*Financial Analysis of Mergers and Acquisitions* Eli Amir,Marco Ghitti,2021-02-02 Mergers and acquisitions (M&As) reshape the corporate landscape helping companies expand market share and gain a strategic advantage. The ability to understand and analyze these transactions is a crucial skill. The first step in acquiring that skill is being able to gather and analyse information on M&As from public sources, such as financial statements. This textbook helps its readers better analyze M&A transactions using information provided in financial statements. Covering accounting and reporting of consolidations, goodwill, non-controlling interests, step acquisitions, spin-offs, equity carve-outs, joint ventures, leveraged buyouts, disposal of subsidiaries, special purpose entities, and taxes, it focuses on the link between underlying economic events and the information in financial statements and how this link affects the assessment of corporate performance. The first part of the book provides description of the accounting rules governing M&A transactions, while the second part includes cases of M&A transactions. Each case focuses on a different element of an M&A transaction, and it is followed by a detailed solution with a complete analysis. Unlike other books in this field, this textbook focuses exclusively on accounting and financial analysis for graduate and upper undergraduate level courses in financial analysis, corporate finance, and financial accounting.

Wiley International Financial Reporting Trends provides copious examples of footnote disclosures and financial statement formats, carefully culled from the world's leading international companies (Global 500) that are already compliant with IFRS and report under IFRS standards promulgated by the International Accounting Standards Board, the IASB. Arranged topically, this book is a quick source of reference to find answers to issues of interest to financial statement preparers. It provides hundreds of illustrations taken from financial statements prepared under IFRS by global conglomerates thereby helping preparers and users of financial statements to expeditiously obtain examples of footnote disclosures and financial statements presented under these Standards which are popularly referred to as principles-based standards (as opposed to rules-based standards). Additionally, Wiley International Financial Reporting Trends contains comparisons of IFRS to US GAAP, Indian GAAP, and Chinese GAAP, making it a truly global reference resource.

Strategic Leadership for Business Value Creation Don Argus,Danny Samson,2021-01-13 This book focuses on leadership and strategy, corporate governance, operational excellence, and corporate social responsibility. In doing so, it offers both conceptual perspectives and case studies on these topics that are targeted at business executives who want to develop and mature towards being successful value creators in their leadership roles. Authored by the former CEO of National Australia Bank (NAB), Don Argus, and business school professor Danny Samson, the book provides insights on the strategic leadership factors that make a significant and positive difference when they are executed effectively and, in contrast, what happens when ineffective leadership/ strategy are deployed. It proposes and illustrates core leadership axioms, and also delves into sustainable development as an element of strategy. The authors do this by developing and illustrating core concepts that relate to the two major case study companies of NAB and BHP. Readers will be particularly interested in the core elements of leadership and strategy, and the grounded reality of how they operated in the case studies. The authors bring insiders' and leaders' perspectives to these topics, including tables that document shareholder value creation, and the logic behind strategic decisions, as well as key organisational leadership and strategic decision processes.
