alfaró, Logroño, Zamora, Bilbao, como puntos más distantes a través de unos caminos cuyos jalones o etapas intermedias posibles se insertan, a la vez que las consideraciones sobre las causas y los avatares que en los viajes se presentaron o pudieron presentarse, según los testimonios documentales.

**Paisajes agrícolas en las comarcas hispalenses: Écija y la Vega del Guadalquivir. La agricultura y los agricultores. La pasión del trabajo en los albores de la naturaleza** Azahara Calderón Laguna, Concepción Nieto Morales, María Elena Nieto Cabrera, 2021-01-02 El sector primario ha sido y es uno de los más denostados laboralmente y empresarialmente, sin valorar que es uno de los sectores más importantes, dado que sin la agricultura sería imposible poder alimentarnos y vivir. La agricultura es agresiva con el medio ambiente, aunque se puede tratar de suavizar su marca, hay que reconocer que algunas prácticas agrícolas han tenido un impacto devastador sobre el medio ambiente, como podría ser el exceso de fertilizantes o de riego Desde finales del S. XVIII con la revolución industrial el éxodo del campo a la ciudad comenzó el declive del sector agrícola que poco a poco fue deteriorándose y denostándose. Con la industrialización se produce el trasvase de mano de obra agrícola a otros sectores más valorados socialmente y con mejores salarios y estabilidad en el empleo. Cuanto más avanzada esta la sociedad más denota el trabajo agrícola. Históricamente, solo los grandes terratenientes marcaban el desafío profesional y económico de la agricultura, sociedad, economía, etc., en definitiva, de la vida social durante siglos. La dictadura franquista (1939-1975) relanzó el sector agrario construyendo pantanos, pueblos de colonización agrícolas, convirtiendo tierras de secano en regadío, etc. hasta la década de los años 60 del pasado siglo XX. la economía española estaba basada en la agricultura como soporte principal considerándose un país eminentemente agrícola, aunque también impulsaron la industria con los planes de desarrollo industrial...
