Once Beneath The Forest Bl Turner li,2019-06-04 My interest in ancient Maya agriculture began late in the year of 1971 when William M. Denevan encouraged me to pursue the topic. Our interests had been perked by reports from Joseph W. Ball, Jack Eaton, and Irwin Rovner of the presence of terrace-like features throughout the Rio Bee region of the southern Yucatan Peninsula. Denevan maintained a long-term interest in pre-Hispanic agriculture and population in the New World. Our studies with the emerging Rio Bee research group at the University of Wisconsin led to the conclusion that the then dominant themes of Maya agriculture were in need of reevaluation and that a number of remains of intensive forms of agriculture were likely to be found in the Central Maya lowlands of Mexico, Peten (Guatemala), and Belize, particularly wetland or raised fields in addition to the reported terraces. Our interests were heightened at this time by notification from Alfred Siemens of the finds of wetland fields in the vicinity of the Rio Bee region in the Chetumal, Mexico-northern Belize area.

Golden Kingdoms Joanne Pillsbury,Timothy Potts,Kim N. Richter,2017-09-26 This volume accompanies a major international loan exhibition featuring more than three hundred works of art, many rarely or never before seen in the United States. It traces the development of gold working and other luxury arts in the Americas from antiquity until the arrival of Europeans in the early sixteenth century. Presenting spectacular works from recent excavations in Peru, Colombia, Panama, Costa Rica, Guatemala, and Mexico, this exhibition focuses on specific places and times—crucibles of innovation—where artistic exchange, rivalry, and creativity led to the production of some of the greatest works of art known from the ancient

Americas. The book and exhibition explore not only artistic practices but also the historical, cultural, social, and political conditions in which luxury arts were produced and circulated, alongside their religious meanings and ritual functions. *Golden Kingdoms* creates new understandings of ancient American art through a thematic exploration of indigenous ideas of value and luxury. Central to the book is the idea of the exchange of materials and ideas across regions and across time: works of great value would often be transported over long distances, or passed down over generations, in both cases attracting new audiences and inspiring new artists. The idea of exchange is at the intellectual heart of this volume, researched and written by twenty scholars based in the United States and Latin America.

The Transnational Construction of Mayanness Fernando Armstrong-Fumero,Ben Fallaw,2023-05-15 The Transnational Construction of Mayanness explores how US academics, travelers, officials, and capitalists contributed to the construction of the Maya as an area of academic knowledge and affected the lives of the Maya peoples who were the subject of generations of anthropological research from the mid-nineteenth century to the present. Expanding discussions of the neocolonial relationship between the US and its southern neighbors and emphasizing little-studied texts virtually inaccessible to those in Mexico and Central America, this is the first and only set of comparative studies to bring in US-based documentary collections as an enriching source of evidence. Contributors tap documentary, ethnographic, and ethnoarchaeological sources from North America to expand established categories of fieldwork and archival research conducted within the national spaces of Mexico and Central America. A particularly rich and diverse set of case studies interrogate the historical processes that remove sources from their place of production in the "field" to the US, challenge the conventional wisdom regarding the geography of data sources that are available for research, and reveal a range of historical relationships that enabled US actors to shape the historical experience of Maya-speaking peoples. The Transnational Construction of Mayanness offers rich insight into transnational relations and suggests new avenues of research that incorporate an expanded corpus of materials that embody the deep-seated relationship between Maya-speaking peoples and various gringo interlocutors. The work is an important bridge between Mayanist anthropology and historiography and broader literatures in American, Atlantic, and Indigenous studies. Contributors: David Carey, M. Bianet Castellanos, Matilde Córdoba Azcárate,

Vital Voids Andrew Finegold, 2021-05-11 The Resurrection Plate, a Late Classic Maya dish, is decorated with an arresting scene. The Maize God, assisted by two other deities, emerges reborn from a turtle shell. At the center of the plate, in the middle of the god's body and aligned with the point of emergence, there is a curious sight: a small, neatly drilled hole. Art historian Andrew Finegold explores the meanings attributed to this and other holes in Mesoamerican material culture, arguing that such spaces were broadly understood as conduits of vital forces and material abundance, prerequisites for the emergence of life. Beginning with, and repeatedly returning to, the Resurrection Plate, this study explores the generative potential attributed to a wide variety of cavities and holes in Mesoamerica, ranging from the perforated dishes placed in Classic Maya burials, to caves and architectural voids, to the piercing of human flesh. Holes are also discussed in relation to fire, based on the common means through which both were produced: drilling. Ultimately, by attending to what is not there, *Vital Voids* offers a fascinating approach to Mesoamerican cosmology and material culture.
